# 1. Group fundamentals

## 1.1 Business model of the Group

### 1.1.1 General information

As at the reporting date, Tele Columbus AG, headquartered in Berlin, had 54 directly or indirectly held operating subsidiaries, which are fully consolidated in the consolidated financial statements, as well as four other associates and two joint ventures, which are accounted for using the equity method in the consolidated financial statements.

Tele Columbus AG is the parent company of the Tele Columbus Group (hereinafter referred to as 'Tele Columbus' or the 'Group') and primarily operates as a holding company for the companies of Tele Columbus. As a result, the Company's financial performance in the separate financial statements is strongly influenced by the earnings of subsidiaries. This is reflected in the income from investments as well as income and expenses from profit and loss transfer agreements.

Tele Columbus is one of the leading German fibre optic network operators reaching more than three million households in Germany and a comparatively high proportion of FTTB-connected households. Under the PŸUR brand, the Company offers high-speed internet access as well as more than 250 TV channels on a digital entertainment platform which combines conventional television with video entertainment on demand. With its partners in the housing sector, the Group creates customised cooperation models and advanced value added digital network services such as telemetry and tenant portals. As partner for municipal and regional providers, Tele Columbus is a driving force in the expansion of fibre optic infrastructure and broadband networks in Germany. For its business customers, carrier services and corporate solutions are provided on its proprietary fibre optic networks. The Group's companies operate throughout Germany as cable operators, with an especially strong market position in the eastern part of the country. About 37% of Tele Columbus's holdings are distributed across the remainder of Germany Overall, the Group supplies nearly 8% of all German households through existing networks.

Tele Columbus offers its customers access to TV services, telephone (fixed network and mobile) and fast internet with bandwidths of up to 1 Gbit/s. The range of services covers servicing, maintenance, supply of the above products and services, customer care for connected customers and payment collection. In addition to the core business, services also include construction work relating to telephone and internet business as well as individual solutions for major customers.

### 1.1.2 Group structure

Tele Columbus AG operates as a group holding company and is the Group's ultimate management and holding company, and therefore responsible for control of the entire Group. Consequently, Tele Columbus AG is responsible for the Group's strategic growth and the provision of services and financing to its affiliated companies.

### **1.1.3 Company acquisitions and mergers**

During the financial year there were no significant changes in the consolidated entities.

### **1.1.4 Main market and core business**

Tele Columbus is one of the leading fibre optic network operators and has a strong regional market dominance in the following federal states: Berlin, Brandenburg, Saxony, Saxony-Anhalt and Thuringia.

The Group has its main sites in Berlin and Leipzig. Other locations include Hamburg, Chemnitz, Magdeburg, Ratingen, Unterföhring and Frankfurt (Oder).

Tele Columbus chiefly runs cable networks of network levels 3 and 4. Network level 3 – also known as NE3, Level 3 or L3 – is a cable network that conveys signals from regional distribution networks to the point of transfer outside the customer's residential unit. Network level 4 – also called NE4, Level 4 or L4 – is a cable network within a residential complex which distributes signals from the transfer point to the connection socket in the customer's residential unit. As an integrated network operator at both network levels, the Group is specialised in providing high-quality, integrated end user services from one source.

The Group purchases the required network services at locations where it has no access to its own networks.

As well as operating fibre optic networks, Tele Columbus also offers business-to-business (B2B) and construction services. B2B covers products for supplying bandwidth services and business customer connectivity to companies, products for supplying internet and telephone to business customers, as well as network monitoring and marketing of data centres. Construction services include setting up fibre optic municipal networks or connecting residential districts to its own backbone, as well as the upgrading or modernisation the coaxial and fibre optic infrastructure of residential buildings.

End customers of Tele Columbus are offered numerous services in the area of television and telecommunication – in particular a basic selection of cable television channels (CATV), premium TV packages (Premium TV), and internet and telephone services over a fixed network, as well as mobile voice and data services. Tele Columbus counted approximately 3.4 million connected residential units as at 31 December 2019. Of these, about 2.27 million households had purchased at least one of the products offered.

The Group generates its income mainly from connecting fees paid by end-customers for one of the CATV products. About 95% of end users are tenants in apartment blocks that are part of the portfolio held by companies or cooperatives in the housing sector or are administered by them. The Group has long-term licensing and signal supply agreements with these companies to ensure a sustainable revenue base. Usually the housing associations pass on the fee for provision of CATV connections to their tenants through a utility bill.

### **1.1.5 Operating segments**

Products and services of Tele Columbus are divided into the two operating segments: "TV" and "Internet and Telephony".

#### **"TV" segment**

Tele Columbus offers basic as well as premium programming in the "TV" segment. Basic programmes comprise analogue and digital TV and radio broadcasting. The premium programmes offered contain up to 75 further digital TV channels, of which as many as 40 are broadcast in HD quality. Furthermore, more than 250 TV channels and over 70 digital radio stations are offered on the digital entertainment platform.

In the TV segment, the Group generates revenue from cable connection fees and recurring charges for service options provided to cable customers as well as revenue from new contracts and related installation services. It also collects so-called feed-in tariffs from broadcasters for the distribution of various channels via the cable network. In doing so, Tele Columbus endeavours to implement a uniform feed-in model for all broadcasters.

#### **"Internet and Telephony" segment**

In the "Internet and Telephony" segment, the Group combines internet and telephone services. Revenue consists of proceeds from the conclusion of new contracts and installation services as well as monthly contract and service fees.

#### **"Other" segment**

"Other" includes business activities that are not directly allocated to the two reported segments. These include, in particular, B2B and construction services with sales revenue amounting to KEUR 85,400 (PY: KEUR 74,067). General administrative expenses and staff costs totalling KEUR 60,021 (PY: KEUR 65,039) are also attributable to this segment. The segment "Other" thus represents 17.1% (PY: 15.0%) of total revenue in 2019.

## **1.2 Objectives and strategies**

Tele Columbus AG follows a sustainable and profitable growth strategy. The targets set were achieved in the reporting period, as described in Section 2.2 ("Business performance"). Over the medium term, Tele Columbus AG expects revenue growth in the low to mid-single-digit percentage range, with EBITDA expected to grow disproportionately in the medium single-digit percentage range.

Combined management report  
as at 31 December 2019

The initiated steps in the previous year with regards to the consolidation and repositioning of the group in the strategic core areas (network, products, customer experience, housing industry, B2B as well as organization & culture) have proven to be consistently positive and trendsetting in the financial year. The focus on these measures will therefore be continued and further operationalized through a group-wide master plan.

The targets described are to be achieved by means of the following strategic measures:

- Continued and continuous expansion of cable networks and further development of the NE3/NE4 network infrastructure to a state-of-the-art fibre optic network. Tele Columbus plans extensive investments (CAPEX), also in future, to develop and upgrade its own infrastructure.
- Expansion of regional positioning as market leader in the area of high-speed internet access through a comprehensive local upgrade of the latest telecommunications standards (DOCSIS 3.1/FTTH)
- Increasing brand awareness and offering a differentiated range of products for new and existing B2C customers by means of a competitive product and campaign portfolio, which meets the individual requirements of our customers, stands out from the competition and successfully contributes to accelerating customer growth and revenue per customer.
- Special offers to existing cable TV customers for internet, telephone and premium TV to further increase the sale of additional higher-value services per TV customer (cross and upselling).
- AdvanceTV, the digital entertainment solution for the television of tomorrow, which is expected to increase the attractiveness of the product portfolio through continuous refinement
- Focus clearly on the customer by stabilising customer service and digitalising processes from the customer's perspective.
- Positioning as a permanent and innovative partner for the housing sector
- Development into a trendsetting provider for B2B solutions with a focus on the Tele Columbus network by continuously enhancing the product portfolio and providing new and existing commercial areas/customers with broadband.

