FINANCIAL REPORT 30th June 2020

einhell.com

Dear shareholder,

The financial report of the Einhell Group as at 30 June 2020 meets the requirements under the Securities Trading Act (WpHG) for preparing interim reports. It includes abbreviated Group interim statements, a condensed Group management report and a statement of responsibility by the legal representatives. The financial statements are consistent with the International Financial Reporting Standards (IFRS) and their interpretations, as published by the International Accounting Standards Board (IASB) and applicable in the European Union.

There may be minor deviations in this report and in other reports due to rounding of totals and the calculation of percentage figures.

Condensed Group Management Report of Einhell Germany AG

Overview of January - June 2020

In the first half of 2020, the Einhell Group generated revenue amounting to EUR 341.6 million. This figure clearly exceeds the revenue level generated in the first half of 2019.

Profit before income taxes amounts to EUR 23.3 million. This corresponds to a return on revenue of about 6.8% (previous year: 6.3%), which is higher than Einhell's long-term average profit margin in the range of 5% to 6%. The Board of Directors considers this sustainable profit margin of 5% to 6% to be an excellent achievement compared to the rest of the sector, and sets this level as the long-term target average it wants to achieve along with further growth in revenue.

General economic conditions

D/A/CH region

Sentiment in Germany's board rooms has brightened further. The Ifo business climate index increased from 79.7 to 86.2 points in June. This is the strongest increase ever measured. The current situation is also assessed as slightly better by the companies.

The inflation rate in Germany picked up again in June 2020, starting from a relatively low level. According to the Federal Statistical Office, consumer prices were up 0.9% compared to the prior-year level.

Due to the coronavirus pandemic, the gross domestic product in Germany fell more sharply than at any time since World War II. Germany's economic performance dropped by 10.1% in the months from April to June. Compared to the previous year, the German economy contracted by 11.7%.

Incoming orders for German industry increased more dynamically than expected in June 2020. Compared to the previous month, the order intake increased by 27.9% according to the Federal Statistical Office.

In June 2020, Germany exported goods worth EUR 96.1 billion and imported goods in the amount of EUR 80.5 billion. According to the Federal Statistical Office, German exports were thus 9.4% and imports 10.0% lower in June 2020 than in the prior-year period.

The foreign trade balance, i.e. the balance of exports to imports, adjusted for calendar and seasonal effects closed with a surplus of EUR 14.5 billion in June 2020.

The coronavirus crisis seems to be gradually loosening its chokehold of the German labour market. While the number of unemployed climbed again to 2.853 million in June 2020, which is untypical for the time of year, this still represented a moderate increase compared to May, with 40.000 more people in work. All in all, 638,000 people went out of employment between April and June due to the coronavirus crisis, according to the German Federal Employment Agency.

Following a successful year 2019 with total gross revenue of EUR 19.46 billion, the construction and DIY sector in Germany expects a slight increase in revenue between 1.5% and 1.8% in 2020.

Western and Eastern Europe

In the second quarter of 2020, the gross domestic product (GDP) in the eurozone suffered the sharpest slump in 25 years due to the coronavirus crisis. According to the European statistical authority Eurostat, the GDP fell by 12.1% between April and June compared to the previous quarter.

| GDP Western Europe in % | 2020 |
|-------------------------|-------|
| Spain | -10.9 |
| France | -10.6 |
| Italy | -11.2 |

| GDP Eastern Europe in % | 2020 |
|-------------------------|-------|
| Croatia | -10.8 |
| Poland | -4.6 |
| Romania | -6.0 |
| Czech Republic | -7.8 |

In June, industrial production in the eurozone recovered further from the slump caused by the coronavirus outbreak in spring 2020. Production in the industrial companies of the monetary union increased by 9.1% month-on-month in June 2020.

As expected, the unemployment rate in the eurozone increased in June 2020. It now stands at 7.8%. The unemployment rate for the entire European Union stands at 7.1% in June.

The inflation rate in the eurozone was slightly up again, despite the sustained impact of the coronavirus pandemic. Consumer prices increased by 0.3% in June 2020 compared to the prior-year period.

