## FOREWORD BY THE MANAGEMENT BOARD

**DEAR SHAREHOLDERS, EMPLOYEES AND BUSINESS PARTNERS OF  
SUSS MicroTec AG,**

Following an extremely successful fourth quarter in 2005, the first quarter of this year also went remarkably well. Order entry and sales were very strong and, for the first time since 2001, we were able to close out the first three months of a fiscal year with positive results after taxes.

Order entry amounted to EUR 40.6 million compared to EUR 24.0 million in the first quarter of 2005 (plus 69.2 percent). During the reporting period, sales reached EUR 39.1 million as opposed to EUR 19.7 million in Q1/2005. This represents an increase of 98.4 percent. Gross profit reached EUR 17.6 million (Q1/2005: EUR 7.0 million, a plus of 151.7 percent). The gross profit margin was at 45.0% (Q1/2005: 35.4%). The EBIT amounted to EUR 4.8 million – during the same reporting period the previous year, a minus of EUR 4.9 million was still being reported. We ended the quarter with a net income after taxes of EUR 3.7 million (Q1/2005: minus EUR 5.3 million).

These figures prove that the restructuring measures implemented over the last two years together with our product and sales strategy have enabled us to achieve our goals.

The Lithography segment, which represents more than half of our entire business, experienced outstanding development. A large portion of the restructuring measures mentioned above concerned this segment. Implementation of the overall concept required a significant contribution on the part of all divisions and at all levels. Today we can see how these efforts have paid off: the high demand for lithography products (Mask Aligner, Coater, and Developer) was undiminished in the first quarter of 2006. To our delight, orders for Mask Aligner intensified again. This development shows that capacities are being expanded in our main markets of microsys-

+ Stephan Schulak, Chief Financial Officer +

tems technology and advanced packaging. The need for sensors for airbags, inkjet print heads, GPS systems and high-performance chips, etc., continues to increase, which leads us to assume that this positive trend will continue.

Sales could also be increased in our second largest segment, Test Systems, which represents about a quarter of the business volume of the SUSS MicroTec Group, even though order entry remained considerably behind the very good comparison value of the previous year. Quoting activity is also at a very high level in this segment, however, and the mood is positive, which means we are not anticipating any change in trend.

In France, where the Device Bonder segment is located, order entry development was satisfactory. The low sales can be attributed to the fact that there were no final acceptances in the first quarter. Corresponding sales contributions are expected in the second quarter. As already experienced in the fourth quarter of last year, the demand for Device Bonder is currently based mainly on the need for infrared sensor technology applications.

In the Substrate Bonder segment, we continued to report the very positive development of the fourth quarter of 2005. After the complete portfolio had been replaced by newly developed tools over the last two years, penetration of the market continued to have the highest priority. Sales and order entry also delivered a very clear message here: the chosen path is the correct one. This was further underscored by the successes described on page 5 et seq.

As far as regional distribution of sales and order entry are concerned, it was both surprising and pleasing at the same time that in the first quarter of this fiscal year the very weak values of the same period last year had rebounded with respect to Asia. All of the other regions demonstrated good growth. Detailed information on the segments and on the split of sales and order entry by region can be found on pages 7 et seq.

As for C4NP, development of the "High Volume Production Tool" is proceeding according to plan. In June we will start on the installation of the first such system at IBM in East Fishkill, USA. Interest in this new technology continues to be very high and we are planning to "bump" the first wafers on this device starting in August. We are still optimistic that we can achieve further successes with the introduction of C4NP as early as this year.

The positive development of the core business confirms our break-even-model. The earnings situation at SUSS MicroTec is quite dependent on sales development: increases in sales leads to considerably better gross profit because the cost of administration, sales and even research and development remain relatively constant. The higher gross profit then has a direct impact on the EBITDA – as can be seen in this quarter. Two leading American research institutes recently ranked their 2006 growth predictions for the semiconductor supplier industry on this: VLSI from 6 percent to 13 percent and Gartner Dataquest from 9 to 14 percent. In this respect, the conditions are set for this favorable business development to continue for SUSS MicroTec.