We keep abreast of objectives and strategies by means of our management system and monitoring key performance indicators. In this regard, Tele Columbus assesses the success using a management system that is based on the following KPIs: Revenue, EBITDA and CAPEX.

### **1.3 Management system**

The group of companies is managed by the Management Board of Tele Columbus AG. It is in charge of operations and overseeing the reportable segments 'TV' and 'Internet and Telephony' described above. The Management Board receives and reviews internal management reports for the entire group and these segments. For the non-reportable segment 'Other', internal management reports are also submitted to the Management Board.

#### **Key financial and non-financial indicators**

Normalised EBITDA is the key performance indicator for the financial year 2019 that is reported separately for each operating segment. This performance indicator defined by Tele Columbus AG's management represents earnings before finance income/costs (share of profit of equity-accounted investees, interest income, interest expenses and other finance income/costs), income taxes, amortisation/depreciation and impairment losses on assets. It is also adjusted for 'non-recurring items' (one-off effects). These are defined by the Management Board as rare or extraordinary events that are not likely to recur in the following two financial years or have not occurred in the previous two financial years. An example of these are legal and advisory fees for strategic projects. In addition to the 'non-recurring items', expenses and income from certain transactions, which are not directly related to the provision of services, are also eliminated. This also includes gains and losses on the sale of property, plant and equipment. Any expenses and income associated with these events are deducted from Normalised EBITDA. The adjustment of EBITDA provides a performance indicator that reflects the actual financial performance of Tele Columbus AG which can also be used for sector and period comparisons.

Other than the Normalised EBITDA and, as described in the previous section, revenue, reported EBITDA and capital expenditures (CAPEX) represent main financial KPIs, that are used according to the figures determined under IFRS.

As of 2020, reported EBITDA, in addition to revenue and capital expenditure, shall serve as the main performance indicator. This takes account of the fact that the volume of non-recurring items is no longer considered to be significant in 2020 which makes a management according to a Normalised EBITDA no longer necessary.

Contractually-bound residential units represent a key non-financial performance indicator and are calculated according to internal definitions.

CAPEX and contractually-bound residential units are used as KPIs on the basis of Tele Columbus Group's business model only on group level.

#### **Other key financial and non-financial indicators**

Besides the aforementioned key financial and non-financial performance indicators, management uses additional indicators for managing individual operating activities:

Combined management report  
as at 31 December 2019

RGUs (revenue generating units)

RGUs (revenue generating units) are units that drive sales – i.e. all individual services purchased by a customer; each service subscribed (e.g. cable television, internet, telephone) is considered an RGU. The Management Board monitors the RGUs for each individual service of all segments – both for CATV and premium TV services as well as internet and telephony services.

ARPU (average revenue per user)

Average revenue per user (ARPU) is determined using two different methods:

- **Annual average ARPU** is the revenue from connection fees for the year (including rebates, credit notes and installation fees) divided by the monthly total number of end customers/RGUs during the year.
- **Quarterly average ARPU** is the total revenue generated from connection fees in the relevant quarter (including rebates, credit notes and installation fees) divided by the monthly total number of end customers (RGUs) during that quarter.

Share of residential units linked with the company's own signal supply and having feedback channel capability

This percentage represents the share of residential units that are linked to their own NE3/NE4-integrated networks equipped with feedback channel capability – in other words, those that allow the sale of telephone and internet services – compared with the overall number of connected households.

Other performance indicators include headcount (measured in full time equivalents - FTEs) and cash flow.

Another non-financial performance indicator is customer satisfaction. This is why Tele Columbus regularly measures the satisfaction of its customers with the Tele Columbus satisfaction index using NPS (net promoter score).

## 2. Economic and financial report

### 2.1 Macroeconomic and industry conditions

#### Consumption providing a boost to the German economy

The German economy's momentum slowed in 2019, even though real GDP rose for the tenth year in a row, by 0.6% in 2019. This is the longest growth phase in unified Germany's history. This means, after an increase of 1.5% in 2018 and 2.5% in 2017, growth has continued to lose steam. Especially the manufacturing industry, which represents a good one-fourth of the entire economy, experienced a sharp drop of 3.6%. This was due in particular to weak production in the automotive industry.

In the year under review, Germany's economy above all benefited from strong domestic demand. Adjusted for inflation, private consumption rose by 1.6% and government spending by 2.5%. The number of employed, based on the residency concept (defined as the number of people employed with place of residency in Germany) stood at 45.3 million in 2019 – roughly 400,000 (0.9%) more than in the previous year – thus reaching a new record high.<sup>1</sup>

#### Industry environment

##### Overview

Germany currently has about 35.2 million broadband connections. This is compared to the previous year an increase of 2.6%. After ADSL and VDSL, cable TV network is the second most important access technology in the German broadband market, with approximately 8.4 million connections used. Above-average growth of 3.7% was achieved in the cable TV network in 2019. Real fibre optic connections reported the strongest year-on-year growth from 1.1 million to 1.5 million shared connections.<sup>2</sup>

The existing cable TV networks, which were originally constructed only for transmission of broadcasting signals and consisted of coaxial cables, are increasingly being upgraded by cable TV providers by replacing these with fibre optic lines. The resulting hybrid fibre-coaxial (HFC – Hybrid Fiber Coax) networks are capable of carrying ever greater data volumes and keeping up with the demand for ever higher-performance broadband connections. DOCSIS 3.1 transmission technology already enables download speed of 1 Gbit/s.

---

<sup>2</sup> Source: VATM market study

## Competitors

The German cable market is divided into NE3 and NE4 network operators. Following numerous market consolidations, most of the regional NE3 networks are owned by the two large cable network operators, Vodafone and Unitymedia, which also provide their own NE4 holdings via these networks. Vodafone's acquisition of Unitymedia, announced in May 2018, was ultimately approved in July 2019, subject to conditions. Thus, the regional NE3 networks will largely be in the hand of the Vodafone Group in the future.

In competition with these suppliers, the traditional NE4 operators have also built up their own independent signal supply via network level NE3 in recent years, thus creating an integrated network infrastructure. The market was very fragmented for NE4 operators for historical reasons. However, NE4 network operators have consolidated in recent years.

Compared to its competitors, Tele Columbus has a strong market position in the eastern German federal states. In Berlin, around 45% of cable households were supplied by Tele Columbus in 2019, 67% in Brandenburg, 56% in Saxony, 40% in Thuringia, and 21% in Mecklenburg-Western Pomerania. We continue to have a market share of roughly 96% in Saxony-Anhalt. Thus, the total market share of Tele Columbus at cable households in these regions was around 53% in 2019. In selected east German regions, such as the major cities of Leipzig, Erfurt or Halle, Tele Columbus has a regional market leadership. In the south and in the west of Germany, the Group focuses on individual regions, especially in the federal states of Bavaria, North Rhine-Westphalia and Hesse. For example, Tele Columbus supplies many cable households in Munich and Nuremberg and so currently has a market share of 17% in Bavaria, 11% in Hesse and 12% in North Rhine-Westphalia.