The Harmonised Index of Consumer Prices (HICP) for Germany, which is calculated for EU purposes, was 0.8% higher in June than in the same month last year and 0.7% higher than in May 2020.

This means that the threshold of two percent, which is significant in terms of the monetary policy of the European Central Bank (ECB), has been missed again.

Overseas

Despite the relatively successful containment of infection figures compared to other countries owed to the introduction of timely countermeasures, Australia's GDP already declined in the first quarter of 2020, according to the analysts of Nord LB. The decline of 0.3% compared to the previous quarter represents the first contraction since 2011. Because of an inevitable slump in the second quarter, Australia falls into recession for the first time since 1991, according to the analysts. Although the available economic data indicates that the low point has already been reached in April, apparently the tentative recovery thereafter only accounts for some of the previously suffered declines.

The South American countries, in which the Einhell Group is active, and Australia posted the following growth rates to date in 2020:

| GDP in % | 2020 |
|-----------|------|
| Argentina | -5.7 |
| Australia | -6.7 |
| Colombia | -2.4 |
| Chile | -4.5 |

Performance report

Einhell Group revenue

From January to June 2020, the Einhell Group generated revenue of EUR 341.6 million (previous year: EUR 323.0 million). This represents a substantial increase year-on-year. Until the first lockdowns in mid-March, the Einhell Group generated excellent sales revenues. In the month of April, revenue was approx. EUR 10.0 million below plan due to the coronavirus. However, this gap in revenue was already recovered by catch-up effects in May and June. The share of e-commerce has risen further as stores were temporarily closed and curfews were imposed. An increase in DIY activities led to an increase in demand for DIY products. Einhell's excellent listings and broad presence in the market enabled the company to benefit very much from this trend.

In the **D/A/CH region** (Germany, Austria, Switzerland), revenue increased significantly to EUR 155.7 million (previous year: EUR 137.7 million). The region's share in total consolidated revenue amounts to 45.6% (previous year: 42.6%).

The significant increase in revenue is driven by a strong presence in the DIY stores, at the point of sale and in the e-commerce channels. This is where Einhell's high investments in listings and e-commerce in the past few years now pay off. Furthermore, Einhell's distribution is strong and broad based. In the meantime, Einhell is listed in all relevant DIY stores and has continuously been able to deliver its products even during the coronavirus crisis. The coronavirus crisis has led to a DIY boom in Germany, which shows in rising sales revenues. However, even January and February 2020 were very strong months revenue-wise. In terms of revenue, the second quarter of 2020 was the strongest quarter in Einhell's history.

In **Western Europe**, revenue of EUR 66.6 million (previous year: EUR 66.5 million) remained at the previous year's level. The largest sales markets in the region include France, Italy and the UK.

The subsidiaries in the Western Europe region have performed well so far, with revenues at the previous year's level. Our distribution company in Italy managed to increase both revenue and earnings compared to the previous year. The UK, France and Spain, which were heavily affected by the coronavirus crisis, are slightly behind in terms of revenue and earnings.

Revenue in **Eastern Europe** increased slightly by EUR 0.8 million to EUR 34.2 million (previous year: EUR 33.4 million).

The Eastern Europe region shows a mixed picture. Many of the distribution companies managed to generate healthy revenues and earnings so far. On balance, the region performed slightly better than in the prioryear period in terms of both revenue and earnings. Einhell Poland and Einhell Ukraine fell slightly short of their revenue and earnings budgets. The **Overseas** region saw substantial revenue growth from EUR 59.1 million to EUR 66.9 million. Revenues in this region are mainly generated by Ozito Industries.

The subsidiaries in the **Overseas** region showed a highly disparate development in financial year 2020. Ozito Industries Pty Ltd was able to significantly increase both revenue and earnings compared to the previous year. Einhell Chile, the largest subsidiary in South America, has also performed very well. Revenue and earnings figures benefit from the very high penetration rate in this market. In Colombia, however, revenue and earnings are still on a decline in financial year 2020, which keeps the company in the red.

In the **Other Countries** including Asia, revenue was significantly below the prior-year level at EUR 18.2 million (previous year: EUR 26.3 million).