Garching, May 2006

Dr. Stefan Schneidewind  
Chief Executive Officer

Stephan Schulak  
Chief Financial Officer

### LITHOGRAPHY SEGMENT SUCCESSFUL

Our latest generation of products for lithography applications is enjoying brisk demand. We have noted that our customers are increasingly ordering the Mask Aligner Compact series, the Coating Clusters and the Spray Coater range of products, in particular. The common factors for success in these areas are utmost precision and reliability – which ultimately results in greater output with a high yield in production. This is required in all of our markets. Whether MEMS, advanced packaging or compound semiconductors: what's needed in production are economic, reliable equipment solutions that enable sensors and modern chip connections to be produced with a favorable cost of ownership. This segment developed positively during the last fiscal year and this trend is continuing.

### SUBSTRATE BONDER SEGMENT RECEIVES AWARD

In March 2005 SUSS MicroTec received an award from Analog Devices, a worldwide leading MEMS manufacturer, for its contributions to a special project. The Analog Devices' 2005 Supplier Excellence Award distinguished the Substrate Bonder division of SUSS MicroTec, Waterbury, USA, for its outstanding achievements. Additional awards were received by Applied Materials, LAM Research and TSMC, among others.

The people at Innovative MicroTechnology (IMT) are also convinced of the advantages of the SUSS MicroTec Substrate Bonder. IMT is a leading MEMS foundry, which produces and delivers over a million microsystems each week. This type of high-volume production alone signifies the importance of high yield and thus of precision and reliability. After IMT had experienced the quality and flexibility of the SUSS MicroTec-Substrate Bonder, a follow-up order was placed. This second system was already installed in March in Santa Barbara, California.

## INVITATION TO THE SHAREHOLDERS' MEETING 2006

Our annual general shareholders' meeting will take place on June 20th in Munich this year. Of course we are hoping that the largest number of shareholders possible will attend. To make voting as easy as possible for you, we are again providing a voting rights representative, who will vote on the agenda items according to your instructions. We are also providing our shareholders with the option again this year to commission this voting rights representative online, via the Internet. More details on this option are available in our invitation to the Shareholders' Meeting, which you can also find on our website at [www.suss.com](http://www.suss.com). We hope that we have hereby made it somewhat easier for you, our honored shareholders, to have your interests represented and we look forward to your attendance and/or the exercising of your voting rights at this year's Shareholders' Meeting of SUSS MicroTec AG.

## **SELECTED EXPLANATORY NOTES TO THE INTERIM REPORT OF SUSS MicroTec AG AS OF MARCH 31, 2006**

### **1. GENERAL ACCOUNTING POLICIES**

The consolidated financial statements of SUSS MicroTec AG as of December 31, 2005 were prepared in accordance with International Financial Reporting Standards (IFRSs) issued by the International Accounting Standards Board (IASB) and valid as of the balance sheet date. The interim Group financial statements as of March 31, 2006, which have been prepared in accordance with International Accounting Standard (IAS) 34 "Interim Financial Reporting", have been drawn up using the same accounting methods as in the 2005 Group financial statements.

All interpretations of the International Financial Reporting Interpretations Committee (IFRIC), which are mandatory as of March 31, 2006 have also been applied.

The interim financial statements were neither audited by the group's auditors, KPMG Deutsche Treuhand-Gesellschaft, Aktiengesellschaft, Wirtschaftsprüfungsgesellschaft, nor did they undergo an auditing review.

The following new or revised standards and interpretations of the IASB and the IFRIC went into effect as of January 1, 2006.

- Amendment to IAS 39 and IFRS 4 "Financial Guarantee Contracts"
- Amendment to IFRS 4 "Revised Guidance on Implementing IFRS 4"

However, either of the two revised standards did not have a significant impact on the assets, financial and earnings position or they were not relevant with respect to the interim financial statements.

| STATEMENT OF INCOME AND COMPREHENSIVE INCOME |
| BALANCE SHEET                                |
| STATEMENT OF CASH FLOWS                      |
| STATEMENT OF SHAREHOLDERS' EQUITY            |
| SEGMENT REPORTING                            |
| ► NOTES                                      |

For additional information on the individual accounting methods applied, please refer to the consolidated financial statements of SUSS MicroTec AG as of December 31, 2005.

