## Business development, result of operations, financial position and net assets

### Business Development

The MBB Group increased revenue in the first nine months of the financial year by 27.3% from €501.6 million to €638.8 million. In the same period, adjusted EBITDA increased by 20.4% from €58.6 million to €70.6 million. Thus, the adjusted EBITDA margin of 11.1% for the first nine months of 2022 was slightly below the high level of the prior-year period, when it was 11.6%. Adjusted earnings per share amounted to €2.18, up 26.9% year-on-year.

The third quarter was the strongest of the financial year for MBB so far. Revenue in this period increased by 48.8% to €260.5 million compared to €175.0 million in the previous year. Adjusted EBITDA increased by 79.7% to €32.5 million in the third quarter, corresponding to an EBITDA margin of 12.6%. Adjusted earnings per share amounted to €1.31 in the third quarter alone.

The **Service & Infrastructure** segment, which comprises Friedrich Vorwerk and DTS, increased its revenue by 27.2% to €340.2 million compared to the prior-year period. Friedrich Vorwerk contributed to this growth with an increase in revenue of 23.8% and DTS with an increase in revenue of 39.5%. At €56.2 million, adjusted EBITDA for the segment increased by 8.4% (previous year: €51.9 million). While Friedrich Vorwerk was able to keep its EBITDA constant compared to prior-year period, DTS increased EBITDA noticeable by 50.8% to €13.2 million. At €371.8 million, order backlog of Friedrich Vorwerk as of September 30, 2022 was significantly above previous year's level (September 30, 2021: €281.8 million) thanks to newly won major orders. Particularly noteworthy in this context are two major contracts won for the realization of connecting lines for the liquefied natural gas terminals in Brunsbüttel and Wilhelmshaven, as well as the commissioning for cable laying and logistics as part of the planned high-voltage direct current transmission line SuedLink. A positive development in the third quarter was the commissioning of the second and now exclusive project phase for the realization of the new direct current link A-North by the transmission system operator Amprion. In the event of a successful agreement and a subsequent commissioning of the next project phase by Amprion, the total order volume for the total of eight parties is expected to be in the range of €850 million to €1,100 million, in which Friedrich Vorwerk would have a share of at least 30%.

The **Technological Applications** segment, which comprises the listed companies Aumann and Delignit as well as OBO, which specializes in tooling products, recorded revenue growth of 23.0% to €222.1 million in the first nine months of the year (previous year: €180.6 million). In the same period, profitability increased significantly and an adjusted EBITDA of €9.3 million was achieved (previous year: €1.0 million). Aumann performed particularly well year-on-year, increasing its revenue by a substantial 31.8% to €150.4 million and its adjusted EBITDA to €5.6 million (previous year: €-2.0 million). The order intake of Aumann continued the strong performance of the previous quarters and reached €223.1 million for the first nine months of the year, a year-on-year increase of 26.8%. Delignit faced challenges in the supply chain, particularly in the first half of 2022, despite unabated high demand. In particular, production interruptions at important OEM customers, often announced at very short notice, and raw material price increases impacted revenue and the company's profitability. Thanks to revenue increases achieved in the course of the year, a slight rise in the revenue level with constant profitability was recorded.

The **Consumer Goods** segment, comprising the mattress manufacturer CT Formpolster and Hanke, which specializes in tissue products, recorded a 41.9% increase in revenue to €76.9 million (previous year: €54.2 million). The strong growth is attributable in particular to Hanke, which increased its revenue by 63.5% in the first nine months. However, CT Formpolster also contributed to segment growth with an increase in revenue of 13.1%. Despite rapidly rising energy and raw material prices, adjusted EBITDA for the segment increased by 26.1% to €5.0 million due to successfully implemented price increases. The EBITDA margin for the first nine months was 6.4% (previous year: 7.3%).

The Board and the Executive Management of MBB SE have proposed to the Annual General Meeting on June 30, 2022 a dividend payment of €1.98 per dividend-bearing share. The basic dividend included therein of €0.99 has been raised for the 13<sup>th</sup> consecutive time and has been continuously increased since the IPO of MBB SE in 2006. The Annual General Meeting approved the company's proposal by a large majority. The dividend was paid on July 5, 2022.

### Results of operations, financial position and net assets

Against the backdrop of a volatile economic environment, the results of operations, financial position and net assets of the MBB Group remain positive. At €638.8 million, consolidated revenue after nine months of the financial year 2022 is 27.3% considerably above last year's level (previous year: €501.6 million).

Revenue (adj.) by quarter  
in millions of €

Income from joint ventures and associates amounts to €10.4 million (previous year: €3.9 million). Other adjusted operating income of €12.5 million (previous year: €17.0 million) includes income from securities of €2.4 million, income from the reversal of provisions of €1.3 million, income from capitalized own work of €2.5 million, income from the offsetting of remuneration in kind of €1.9 million, and other income of €4.4 million. Own work capitalized mainly relates to the capitalization of development costs at Aumann.