The Other countries region, and here the Asian subsidiaries in particular, did not managed to increase their revenue figures compared to the prior-year period. This is mainly due to a major customer, who had previously purchased directly in Hong Kong and is now again processing its orders directly via the local Group companies. Moreover, direct customers from South and Central America have reduced their orders due to the coronavirus crisis.

Earnings development

From January to June 2020, the Einhell Group generated profit before income taxes of EUR 23.3 million (previous year: EUR 20.3 million). The pre-tax margin is 6.8% (previous year: 6.3%).

The gross profit margin is slightly higher due to the higher proportion of Power X-Change products sold.

This takes earnings above the long-term average of 5-6%.

Consolidated net profit after minority interest amounts to EUR 16.4 million in the period under review (previous year: EUR 15.1 million). Earnings per share amount to EUR 4.3 (previous year: EUR 4.0 per share).

Compared to the prior-year period, personnel expenses remained almost unchanged at EUR 39.7 million (previous year: EUR 39.3 million). The personnel expenses ratio stands at 11.6% (previous year: 12.2%).

Depreciation increased by EUR 0.7 million in financial year 2020, from EUR 4.0 million to EUR 4.7 million.

Other expenses also increased significantly year-onyear from EUR 44.8 million to EUR 52.2 million. The increase was mainly due to higher revenues. Moreover, impairment valuation allowances on trade receivables, which were formed as a precautionary measure, led to higher expenses. These were formed as we believe the coronavirus pandemic will increase the risk of bad debts.

The financial result of EUR -1.3 million (previous year: EUR -1.5 million) is slightly below the prior-year level. This includes financial income amounting to EUR 3.0 million and financial costs in the amount of EUR 4.3 million. Financial costs include high refinancing costs in some countries with high interest rates and expenses for currency hedging.

Personnel and HR services

On 30 June 2020, the Einhell Group had 1,598 employees worldwide (previous year: 1,561).

The Board of Directors would like to take this opportunity to thank all employees for their personal commitment and excellent work.

Financial performance and net assets

The key line items in the statement of financial position as at 30 June 2020 and 30 June 2019 are as follows:

| | 06/2020 | 06/2019 ^(*) |
|---|-------------------|------------------------|
| | in EUR million | in EUR million |
| Non-current assets incl. deferred tax as- | | |
| sets | 81.1 | 67.8 |
| Inventories | 128.6 | 153.7 |
| Receivables and other assets | 167.2 | 155.0 |
| Cash and cash equivalents | 22.0 | 20.7 |
| Equity | 220.9 | 205.8 |
| Liabilities to banks | 31.1 | 61.4 |

Investments

In the period under review, the Einhell Group made investments amounting to EUR 5.1 million (previous year: EUR 6.5 million). The majority of this was spent on operating and office equipment and assets under construction.

Current assets

Goods inventories are down on the previous year to EUR 128.6 million (previous year: EUR 153.7 million). The excellent sales performance in the last weeks led to low inventory levels at the Einhell Group as at 30 June 2020.

Trade receivables are stated net of allowances for bad debts. Mainly driven by the revenue increase, trade receivables climbed by EUR 10.3 million year-on-year to EUR 143.1 million in the period under review (previous year: EUR 132.8 million). The coronavirus crisis could in principle result in an increased risk of default for trade receivables in the third and fourth quarters of 2020. For this reason, impairment valuation allowances corresponding to the expected default rate were formed as at 30 June 2020.

At EUR 24.1 million, other current assets were slightly above the previous year's level (previous year: EUR 22.2 million).

Cash and cash equivalents amount to EUR 22.0 million on the reporting date (previous year: EUR 20.7 million). Liabilities to banks decreased from EUR 61.4 million to EUR 31.1 million year-on-year due to the strong profit performance and the significant reduction of inventories.

Mainly driven by the dynamic sales in June 2020 and the resulting VAT payment charges, other non-current and current liabilities increased.

Group structure

In the period under review, Einhell Electro Machinery Technology Co., Ltd. was founded. Einhell Germany owns 100% of the shares in this company.