The German cable market is still in a phase of consolidation. Tele Columbus therefore actively participates in this process and expects to be able to continue to benefit from consolidation within the industry also in future. With the purchase of the majority interest in ANTEC Servicepool GmbH in 2019, Tele Columbus actively participated in this consolidation also in 2019.

## Television

With 17.2 million cable TV households supplied, Germany is Europe's largest cable market<sup>3</sup>; the number of cable TV households supplied has decreased slightly since 2012. The second most important transmission route for TV services is satellite reception, which was used by almost 17.3 million households in the year under review.

There is still a shift in user behavior from linear TV to streaming services via internet services, which means that there is a continuously growing need for fast internet access.

---

<sup>3</sup> Digitalisation Report Video 2019

## **Internet and Telephony**

In addition to analogue and digital TV, the demand for internet and telephone services via cable is increasing. Currently, about 8.4 million households in Germany already use their cable connection for faster internet access.

The German internet market is characterised by both rising demand for higher bandwidth as well as a still very low share of real fibre optic connections.<sup>4</sup>

The fixed-line telephone sector has undergone a considerable decline in prices due to the increasing supply of flat-rate products in various communication services. The competition in the fixed-line segment has grown stronger due to the emergence of resellers, alternative operators, declining mobile phone charges (and replacement by mobile communications as a result), as well as alternative access technologies and providers of other services.

Tele Columbus was able to consolidate a market share of approx. 1.7% in the year under review.

## **Gigabit Initiative for Germany**

The 'Gigabit Initiative for Germany' is an initiative of the Network Alliance to roll out converged gigabit-ready networks by 2025, spearheaded by the Federal Ministry of Transport and Digital Infrastructure (Bundesministerium für Verkehr und digitale Infrastruktur – BMVI). To meet the needs of an advanced information society and to implement the transition to a gigabit society, nationwide coverage of all households with at least 50 Mbps is to be provided as an interim step. The European Commission even aims for a bandwidth of 100 Mbps for 50% of the EU's population by 2020. There are various government funding programmes in place in some parts of Germany for the upgrade of infrastructure. Tele Columbus will keep a vigilant eye on future technology.

---

<sup>4</sup> VATM market study

## 2.2 Business performance

The focus of Tele Columbus in financial year 2019 was on the continued stabilisation of internal processes.

After the Group managed to complete all integration projects in 2018, further measures were taken in 2019 to ensure continuous improvement and drive optimisation of systems and processes. The main focus in 2019 was on growth and marketing activities, which had positive effects on the relevant performance indicators. After a decline in revenue and Normalised EBITDA in 2018, these two key performance indicators again increased in 2019. Revenue increased by EUR 5.0 million (+1.0%) and the Normalised EBITDA increased by EUR 3.5 million (+1.5%) compared to 2018. The integration activities completed in 2018 are primarily manifest in the reduction in non-recurring expenses. These declined by EUR 21.1 million in 2019 (-45.5%) relative to 2018, with reported EBITDA increasing by EUR 24.6 million (+13.0%) over 2018 to EUR 214.2 million. As a result, both revenue and the earnings forecasts for 2019 were met.

The positive development was also manifest in the growth pattern across the quarters. Average Normalised EBITDA grew in each quarter by 2.7%.

At 30.3% of revenue, the investments made in 2019 are below the projected level of investments (approx. 32% of revenue). This slight deviation from the forecast is mainly due to the choice of investments being selected in line with their expected profitability.

Revenue growth compared to 2018 was the result of opposing effects in the various product groups:

TV business generated revenue of KEUR 253,487 in 2019 (PY: KEUR 267,285), representing 50.8% of total revenue in 2019 (PY 54.1%).

The "Internet and Telephony" segment generated revenue of KEUR 160,518 in 2019 (PY: KEUR 153,029), representing 32.1% of total revenue in 2019 (PY 30.9%).

Other revenue, which mainly consists of the B2B and construction business, also increased by KEUR 11,333 million (+15.3%).

Combined management report  
as at 31 December 2019

The number of residential units connected and equipped with feedback capability to NE3 increased over the prior year by approx. 52,000 to around 2,350,000 residential units. This share increased by approx. one percentage point to 70% of the total portfolio. The slight increase over the previous year is due to the consolidation of ANTEC Servicepool GmbH and, as stated in the forecast from the previous year, remains at a stable level. At the end of the reporting year, about 99% of the networks with feedback capability connected to the Group's own signal feed were equipped with hybrid fibre-coaxial infrastructure to the internet telecommunication standards DOCSIS 3.0 or DOCSIS 3.1. This enables the provision of transmission rates of up to one gigabit per second. The number of residential units connected to the Group's cable network was about 3.4 million at the end of 2019 and therefore increased over the prior year.

<b>Customer Base/ RGUs</b>	<b>2019</b>	<b>2018</b>
Customer base subscribers in million	2.27	2.29
RGUs in million	3.78	3.83
RGUs Internet and Telephony segment in million	1.02	1.01
RGUs TV segment in million	2.76	2.82
RGUs Cable TV in million	2.22	2.26
RGUs Premium TV in million	0.54	0.56
RGUs per customer	1.67	1.67

The customer base of Tele Columbus decreased slightly to 2.27 million subscribers compared to year-end 2018.

The sum of the revenue-generating units (RGUs) declined for all services in the reporting year by 0.06 million to 3.78 million (PY: 3.83 million, approx. +0.05 million due to the consolidation of ANTEC Servicepool GmbH). The decrease results mainly from the decline in conventional cable TV customers.

There were contrasting developments for the Internet and Telephony business in the year under review. An increase from 574,000 to 584,000 RGUs was achieved for internet services. By contrast, the telephony business declined slightly, recording a loss of 7,000 units to 432,000 RGUs.

The RGUs for cable TV declined despite the consolidation of ANTEC Servicepool GmbH by 0.04 million to 2.22 million RGUs. A loss of 13,000 units was also reported for Premium TV Services.

The average number of products (RGUs) per customer across all segments remain stable in financial year 2019 at 1.67.

<b>ARPU in EUR</b>	<b>2019</b>	<b>2018</b>
ARPU	18.05	17.73
ARPU TV (per TV end customer)	9.01	9.41
ARPU Internet and Telephony (per Internet RGU)	24.26	23.97

Combined management report  
as at 31 December 2019

The monthly average revenue per user (ARPU) – or "annual average ARPU" – from all services was EUR 18.05 in 2019 and thus 1.8% higher than in the previous year (EUR 17.73).

This trend was commensurate with Tele Columbus's strategic objective. The ARPU for bundled internet and telephone services rose to EUR 24.26 (PY: EUR 23.97). This is due to the various promotion activities involving price adjustments in 2019.

In contrast, the TV ARPU for the Group as at 31 December 2019 declined to EUR 9.01 from EUR 9.41 in the previous year. This development is due to the declining TV business in 2019.

## Performance

### 2.2.1 Income situation

The following table provides an overview of the Group's financial performance.

KEUR	2019	2018
Revenue	499,405	494,381
Own work capitalised	22,591	20,753
Other income	9,393	24,467
<b>Total operating income</b>	<b>531,389</b>	<b>539,601</b>
Cost of materials	-170,945	-181,505
Employee benefits	-77,736	-79,376
Other expenses	-68,528	-89,171
<b>EBITDA</b>	<b>214,180</b>	<b>189,549</b>
Non-recurring expenses (net)	25,274	46,401
<b>Normalised EBITDA</b>	<b>239,454</b>	<b>235,950</b>
<b>EBITDA</b>	<b>214,180</b>	<b>189,549</b>
Net finance income/costs	-66,764	-77,759
Depreciation and amortisation	-184,177	-283,003
Income tax	1,261	9,817
<b>Net loss</b>	<b>-35,501</b>	<b>-161,396</b>

Revenue for financial year 2019 slightly increased by 1.0% year-on-year to KEUR 499,405.