Adjusted cost of materials increased by 36.5% to €376.5 million, adjusted staff costs increased by 11.8% to €172.9 million.

Adjusted other operating expenses amounted to €41.3 million (previous year: €36.3 million) after nine months. These include maintenance and repair expenses, legal and consulting fees, advertising expenses, insurance premiums, travel expenses and other third-party services.

Adjusted EBITDA (earnings before interest, taxes, depreciation and amortization) increased by 20.4% to €70.6 million corresponding to a margin of 11.1% (previous year: 11.6%). Adjustments were made for staff costs in the amount of €1.7 million, which related to MBB SE's and Aumann AG's stock option programs. In addition, other income of €0.4 million was adjusted, resulting from the sale of property, plant and equipment at Aumann, which was written off and adjusted in the previous year as part of a restructuring project. In the same period of the previous year, staff costs of €20.0 million and other costs of €1.1 million were adjusted that related each to the IPO of Friedrich Vorwerk Group SE.

EBITDA (adj.) by quarter  
in millions of €

Adjusted depreciation and amortization increased by 19.5% year-on-year to €28.1 million after nine months of the financial year 2022. The adjusted figure includes depreciation and amortization of assets amounting to €2.8 million capitalized as part of purchase price allocations (previous year: €3.3 million).

This resulted in an adjusted EBIT (earnings before interest and taxes) of €42.5 million (previous year: €35.1 million).

Taking into account net negative finance costs of €-4.5 million (previous year: €-5.4 million), adjusted EBT (earnings before taxes) amounted to €38.1 million (previous year: €29.7 million).

The adjusted consolidated net income after minority interests amounted to €12.7 million in the first nine months period (previous year: €10.2 million) or €2.18 per share (previous year: €1.72).

Consolidated equity as of September 30, 2022 amounts to €767.5 million (December 31, 2021: €808.5 million). In relation to the consolidated balance sheet total of €1,120.4 million (December 31, 2021: €1,152.3 million), the equity ratio slightly decreased to 68.5% compared to 70.2% as of December 31, 2021. The reduction in consolidated equity in the first nine months was mainly due to profit distributions to shareholders of MBB SE (€-11.5 million) and to non-controlling interests (€-3.6 million), the acquisition of treasury shares (€-5.2 million), the acquisition of an additional 4.69% stake in Aumann

(€-11.6 million), and the fair value measurement of securities (€-32.3 million). This was offset by the consolidated earnings after taxes of €23.6 million generated in the first three quarters of 2022, of which €13.2 million is attributable to non-controlling interests and €10.4 million to shareholders of MBB SE.

As of September 30, 2022 the MBB Group had liquid funds (including securities and physical gold holdings) of €443.0 million (December 31, 2021: €622.5 million), of which MBB SE accounted for €340.8 million (December 31, 2021: €402.2 million). After deducting the Group's financial liabilities of €83.0 million (December 31, 2021: €87.9 million), the MBB Group's net cash position amounts to €359.9 million, compared to €534.6 million as of December 31, 2021. Of this amount, €340.1 million (December 31, 2021: €401.2 million) was attributable to MBB SE.

The decrease in net cash is partly attributable to a negative cash flow from operating activities of €-64.2 million. Significant effects arose at Friedrich Vorwerk, whose operating cash flow is characterized by a seasonal increase in net working capital over the course of the year, which was further intensified in the first nine months of 2022 by the simultaneous start-up of several major projects. Net cash was also reduced by net investments in property, plant and equipment and intangible assets (€-32.0 million), by the acquisition of an additional 4.69% shareholding in Aumann (€-11.6 million), the purchase of treasury shares (€-5.2 million), dividend payments to MBB SE shareholders (€-11.5 million) and to non-controlling interests (€-7.1 million) and the fair value measurement of securities (€-32.3 million).

Due to current economic uncertainties, MBB SE and Aumann increased their investments in short-term government bonds by €80.2 million in the first nine months of the year, while their holdings of stocks were reduced by €104.1 million. In the consolidated statement of cash flows, the effect of this portfolio shift is presented in the cash flows from investing activities. They represent a transfer within net cash.

## Outlook

Due to the pleasing business development in the first nine months and a positive outlook for the fourth quarter, MBB is increasing its revenue forecast for the current financial year from more than €740 million to more than €800 million and confirms the forecast EBITDA margin of at least 10%. MBB Group will achieve a correspondingly higher adjusted EBITDA in the financial year 2022.

Berlin, November 11, 2022

The Executive Management of MBB SE