Investor Relations

On 29 April 2020, Einhell Germany AG participated in the Munich Capital Market Conference in order to talk to analysts and investors. At the conference, the Group presented its figures of 31 December 2019 and also gave an outlook on planned performance.

Financing

The financial requirements of the Einhell Group are driven in particular by the level of inventories and trade receivables. Stock turnover rates of inventories and the maturities of trade receivables play a major role here and have a significant impact on the financial requirements.

In 2018, Einhell Germany AG took out a long-term loan in the amount of EUR 25.0 million. The loan is granted in connection with an innovation subsidy programme provided by KfW (German government-owned development bank) and has a term of 10 years.

In the shorter term, the Group also has access to sufficient credit facilities to finance further revenue growth.

Note to the financial report

The financial report was subjected to neither a review pursuant to Section 317 of the German Commercial Code (HGB) nor an audit.

Corporate Governance Code

The current Declaration of the Board of Directors and the Supervisory Board of Einhell Germany AG on the German Corporate Governance Code pursuant to section 161 of the Stock Corporation Act (AktG) is permanently available on the Company's website at www.einhell.com.

Risk report

As part of its international operations, Einhell is exposed to a variety of risks that are inherent in all entrepreneurial activities.

The risk management process in the Einhell Group is split into two stages. The first stage is the decentralised recognition of risks in subsidiaries and the various departments of Einhell Germany AG by the risk officers appointed by the Board of Directors.

They are responsible for risk identification and evaluation. The critical aspect here for the Einhell Group is identification, since no risk planning can be undertaken for risks that have not yet been identified.

The internal control system comprises integrated process controls and internal control systems.

The domestic controlling, investment controlling, finance, Group accounting and legal departments constitute the internal management system of the Einhell Group.

The Einhell Group companies make a forecast in the relevant financial year to budget the following financial year. Based on differentiated revenue planning, the corresponding cost of goods sold and other costs are budgeted. These projected figures are collated for the Group into a budgetary statement of income.

The actual figures from the individual companies are processed on a monthly basis. As a result, a complete consolidated statement of income is devised that compares the budgeted and actual figures and allows for their analysis. The development of order intake, margins etc. is also reported for all companies on a monthly basis.

The comparison is discussed with the members of the Board of Directors and with the managers of the separate divisions and companies. The analysis of the budgeted and actual figures permits relevant measures to be developed and implemented.

The internal monitoring system comprises measures that are integrated into the processes as well as measures that are independent of the processes.

In addition to automated IT process controls, manual controls also form an important part of integrated process measures which are, for example, also carried out by the internal audit department. The Supervisory Board, the Group auditors and other audit bodies are involved in carrying out process-independent controls within the Einhell Group.

The audit of the consolidated financial statements by the Group auditors in particular is the main process-independent control measure with respect to Group accounting processes.

The Einhell Group operates internationally and is thus exposed to market risks from changes to interest rates and exchange rates.

The Group uses derivative financial instruments to manage these risks. The guidelines used for managing the associated risks are implemented with the approval of the Board of Directors by a central treasury department working in close cooperation with the Group companies.

In conclusion, there are no risks that endanger the future of the Group as a going concern according to the Board of Directors' assessment.

Forecast

Expected development in %20192020GDP Germany0.6-6.5

Performance in the D/A/CH region

The German Council of Economic Experts expects the German gross domestic product (GDP) to shrink by 6.5% in 2020. In March, the council had still assumed that the gross domestic product would contract by 2.8% in the current year, and in the worst-case scenario by 5.4%.

The coronavirus crisis will also leave its mark on the labour market. Unemployment figures are expected to rise, especially in the third and fourth quarter.

Performance in the Western and Eastern Europe regions

The recession due to the coronavirus pandemic could turn out even more pronounced this year than originally expected, according to the EU Commission. The economic performance in the eurozone could slump by 8.7% in 2020, while the EU Commission expects a decline of 8.3% for the European Union overall.

The ECB forecasts a dramatic economic slump in the eurozone in 2020 as a result of the coronavirus crisis as well as an inflation rate of only 0.3% in the currency zone.