Revenue from the TV segment decreased by 5.2% to KEUR 253,487 (PY: KEUR 267,285). Revenue in the Internet and Telephony segment, by contrast, rose by 4.9% from KEUR 153,029 to KEUR 160,518. As in the previous year there was also an increase in revenues for construction work by KEUR 5,487 to KEUR 28,725.

Combined management report  
as at 31 December 2019

Own work capitalised increased in the financial year by 8.9% from KEUR 20,753 to KEUR 22,591. This increase is mainly attributable to higher capital expenditures in financial year 2019 throughout the Group.

Other income in the amount of KEUR 9,393 declined significantly by KEUR 15,074 year on year. This change is mainly due to significantly lower income from the reversal of provisions, reduced income from the sale of fixed assets, lower income from marketing subsidies and reduced other income.

Total operating revenue, defined as the sum of revenue, other income and own work capitalised, declined slightly in the reporting period by 1.5% to KEUR 531,389.

Compared with the previous year, the cost of materials declined by KEUR 10,560 to KEUR 170,945 in financial year 2019. This decline is attributable to multiple effects, including a significant decline in customer care. These costs were particularly high in the prior year (effect of KEUR -5,536) due to the migration and the associated high level of call centre activities, including quality enhancement measures. In the wake of the mandatory first-time application of IFRS 16 Leases, the cost of materials fell by KEUR 3,683.

Benefits for employees of the Tele Columbus Group declined by KEUR 1,640 to KEUR 77,736. The decrease is largely attributable to the restructuring measures carried out in the Group in the prior year and the associated severance payments.

Other expenses amounted to KEUR 68,528 in financial year 2019 (PY: KEUR 89,171). The significant reduction from KEUR 20,643 (-23.1%) mainly results from lower expenses for legal and consulting expenses, which declined by KEUR 7,355. Further significant effects are lower impairment losses on receivables and lower expenses for promotional activities, which, taken collectively, recorded a decrease of KEUR 5,289. A significant factor behind the decline in other expenses is the first-time adoption of IFRS 16 Leases (KEUR 4,561).

Combined management report  
as at 31 December 2019

EBITDA amounted to KEUR 214,180 in financial year 2019 due to the factors described above and significantly improved by KEUR 24,631 (13.0%) compared to the previous year.

Normalised EBITDA improved slightly by 1.5% year-on-year to KEUR 239,454.

Result in KEUR	2019	2018
<b>Normalised EBITDA</b>	<b>239,454</b>	<b>235,950</b>
Strategic projects and optimization measures (PY: restructuring and further integration measures)	-14,705	-30,295
Financial restructuring	-	-327
Other	-10,569	-15,778
<b>Non-recurring expenses (-) (net)</b>	<b>-25,274</b>	<b>-46,401</b>
<b>EBITDA</b>	<b>214,180</b>	<b>189,549</b>

Strategic projects and optimization measures (PY: restructuring and further integration measures) in financial year 2019 amounted to KEUR 14,705 (PY: KEUR 30,295). These mainly include legal and consulting expenses of KEUR 8,307 (PY: KEUR 17,843), wages and salaries, premiums and bonuses associated with restructuring of KEUR 2,699 (PY: KEUR 5,246).

**Strategic projects and optimisation measures**  
(PY: restructuring and further integration measures)  
in KEUR

Income statement item	2019	2018
<b>Income statement item</b>	<b>-14,705</b>	<b>-30,295</b>
Other income	-	3,268
Cost of materials	-1,791	-5,559
Employee benefits	-2,699	-5,246
Other expenses	-10,215	-22,758

Other non-recurring items in the amount of KEUR 10,569 (PY: KEUR 15,778) mainly comprise legal and advisory fees of KEUR 6,948. In addition, it also includes costs for customer communication totalling KEUR 1,082 for the project related to the analogue switch-off as part of the transition to the solely digital transmission of TV signals.

**Other in KEUR**

Income statement item	2019	2018
<b>Income statement item</b>	<b>-10,569</b>	<b>-15,778</b>
Other income	59	421
Cost of materials	-1,846	-4,538
Other expenses	-8,782	-11,661

Combined management report  
as at 31 December 2019

In the reporting period, the operating margin, defined as the ratio of Normalised EBITDA to revenue, increased to 47.9% (PY: 47.7%).

Negative interest result improved over the prior-year period by KEUR 12,862 to KEUR 62,485. This essentially includes interest payable to third parties in the amount of KEUR 59,683, which fell significantly by KEUR 13,311 compared to the previous year. This is largely attributable to the refinancing and financing measures concluded in the prior year (75m term loan and the senior secured notes). In 2018, transaction costs (KEUR 18,338), which had previously been deferred, were recognised as an expense in the course of the (partial) repayment of Facility A and Capex Facility.

Other finance costs amounted in reporting year to KEUR 4,112 (PY: KEUR 2,407). Other finance result includes a negative adjustment in value of embedded derivatives of KEUR 5,122.

Amortisation, depreciation and write-downs declined significantly to KEUR 184,177 (PY: KEUR 283,003). In the previous year, this figure included, as a one off-effect, an impairment loss on goodwill of KEUR 124,209. An opposing effect is attributable to the first-time application of IFRS 16 Leases, as the first-time application resulted in increased depreciation of KEUR 8,266 compared to the previous year.

In financial year 2019, income taxes resulted in an income of KEUR 1,261 (PY: KEUR 9,817). Current income tax expenses increased by KEUR 6,617 to KEUR 7,992, while deferred tax income decreased by KEUR 1,938 to KEUR 9,254 (PY: deferred tax income of KEUR 11,192).

Financial year 2019 closed with a net loss of KEUR 35,501 (PY: KEUR 161,396).

## 2.2.2 Earnings by segment

Operating activities are divided into two segments. In addition to these reporting segments, there is another segment that contains other business activities and certain cost items.

The following table provides an overview of the sales revenue of the reporting segments in the financial years 2019 and 2018:

<b>Revenue by segment in KEUR</b>	<b>2019</b>	<b>2018</b>
Revenue TV segment	253,487	267,285
Revenue Internet and Telephony segment	160,518	153,029
<b>Total revenue (exkl. segment „Other“)</b>	<b>414,005</b>	<b>420,314</b>

Revenue from the TV segment decreased by 5.2% compared to the previous year to KEUR 253,487, which is mainly due to a decline in the cable TV RGU by approx. 59,000. Revenue in the Internet and Telephony segment increased by 4.9% year-on-year to KEUR 160,518. Compared to financial year 2018, the internet RGUs were increased by approx. 10,000. The further increase is due to higher transmission fees.

<b>Normalised expenses of segments in KEUR</b>	<b>2019</b>	<b>2018</b>
<b>Cost of materials</b>		
TV segment	-94,818	-100,773
Internet und Telephony segment	-24,229	-25,293
<b>Employee benefits</b>		
TV segment	-22,571	-22,109
Internet und Telephony segment	-20,612	-17,991
<b>Other expenses</b>		
TV segment	-11,492	-12,684
Internet und Telephony segment	-9,814	-10,916

Combined management report  
as at 31 December 2019

The normalised expenses decreased year on year.