All amounts are indicated in thousand Euro (TEUR) unless otherwise noted.

## 2. CHANGES IN GROUP STRUCTURE

The financial statements of SUSS MicroTec AG and all of the major companies for which there is a group control option according to the control principle, irrespective of the level of participating interest, are included in the consolidated financial statements. With respect to the consolidated financial statements as of December 31, 2005, there were no changes within the consolidated Group.

## 3. SIGNIFICANT EVENTS

Based on the orders received from customers, the reversal of a write-down on value-adjusted inventories amounting to TEUR 240 was performed in the Device Bonder segment.

In addition to the above, there were no events and transactions during the interim reporting period affecting assets, liabilities, equity, net income or cash flows, that were unusual because of their nature, size or incidence.

#### 4. CHANGES IN ESTIMATES

If estimates were made within the scope of the interim reporting, they shall remain essentially unchanged in methodology within the fiscal year and in the fiscal year comparison.

In contrast to the method of approach at year-end, the income tax expense in each interim reporting period is recorded on the basis of the best estimate of the weighted average annual income tax rate expected for the entire fiscal year.

As a result of valuation allowances made to capitalized loss carry-forwards in the past, SUSS MicroTec AG is presently assuming an annual income tax rate in 2006 that will be considerably lower than the expected income tax rate of 37%.

Furthermore, there were no changes that have a material impact on the current interim reporting period.

## 5. DEBT AND EQUITY SECURITIES

No issuances, repurchases, and repayments of debt and equity securities were effected during the reporting period.

As of April 30, 2006 the amount of TEUR 3,622 was due for repayment from the issued convertible bonds.

► NOTES

## 6. DIVIDENDS PAID

No dividends were paid out or proposed for disbursement during the reporting period.

## 7. SUBSEQUENT EVENTS

There were no material events subsequent to the end of the interim reporting period.

## 8. CONTINGENT LIABILITIES AND CONTINGENT ASSETS

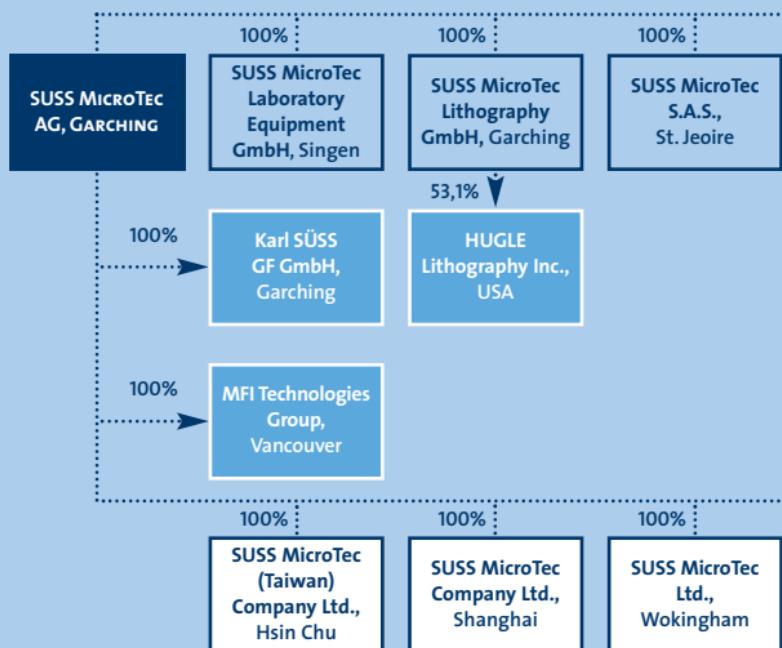

There are no contingent assets. There were no material changes in contingent liabilities since the last annual balance sheet date.

## 9. EARNINGS PER SHARE

The basic earnings per share are determined by dividing the net income for the period attributable to ordinary equity holders (after minority interests) by the weighted average number of shares, outstanding during the period.

To determine the diluted earnings per share, the profit for the period to be attributed to the shareholders (after minority interests), as well as the weighted average of the shares outstanding, must be adjusted for the effects of all potentially diluting shares.