Performance in the Overseas region

The analysts expect Australia's gross domestic product to decline in 2020, while there is still a high degree of uncertainty.

The following economic growth rates are expected in Australia and the South American countries, in which the Einhell Group is active:

| GDP in % | 2019 | 2020 |
|-----------|------|------|
| Argentina | -2.2 | -5.7 |
| Australia | 1.8 | -6.7 |
| Colombia | 3.3 | -2.4 |
| Chile | -1.1 | -4.5 |

Outlook and strategy

The Board of Directors' assumptions and forecasts are based on the information currently available. The future business performance depends on a variety of factors such as general market developments and macroeconomic trends as well as the development in the crisis regions and the trends on the currency markets.

The **Power X-Change** devices represent an important growth and technology driver for Einhell. The company therefore has expanded it's Power X-Change platform to over 170 devices now. In the long-term, the sales share of Power X-Change devices is to be increased to 40% to 50% of group sales. In view of the highly successful cooperation with BMW i Motorsport, management has decided to extend the contract. Einhell's involvement in Formula E is to be further intensified and selectively developed at an international level.

80 Power X-Change devices are now ready for the US market. The business partner in the USA has not yet made as much progress as had been expected. Nevertheless. Einhell still wants to enter the US market and continues to drive the corresponding activities in the States. In Scandinavia, the joint venture with our business partner Millarco is making great progress and has already acquired a key DIY chain as one of its customers. Negotiations with a potential business partner in South Africa were put on hold because of the coronavirus crisis. However, as the partner demonstrated a stable performance despite the crisis, talks concerning a potential investment have now been taken up again. In Thailand, Einhell held first talks with a promising partner from the DIY store sector. However, as their ideas regarding the purchase price model and the purchase price itself differed greatly, this cooperation was not pursued any further, while the search for a partner in South East Asia will be continued.

In summary, it can be concluded that the Einhell Group is strategically on track for success. As such, Einhell managed to attain market leadership in the field of battery-powered gardening tools in Germany and second place in the overall market of motorised gardening tools. In the Power Tools segment, Einhell ranks third after Bosch and Makita in both the overall market and for battery-powered devices.

The Einhell Group confirms its lifted forecast for 2020 and expects revenue of approx. EUR 620-630 million in financial year 2020. The operating margin before tax is expected to reach approx. 5.5-6.0%.

The Einhell Group has also set a medium-term revenue growth target of EUR 750 million, to be reached by financial year 2023/2024. The long-term objective of the Einhell Group is to reach the revenue mark of EUR 1.0 billion.

Landau a. d. Isar, 20 August 2020

Einhell Germany AG The Board of Directors

*) In the course of the first-time application of IFRS 16, the adjustments required for previous years were made

Selected IFRS consolidated notes of Einhell Germany AG, Landau/Isar, for the period from 1 January to 30 June 2020

1. Principles and methods used in preparing the consolidated financial statements

1.1 Basis of consolidation

The consolidated financial statements comprise Einhell Germany AG and the companies it controls. IAS 27 defines control as the power to govern the financial and operating policies so as to obtain benefits from a company's activities. If the Group holds more than 50% of the voting rights of a company, either directly or indirectly, it is deemed to control such company, unless such assumption is refuted. Companies that are acquired or sold during the course of a financial year are included in the consolidated financial statements as from the date of acquisition until the date of sale.

In the period under review, Einhell Electro Machinery Technology Co., Ltd. was founded. Einhell Germany owns 100% of the shares in this company.

1.2 Accounting and valuation principles

The report as at 30 June 2020 applies the same accounting and valuation principles as were used in the annual financial statements 2019. The IFRS standards that have become mandatory as from 1 January 2020 are applied accordingly by the Einhell Group.

2. Notes to statement of financial position

2.1 Non-current assets

Intangible assets and property, plant and equipment are valued at acquisition or manufacturing cost. Intangible assets amount to EUR 17.5 million as at 30 June 2020, while property, plant and equipment amount to EUR 50.8 million and are recognised in the statement of financial position less accumulated depreciation. Scheduled depreciation and amortisation of intangible assets and property, plant and equipment amounted to EUR 4.7 million as at 30 June 2020.