<b>Result in KEUR</b>	<b>2019</b>	<b>2018</b>
<b>Normalised EBITDA</b>		
TV segment	139,989	149,672
Internet und Telephony segment	116,337	111,810
<b>Non-recurring expenses (-)/income (+)</b>		
TV segment	-7	-1506
Internet und Telephony segment	-47	30
<b>EBITDA</b>		
TV segment	139,981	148,165
Internet und Telephony segment	116,290	111,840

For a reconciliation of specific earnings figures to total earnings, please refer to the notes to the consolidated financial statements, section F.6 "Segment reporting".

## 2.2.3 Financial situation and cash flows

### **Cash flows**

In 2019, the Group was able to meet its payment obligations at all times. Management reviews the Group's liquidity position at least monthly and initiates measures, should it become necessary, to forestall liquidity shortages in due time. The financial resources required for investments in network expansion, the acquisition of additional companies, and sales and marketing of the new telephone and internet services were financed from operating activities, funded from cash and partial use of an existing credit line. Interest on loans and borrowings was covered through cash.

The Tele Columbus entities are currently funded mainly through a long-term loan and the senior secured notes of Tele Columbus AG issued in May 2018. Further, Tele Columbus AG secured further financing in October 2018 in the amount of KEUR 75,000 with a term to maturity until 2023 and still has the revolving credit line of KEUR 50,000 available. This was partially utilised as at 31 December 2019.

The aggregated cash flows of the Tele Columbus Group for financial years 2019 and 2018 are as follows:

<b>in KEUR</b>	<b>2019</b>	<b>2018</b>
Cash Flow from operating activities	209,396	159,618
Cash Flow from investing activities	-155,395	-144,073
Cash Flow from financing activities	-70,139	-23,004
<b>Net decrease in cash and cash equivalents</b>	<b>-16,138</b>	<b>-7,459</b>
Cash and cash equivalents at the beginning of the reporting period	26,288	31,767
<b>Cash and cash equivalents at the end of the reporting period</b>	<b>10,149</b>	<b>24,307</b>
plus release of restricted cash and cash equivalents	-20	1,982
<b>Free cash and cash equivalents at the end of the reporting period</b>	<b>10,128</b>	<b>26,288</b>

### *Cash flows from operating activities*

In the financial year ended 31 December 2019, net cash flows from operating activities amounted to KEUR 209,396 and were far above the prior year's level. The increase is mainly due to the mandatory first-time application of IFRS 16 leases and due to the positive working capital change. In contrast, there was an increase in trade payables and other liabilities of KEUR 45,289.

Income taxes paid increased by KEUR 4,872 to KEUR 8,920 (PY: KEUR 4,048).

Combined management report  
as at 31 December 2019

*Cash flows from investing activities*

The cash flows from investing activities amounting to KEUR -155,395 (PY: KEUR -144,073) mainly result from investments in property, plant and equipment and intangible assets. The investments were, compared to previous year, on a stable level (2019: KEUR 149,833; PY: KEUR 148.875).

The main focus of these investments is the rigorous pursuit of our corporate strategy: besides replacing third party signal suppliers with Tele Columbus's own signal feed for current subscribers, as well as expanding the existing HFC networks for marketing high speed IP services to satisfy the increasing demand for fast internet connections, the focus was on implementing uniform system and technology platforms group-wide. Furthermore, investments were made across Germany with regard to existing expansion commitments to housing corporations in the course of new acquisitions or renewals of contracts. In financial year 2019, the Group invested a total of KEUR 126,344 (PY: KEUR 135,111) in technical equipment and construction in progress.

Furthermore, in 2019, Tele Columbus AG acquired the majority stake of 76.0% in AN-TEC Servicepool GmbH, Hanover. The purchase price (KEUR 7,422) less cash acquired (KEUR 706) increases the cash flow from investing activities compared to the previous year by KEUR 6,716.

The liabilities incurred until the balance sheet date of 31 December 2019, which will result in cash outflows of about KEUR 86,320 in subsequent reporting periods (PY: KEUR 87,826), will be financed from existing cash balances and cash flows from operating activities.

*Cash flows from financing activities*

Net cash used in financing activities of KEUR -70,139 (PY: KEUR -23,004) consists in particular of interest payments (KEUR -54,381; PY: KEUR -53,001) and repayment of leasing liabilities (KEUR -23,247; PY: KEUR -14,379). The opposite effect is essentially the partial use of the revolving facility in the amount of KEUR 13,299. For the forthcoming financial year, the Tele Columbus Group expects cash outflows for the repayment of lease liabilities currently amounting to KEUR 25,927. Assuming that no additional lease agreements are concluded, future annual repayment obligations will be reduced to a range between KEUR 19,000 and KEUR 20,000 in the following two years. For 2020, the Group currently assumes a cash-effective interest charge (excluding interest from leasing agreements) of approximately KEUR 51,000 and the repayment of current loans of KEUR 1,000.

The financing structure of the Tele Columbus Group has a 93.8% long-term nature.

The revolving facility in the amount of KEUR 50,000 according to the senior facilities agreement was partially utilised as at the reporting date.

The ownership interests in subsidiaries have been pledged as collateral for the Group's entire financing.

Combined management report  
as at 31 December 2019

## 2.2.4 Asset situation

### Balance Sheet items

KEUR	31 December 2019	31 December 2018
Non-current assets	1,953,520	1,904,921
Current assets	104,908	120,859
<b>Total Assets</b>	<b>2,058,428</b>	<b>2,025,780</b>
Equity	318,579	354,668
Non-current liabilities	1,566,920	1,512,666
Current liabilities	172,929	158,447
<b>Total Liabilities</b>	<b>2,058,428</b>	<b>2,025,780</b>

Compared to 31 December 2018, total assets have increased by KEUR 32,648 to KEUR 2,058,428. The increase is mainly due to the first-time adoption of IFRS 16 Leases and is visible on both the assets side of the balance sheet through the recognition of right-of-use assets and on the liabilities side through the recognition of corresponding lease liabilities. The opposing effect on the asset side is the decline in cash and cash equivalents and a reduction in VAT receivables, whereas a decrease in equity represents the opposing effect on the liabilities side.

Property, plant and equipment rose by KEUR 29,726 to KEUR 669,166 compared to 31 December 2018. This is mainly due to the mandatory first-time adoption of IFRS 16 Leases and the related capitalisation of right-of-use assets. An offsetting effect resulted from the rise in depreciation of property, plant and equipment of KEUR 15,570.

As of December, 31 2019 intangible assets increased by KEUR 15,205, from KEUR 1,258,734 to KEUR 1,273,939. This is mainly due to the first-time adoption of IFRS 16 Leases and to goodwill recognised as a result of the acquisition of ANTEC Servicepool GmbH and the customer base acquired. An offsetting effect also resulted from the rise in amortisation, adjusted for the impairment loss on goodwill recorded in the prior year, of KEUR 9,813.

The decline in inventories to KEUR 5,586 is due to the consolidation of warehouses and the strategic decision to minimise inventories while at the same time securing supply capacities.

The decline in other current assets by KEUR 2,224 to KEUR 17,197 is due exclusively to the decrease in VAT receivables. Other current assets primarily consist of advance payments and other assets.

As at 31 December 2019, the Group's consolidated equity amounted to KEUR 318,579 (PY: KEUR 354,668). This decline is mainly due to the net loss incurred in the financial year of KEUR 35,501.

## Combined management report as at 31 December 2019

Non-current liabilities to banks and from the bond issuance increased by KEUR 1,400,814 to KEUR 1,404,430. The interest rate adjustments associated with the facility and the senior secured notes had a significant influence on this minor increase.

