Revenues, Adjusted EBITDA and Free Cash Flow

Plastics & Devices

In EUR m	Q1 2025	Q1 2024	Change in %	
			Actual	Organic
Revenues ¹⁾	294.5	258.4	14.0	-3.3
Adjusted EBITDA	63.4	59.3	7.0	-11.4
Adjusted EBITDA margin in %	21.5	22.9	-140bps	-200bps

¹⁾ The revenues of the divisions include intercompany revenues.

Revenues in the Plastics & Devices Division in the first quarter of the financial year 2025 came to EUR 294.5m, up from EUR 258.4m in the same quarter in the prior year. The increase is primarily due to the first-time inclusion of the revenue contribution from Bormioli Pharma. Taking into account the revenue of Bormioli Pharma in the period from December 2023 to February 2024 and adjusted for foreign exchange rate effects, revenues decreased by 3.3% compared to the prior-year period. The foreign exchange rate effects resulted mainly from the change in the US dollar against the euro. The main reason for the organic revenue development was the time lag in the syringe business.

Adjusted EBITDA was 7.0% higher, or down by 11.4% an organic basis. The adjusted EBITDA margin decreased by 140 basis points from 22.9% to 21.5%. The decrease reflects a temporary changed product mix and delays in the syringe business.

Primary Packaging Glass

In EUR m	Q1 2025	Q1 2024	Change in %	
			Actual	Organic
Revenues ¹⁾	227.1	208.4	9.0	-10.2
Adjusted EBITDA	40.2	34.8	15.4	-5.8
Adjusted EBITDA margin in %	17.7	16.7	100bps	90bps

¹⁾ The revenues of the divisions include intercompany revenues.

The Primary Packaging Glass generated revenues of EUR 227.1m in the first quarter, up from EUR 208.4m in the same quarter in the prior year. The increase is primarily due to the first-time inclusion of the revenue contribution from Bormioli Pharma. Taking into account the revenue of Bormioli Pharma in the period from December 2023 to February 2024 and adjusted for foreign exchange rate effects, revenues were down by 10.2% year on year. The foreign exchange rate effects resulted mainly from the change in the US dollar against the euro. The organic decline in revenue was due to lower sales in the pharmaceutical and cosmetics business compared to the comparative prior-year period. Some of the reasons for the decline in revenue were, beside the overall softness in moulded glass cosmetics, the construction of a new furnace at the Lohr site (Germany), which began in the first quarter of 2025, and the fact that production at the Morganton (NC/USA) site has not yet fully resumed following Hurricane Helene.

Adjusted EBITDA increased by 15.4% year on year, or by down by 5.8% in organic terms. The adjusted EBITDA margin improved by 100 basis points to 17.7%, after 16.7% in the prior year's quarter. This increase is primarily due to an improved product mix and cost position.

The development projects for digital platforms for therapy support, wearable medication pumps for small- and large-molecule drugs, and the proprietary auto-injector platform, are continuing as planned.

Reconciliation of Adjusted EBITDA

In EUR m	Q1 2025	Q1 2024	Change in %	
			Actual	Organic
Plastics & Devices	63.4	59.3	7.0	-11.4
Primary Packaging Glass	40.2	34.8	15.4	-5.8

Free Cash Flow

In EUR m	Q1 2025	Q1 2024	Change
Cash flow from operating activities	-27.8	27.2	-55.0
Net capital expenditure before M&A activities	-113.3	-106.5	-6.8
Free cash flow before M&A activities	-141.1	-79.3	-61.8

Adjusted EBITDA in the first three months of the current financial year was higher than in the same period of the prior year. The decline in cash flow from operating activities to EUR -27.8m, compared to EUR 27.2m in the prior-year period is primarily due to the higher level of funds tied up in net working capital compared to the same period of the previous year.

Taking into account the above-mentioned effects and net investments, free cash flow before M&A activities amounted to EUR -141.1m as of February 28, 2025, compared to EUR -79.3m in the same period of the prior year.

Net capital expenditure includes payments from government grants in the amount of EUR 5.3m (3M 2024: EUR 7.3m).

Capital expenditure in the Plastics & Devices Division focused on the further expansion of syringe capacities in Germany, Mexico, and the Republic of North Macedonia, as well as the expansion of capacity for plastics products and medical systems in North America.

In the Primary Packaging Glass Division, capital expenditure mainly related to the construction of a new furnace at the Lohr site (Germany) and capacity expansions for injection vials in Morganton (NC/USA).

Amortization and impairment losses of fair value adjustments related in the first quarter 2024 to the subsequent measurement of intangible assets identified in connection with the acquisitions made in the period 2007 to 2018. At the start of the financial year 2025, Gerresheimer expanded the scope of depreciation, amortization and impairment losses of fair value adjustments to include depreciation, amortization and impairment losses related to the subsequent measurement of property, plant and equipment, in particular to properly reflect the significant effects of the purchase price allocation in connection with the acquisition of Bormioli Pharma. As a result, depreciation, amortization and impairment losses on fair value adjustments in the first quarter of 2025 result from subsequent measurement of intangible assets and property, plant and equipment. The new definition applies for the first time to subsequent measurement in connection with the acquisition of Bormioli Pharma.

Depreciation, amortization and impairment losses from subsequent measurement of property, plant and equipment from acquisitions made in the period 2007 to 2018 are not adjusted.

In the first quarter of the financial year 2025, fair value adjustments were exclusively subject to scheduled depreciation and amortization.

Net income in the first quarter of 2025 was negatively impacted by exceptional income and expenses including restructuring totaling EUR 9.5m (comparative prior-year period: EUR 2.6m). The change is mainly due to the one-off items in connection with the acquisition of Bormioli Pharma and new plant construction at our sites in the USA and in the Republic of North Macedonia.