2.2 Inventories

| | June 2020 | June 2019 |
|---|--------------|--------------|
| | EURk | EURk |
| Raw materials and supplies (at acquisition cost) | 370 | 436 |
| Finished goods | 127,778 | 152,772 |
| Advance payments | 403 | 463 |
| Total | 128,551 | 153,671 |

Inventories are valued at the lower of acquisition or manufacturing cost or net realisable value. Impairments amounted to EUR 1.1 million (previous year: EUR 1.6 million).

2.3 Cash and cash equivalents

Cash and cash equivalents include bank balances, cheques and cash in hand.

2.4. Dividend

A resolution was passed to pay a dividend of EUR 5,158,496.00 for financial year 2019. The distribution amount corresponds to a dividend of EUR 1.40 per preference share (previous year: EUR 1.40) and EUR 1.34 per ordinary share (previous year: EUR 1.34).

2.5 Provisions

Provisions total EUR 34,422 thousand. This includes non-current provisions of EUR 1,158 thousand. Provisions refer in particular to provisions for warranty.

2.6 Liabilities

Upon addition, liabilities are valued at fair value of the consideration received; subsequent valuation is performed at amortised cost. Liabilities in foreign currencies are recognised at the reporting date rate or hedging rate as at the reporting date.

3. Notes to the consolidated statement of income

Other operating expenses

Other operating expenses amount to EUR 52,231 thousand as at 30 June 2020. This pertains primarily to expenses for the shipping of goods, warranty, customer services, impairment, advertising and product design.

4. Segment reporting

The identification of reportable operating segments pursuant to IFRS 8 is based on the so-called management approach concept. The division of the Einhell Group into regions reflects the Group's internal management and reporting structures. The regions are: "D/A/CH region", "Western Europe", "Eastern Europe", "Overseas" and "Other countries".

Income and expenses that cannot be directly allocated to the individual regions and consolidation effects are shown in the reconciliation item.

4.1 Segment reporting by region

| June 2020 in EURk | D/A/CH region | Western Eu- rope | Eastern Europe | Overseas | Other countries | Reconciliation | Group |
|--|---------------|---------------------|----------------|----------|-----------------|----------------|---------|

5. Other notes

5.1. Related party disclosures

Thannhuber AG is the controlling shareholder of Einhell Germany AG. Philipp Thannhuber and Dr Markus Thannhuber (shareholders of Thannhuber AG) received remuneration for their activities as executive bodies of Einhell Germany AG in financial year 2020.

The value of transactions and balances outstanding in connection with Thannhuber AG and its related parties break down as follows:

| in EURk | Value of tio | | Outstanding bal- ances as of 30 June | | | |
|-------------------|--------------|---------|--|------|--|--|
| | 06/2020 | 06/2019 | 2020 | 2019 | | |
| Consulting (*) | 13 | 0 | 0 | 0 | | |

(*) The Group used consulting services provided by Josef Thannhuber, Chairman of the Supervisory Board of Thannhuber AG, for project planning and implementation of construction and property projects. The fee invoiced for these services corresponded to normal market rates. The invoice amounts were due in line with normal payment terms.

iSC GmbH shipped a small amount of palleted goods on behalf of Comedes GmbH. The revenue from these shipping and sales services is immaterial and is based on the arm's length principle.

Einhell Germany AG and its subsidiaries did not carry out any legal transactions with Thannhuber AG and its related parties during financial year 2020 that would have been to the disadvantage of Einhell Germany AG or its subsidiaries. Nor did Thannhuber AG take or fail to take any measures that would have negatively affected Einhell Germany AG or its subsidiaries.

6. Statement of responsibility

To the best of our knowledge, we assure that the interim consolidated financial statements give a true and fair view of the net assets, financial position and results of operations of the Group and that the interim Group management report accurately reflects the actual development and performance of the business and the position of the Group and describes the principal risks and opportunities associated with the Group's expected development in the remaining months of the financial year.