The Group's liabilities due to interest-bearing loans and senior secured notes totalled KEUR 1,432,175 as at 31 December 2019 (PY: KEUR 1,415,873). This corresponds to 69.6% (PY: 69.9%) of total assets.

At the balance sheet date other non-current financial liabilities amounted to KEUR 106,984 (PY: KEUR 57,974). As at 31 December 2019 and at 31 December 2018, this item largely comprised non-current lease liabilities for the use of infrastructure facilities. The increase is mainly due to the first-time adoption of IFRS 16 Leases.

Deferred tax liabilities of KEUR 27,544 were reported as at 31 December 2019 (PY: KEUR 33,249). These mainly decreased due to amortisation of the customer base.

Current liabilities to banks amounted to KEUR 27,745 (PY: KEUR 15,059). The increase results mainly from the utilisation of the revolving facility.

Current trade payables decreased by 0.7% to KEUR 75,878.

In line with the rise in non-current financial liabilities, the increase in current other financial liabilities was caused by the first-time adoption of IFRS 16 Leases.

### **2.2.5 Overall evaluation**

The financial position, financial performance and cash flows reflect the Group's position in 2019. Tele Columbus has sufficient liquidity and has long-term financing in place. After a year of declining EBITDA, significant growth in earnings was recorded for the first time in 2019. Overall, 2019 was a year of stabilisation in which the Group pushed ahead with the optimisation of internal processes and structures and laid the foundations for further positive business development.

### **3. Tele Columbus AG – Summary according to German GAAP [HGB]**

In addition to group reporting, we report separately on the performance of the parent company, Tele Columbus AG, in the following paragraphs.

Tele Columbus AG prepares financial statements in accordance with the German Commercial Code [HGB] and the German Stock Corporation Act [AktG].

Tele Columbus AG primarily operates as a holding company for the Tele Columbus Group companies and as such is dependent on the economic position as well as business performance of its subsidiaries. Financial performance is dependent, apart from finance costs, largely on income from investments, particularly expenses and income from profit and loss transfer agreements.

#### Analysis of the annual financial statements

The revenue of KEUR 81,437 reported by Tele Columbus AG for financial year 2019 (2018: KEUR 87,522) mainly results from income from services and sales revenue to affiliated companies. The decline is mainly attributable to a decrease in income from services within the group.

The operating expenses refer mainly to the Company's management and financing function. Earnings depends largely on general administrative expenses, other operating income and finance income/costs.

Other operating income of KEUR 49,580 was significantly below the previous year's level (KEUR 52,897). The main reason for this is a decline in income from the reversal of provisions to KEUR 273 (2018: KEUR 4,251).

The cost of materials includes expenses for modems and receivers which were sold on by Tele Columbus AG to group entities. The rise is mainly due to the fact that Tele Columbus AG undertook the purchase of modems and receivers for the entire Group for the whole year, whereas in the previous year some group companies were still responsible for the purchase for a few months. Moreover, services received as part of sales projects are presented under cost of materials in financial year 2019.

Compared to the previous year, personnel expenses declined by KEUR 839 to KEUR 5,256. The decrease is attributable to the lower number of employees.

Amortisation, depreciation and write downs increased from KEUR 12,261 to KEUR 15,372, which is due to increasingly more purchases of IT software.

Other operating expenses decreased by KEUR 24,377 to KEUR 115,711 which results mainly from reduced expenses for legal and consulting services as well as for ancillary cost.

Combined management report  
as at 31 December 2019

Compared to the prior year, net finance result increased from KEUR -33,826 to KEUR -36,324 and, in line with the previous year, mainly comprise income from non-current loans extended to the subsidiaries PrimaCom and pepcom, interest expenses and income from cash pooling arrangements and interest expenses relating to external financing. The increase is mainly due to increased interest expenses in connection with external financing.

Income from profit transfers arose in the amount of KEUR 31,313 compared to KEUR 45,859 last year. The increase in expenses arising from loss absorption from KEUR 107 to KEUR 37,142 is mainly due to the negative annual result of the pepcom GmbH, which is characterised by expenses from mergers in the amount of KEUR 53,679.

Tele Columbus AG closed the financial year with a loss of KEUR 77,196. The loss will be carried forward to the following year.

Total assets rose slightly to KEUR 2,473,249 compared to 31 December 2018 (KEUR 2,332,295).

Under assets, the increase resulted mainly from higher intangible assets and receivables from affiliated companies, while under liabilities it was mainly due to increased liabilities to affiliated companies.

The increase in intangible assets from KEUR 38,722 to KEUR 50,454 was caused mainly by investments relating to new software solutions.

At KEUR 1,867,147, financial assets have remained largely unchanged compared to the previous year; the increase of KEUR 17,255 results largely from deferred interest receivables on loans to affiliated companies.

Receivables from affiliated companies of KEUR 506,791 arise from the cash pool receivables, receivables due to services and recharging as well as receivables from profit transfer.

Cash and cash equivalents declined from KEUR 4,682 to KEUR 2,942.

Tele Columbus AG's equity amounted to KEUR 436,479 as at 31 December 2019. The year-on-year decline results exclusively from the net loss of the fiscal year. The equity ratio is 17.6% (PY: 22.0%).

Other provisions increased by KEUR 2,021 to KEUR 30,638. This rise is mainly due to increased provisions for outstanding invoices.

The increase in liabilities to banks in the amount of KEUR 13,317 to KEUR 805,357 essentially results from the use of a current account credit.

Liabilities to affiliated companies increased year-on-year by KEUR 203,690 to KEUR 526,584. This was mainly caused by an increase in cash pool liabilities and higher liabilities from profit transfer agreements.

The financial position of Tele Columbus AG is dependent upon the financing requirements of group entities and the Company's own borrowing to refinance these requirements. Corporate actions carried out during the financial and previous year for the purpose of debt financing successfully stabilised the Company's financial position.

## 4. Subsequent events

The Supervisory Board has appointed Dr. Daniel Ritz as Chief Executive Officer (CEO) and member of the Management Board with effect from February 1, 2020. Timm Degenhardt has resigned from his position as CEO with effect from January 31, 2020, but remains a member of the Board of Management until March 31, 2020.

On 30th January 2020 the World Health Organisation declared the spread of the new coronavirus 'Covid-19' as a "health emergency of international proportions". This pandemic has a considerable impact on the situation and development of the global economy and business in Germany. We therefore classify this as an event of particular significance after the balance sheet date. We refer to the statements in the risk report and the forecast in the management report.

## 5. Forecast

### Slump in growth in Germany driven by industry

After growth in economic output in Germany fell below expectations in 2019, the Kiel Institute for the World Economy (IfW) expects growth to accelerate to 1.1% in 2020 due to a large number of working days. Particularly in the first half of the year, the IfW still anticipates appreciable negative effects from the industrial recession.

Considering the continued spread of the coronavirus, the IfW updated its economic forecasts in March 2020 and expressed concerns that the epidemic could have a significant negative impact on economic growth in Germany. Depending on the scenario, GDP is expected to decline between 4.5% and 8.7% in 2020. However, the IfW expects little or no losses for the information and telecommunications industry.<sup>5</sup>

---

<sup>5</sup> <https://www.ifw-kiel.de/de/publikationen/medieninformationen/2020/update-konjunkturbericht-deutsches-bip-duerfte-2020-zwischen-45-und-9-prozent-einbrechen/>

## **Industry forecast**

In the opinion of Tele Columbus, the broadband market remains on course for success. The Company's view is based on industry developments over the past few years, the German Federal Government's focus on achieving broadband targets and associated initiatives, as well as the expectations of German and European competitors expressed in their respective public announcements. In advanced societies, digitalisation is the main driver of progress, growth and social interaction. The demand for high bandwidths is already significantly higher today and will increase greatly in the future. Applications such as ultra-HD television or virtual reality, and the Internet of Things in general, will further drive up bandwidth requirements.

According to the industry association ANGA, the German cable network operators are technically well equipped for the increasing demand. More and more frequently, consumers demand connection speeds of more than 50 Mbps to 400 Mbps. In addition, cable network operators are further expanding the DOCSIS 3.1 telecommunications standard, which will provide large sections of the population with gigabit speeds.

Germany still lags far behind in the development of a high-performance broadband network compared to other European countries, with many rural areas still being undersupplied. The German Federal Broadband Support Programme (Breitband) is however creating increased local initiatives that will ensure broadband penetration through targeted expansion of the fibre optic network.

Management is aware of regulatory issues and potential amendments to the German Telecommunications Act [TKG] and has taken these into account in planning.

## **Expected development of the Group and KPIs**

Tele Columbus AG uses annual, medium and long-term planning as well as intra-year forecast models. The planning approach is standardised and based on the top-down method, using the strategic assumptions of management. Final approval for annual planning is provided by the Management and the Supervisory Board. Annual planning for financial year 2020 was presented to the supervisory board in December 2019 and approved by these committees. The forecast period described below covers one year and is supplemented by medium-term forecasts. Based on the planning principles, a focused management of the group according to B2C and B2B will be sought from 2020.

At the same time, the core broadband business is to be continued with high investments in network infrastructure. The increasing penetration of existing internet and telephone services and the resulting improvement in the product portfolio to include a higher proportion of high-margin products as well as the additional earnings contributions from the network use of third parties are expected to have a positive impact on revenue and earnings growth.

Combined management report  
as at 31 December 2019

Driven by a continued slight decline in customer numbers, a minor drop in revenue in the TV business is also expected in 2020. In the Internet and Telephony business, however, the customer growth that began in the second half of 2019 is expected to continue in 2020 and lead to a slight rise in revenue. As in recent years, the B2B business – which recently recorded above-average growth rates – is expected to continue to contribute to growth. Compared to 2019, a significant decline in construction revenue is anticipated, which is attributable to the upcoming completion of the infrastructure project in Plön, which have only an insignificant impact on the overall profitability of the B2B business.

The board of the Tele Columbus AG expects steady development of the number of contractually-bound residential units. The share of connected residential units, supplied via the Company's own NE3 network, is expected to continue to rise slightly. This will reduce signal procurement charges due to the lack of dependence on third-party suppliers and thereby have a positive effect on the trend in earnings and margins. The Group will provide more households with feedback capability, i.e. render them marketable for internet and telephone services. Based on the figure at the end of financial year 2019 of 70% (PY: 69%), this percentage is expected to remain stable until the end of financial year 2020.

Tele Columbus continues to expand its hybrid fibre optic networks in accordance with demand and is basing this on the most up-to-date internet transmission standard DOCSIS 3.1. In 2019 the network in Berlin was upgraded to DOCSIS 3.1, giving approx. 1 million residents access to a gigabit connection. Internet connections based on the transmission standard DOCSIS 3.0 can achieve high speeds of up to 400 Mbps. All innovative media applications – from digital and high-definition television to high-speed internet and telephone, telemetry services, tenant portals and interactive services – can be made available via broadband cable. Tele Columbus not only transmits signals, it also actively works on expanding the range of programmes and developing additional services via its own product platform. As a carrier, Tele Columbus provides high performance connections and networks for business customers via its B2B and beyond.

Revenue of EUR 465 - 475 million is expected for financial year 2020 as a whole, as well as reported EBITDA of EUR 225 - 230 million. The sharp rise in reported EBITDA is driven by an improvement in operational profitability and the renewed significant decline in non-recurring expenses. Over the medium term, revenue is expected to grow in the low to mid-single-digit percentage range, while normalised EBITDA is expected to grow in the mid-single-digit percentage range.

The merger and further expansion of networks requires strong project-based investments, which are nevertheless expected to be at a lower level in 2020 than in the prior year. The Group expects investments of EUR 140 - 150 million in financial year 2020. Over the medium term, the investment-to-revenue ratio is expected to decline slightly.

The forecast on the relevant KPIs of Tele Columbus is subject to uncertainties, as it is currently not possible to precisely estimate the duration and effects from the spread of the corona virus. On one hand, the partial closure of the Group's own shops and sales outlets will reduce the number of new contracts through these channels. On the other hand, we are currently seeing a shift in sales volume to online channels and a lower number of contract terminations by our existing customers.

## **6. Risk report**

### **6.1 Risk management system**

#### **Basic classification**

For Tele Columbus, the early identification, analysis and management of potential risks is an elementary part of the Company's strategy, resulting from the recognition that, if the principles of a functioning risk management system are consistently applied, the possibility of recognising and exploiting opportunities also arises. In order to identify risks and opportunities at an early stage and to handle them consistently, Tele Columbus employs a risk management system that also includes an early detection system as provided under Section 91 (2) of the German Stock Corporation Act [AktG]. The risk management system governs the identification, recording, assessment, documentation and reporting of risks. This keeps the overall risk exposure always within tolerable limits. There are currently no identifiable significant risks to the Company's success.

The basic design of the risk management system follows the internationally recognised COSO Enterprise Risk Management Framework (COSO: Committee of Sponsoring Organizations of the Treadway Commission) as applicable until 2017. In this context, Tele Columbus pursues a comprehensive, integrative approach that combines the risk management system, internal control system and compliance management system into a single management approach (governance, risk and compliance approach). The structure of the risk management system and internal control system in accordance with the COSO Enterprise Risk Management Framework ensures that control and monitoring activities are aligned with the Company's objectives and their inherent risks.

The internal control system includes all the rules and measures, principles and procedures that have been established in order to achieve the Company's objectives. In particular, it is intended to ensure the security and efficiency of the business process, the effectiveness, efficiency and regularity of accounting and compliance with relevant legal requirements as well as reliability of financial reporting.

Further presentations on the internal control system and compliance management system are provided in the corporate governance statement pursuant to Section 289a HGB, contained in the Corporate Governance Report and can be downloaded from Tele Columbus AG's website at [www.telecolumbus.com/investor-relations](http://www.telecolumbus.com/investor-relations) under 'Corporate Governance Statement'.

The Management Board is responsible for risk management, compliance management and the internal control system. The Supervisory Board and the Audit Committee monitor their effectiveness.

### **Structure of risk management**

The risk management system consists of identification, recording, evaluation, documentation and reporting rules that are implemented uniformly throughout the Group.

The objective of risk management is the systematic recording and evaluation and thus the conscious and controlled handling of risks and opportunities within the Company. It is to enable Tele Columbus AG to recognise unfavourable developments at an early stage to take countermeasures in a timely manner and be able to monitor them. A well-designed and properly implemented risk management system enables the management and the supervisory bodies to obtain sufficient assurance about the Company's achievement of targets. The risk management of Tele Columbus thus focuses on those activities that significantly influence future earnings and are of importance to the future prospects of Tele Columbus.

Risks are systemised in the risk management system according to the following procedure:

- Risk identification: risks are recorded twice a year as part of the risk cycle.
- Assessment of the identified risks in terms of potential damage and probability of occurrence using the gross/net method
- Risk management and control: identification of early warning indicators and thresholds, determination of countermeasures and establishment of risk communication for risks subject to ongoing and ad hoc reporting
- Risk monitoring/risk projection to ensure implementation of the measures as well as the systematic recording and reporting of risks that could affect the Company's ability to continue as a going concern
- Risk reporting, which is subdivided into standard reporting within the regular risk reporting cycle and ad hoc reporting in the event of sudden risks with a material effect on the Company's assets, liabilities, financial position and financial performance.
- Documentation of the risk management system to ensure sustainable functioning independent of specific individuals

The recorded risks are catalogued and reported at Tele Columbus Group according to the following risk categories:

- Industry-specific risks
- Legal and regulatory changes
- Operational risks
- Brand, communication and reputation
- Legal proceedings, antitrust and consumer protection procedures
- Financial risks
- Compliance risks
- Project risks
- Sustainability risks

### **Status of risk management**

In 2019, risks were managed centrally for the entire Group.

In the coming years, other central measures to improve risk management will include, in particular, expansion of the risk inventory, with increased involvement of personnel, compliance and project and sustainability risks, as well as the associated creation of greater granularity within the identified risks. Moreover, the description of measures and controls for the mitigation of identified risks is to be further refined, and the monitoring of implementation of measures defined for risk mitigation to be further improved. This is to be based on the requirements for risk management systems of publicly traded companies. The continuous updating and further development of risk management represents an ongoing, high-priority task for management.

The objective of risk management is a high level of integration of the governance components risk management, internal control system and compliance management, which has been supplemented by supportive auditing activities of Internal Audit since mid-2018.

## **6.2 Key features of the accounting-related internal control and risk management system**

The overall objective of the accounting-related internal control and risk management system is to ensure the regularity of financial reporting, in the sense of ensuring that consolidated financial statements and the group management report comply with all relevant regulations.

As described in Section 6.1, the ERM approach is based on the 'Enterprise Risk Management - Integrated Framework' (as applicable until the end of 2017), developed by COSO, which is accepted worldwide. Since one of the objectives of this framework is to ensure the reliability of financial reporting, it is also drawn up from a financial reporting perspective. Identified risks and gaps discovered in the control system are eliminated by implementing and monitoring new controls.

Combined management report  
as at 31 December 2019

The Management Board of Tele Columbus AG assumes responsibility for the creation and effective maintenance of appropriate controls of financial reporting, and at the end of each financial year assesses the adequacy and effectiveness of the control system.

Uniform group-wide accounting policies and the chart of accounts, both of which are provided by the Finance department and are consistently applied by all group companies, form the conceptual framework for preparation of the consolidated financial statements. New laws, financial reporting standards and other official pronouncements are continuously analysed with a view to their relevance and impact on the consolidated financial statements and consolidated management report. If necessary, the accounting policies and chart of accounts are adjusted accordingly. The conceptual and deadline requirements as well as monitoring compliance therewith are intended to reduce the risk that Tele Columbus is not able to prepare and publish the consolidated financial statements in a proper manner and by the required deadlines.

The data used for preparing the consolidated financial statements is based on the financial information reported by Tele Columbus and its subsidiaries in their financial statements, which in turn are based on the accounting entries of the companies. Tele Columbus provides services to individual subsidiaries for the preparation of financial statements, the general ledger, accounts receivable, accounts payable, asset accounting, and payroll accounting. In addition, for some areas that require specialised knowledge, such as the valuation of pension obligations or share-based compensation, we are supported by external service providers.

The consolidated financial statements are prepared in the consolidation system based on the information reported in the financial statements. The consolidation procedures as well as the monitoring of compliance with the conceptual and deadline requirements are carried out by employees having commensurate responsibilities in the consolidation departments at the various levels as well as at corporate level.

The steps required to prepare the consolidated financial statements are subject to manual and system-based controls at all levels. During this process, the financial statement information supplied is checked automatically to ensure correlation within the financial reporting system as well as consistency.

The employees involved in the financial reporting process are recruited with a view to their professional aptitude and regularly trained thereafter. The 'principle of dual control' is applied as a basic standard at all levels. In addition, financial statement information must pass through certain approval processes at every level. Other control mechanisms include target/actual comparisons as well as analyses of content and changes in individual items in the financial statement information reported by group entities and in the consolidated financial statements.

Combined management report  
as at 31 December 2019

Access permissions are configured in IT systems related to financial reporting, so as to ensure that financial reporting data is protected against unauthorised access, use, and alteration. Each entity included in the consolidated financial statements must comply with the policies issued centrally on information security. This is to ensure that the users of such IT systems only have access to the information and systems they need in order to carry out their tasks.

The Supervisory Board is also involved in the control system through the Audit Committee. In particular, the Audit Committee monitors the financial reporting process, the effectiveness of the control system, the risk management system and the audit of financial statements. In addition, it is responsible for examining the documents for the separate financial statements of Tele Columbus AG and for the consolidated financial statements, and for discussing the separate financial statements of Tele Columbus AG, the consolidated financial statements and the management reports on these financial statements with the Management Board and the auditor.

### 6.3 Risks

The risks described in the context of risk reporting are summarised below and are presented in accordance with the above-mentioned risk categories. In principle, all material risks are relevant that could occur now or in the next two years.

The risks described above could either on their own or together with other risks and uncertainties of which the Tele Columbus Group is currently unaware or which it may currently consider insignificant, materially affect the Group's financial position, financial performance and cash flows.

Stronger differentiation of the risks in the risk categories was introduced in 2019 from previously three to four categories:

- Risk category A: critical risks that urgently require action, as these are risks to the Company's success or could affect the Company's ability to continue as a going concern. These risks are avoided or transferred to third parties (red).
- Risk category B: high risks requiring action. They are reviewed regularly and rigorously managed (orange).
- Risk category C: latent risks that may require action. These risks are selectively managed (yellow).
- Risk category D: risks currently requiring little action. These risks are selectively managed (green).

The risks identified within the Company are classified using the following matrix, based on the probability of occurrence and level of damage of the net risk identified, i.e. by taking into account appropriate countermeasures.

**Overview total number of risks - net risks**

		5	0	1	0	1
Likelihood of occurrence	81-100%	4	0	0	3	0
	61-80%	4	14	6	1	0
	41-60%	6	24	10	0	0
	21-40%	7	8	6	0	0
	<20%					
		< 100 KEUR very low	101-999 KEUR low	1,000-3,499 KEUR medium	3,500-6,999 KEUR very high	> 7,000 KEUR critical
		Level of damage				

The Group reported a total of 251 individual risks, which were consolidated into 100 risks and assessed at that level.

Based on these risk classifications, the effects of all risks described in the following section fall within risk categories A, B, C and D according to the net evaluations of these risks, i.e. by taking into account appropriate countermeasures. One risk is currently rated as being critical. Moreover, the majority of risks have a low to medium probability of occurrence.

The order in which the risk factors are presented is neither a statement on the probability of occurrence nor on the significance and magnitude of the risks, nor on the extent to which the Group's business could be impaired. The risks described may arise individually or cumulatively.

The aforementioned risks refer equally to the "TV" and "Internet and Telephony" segments due to the technical connection between the segments, based on the shared usage of a network. The risk categories are also applied to the segment "Other".

## **6.4 Industry-specific risks**

### **Strong competition**

Tele Columbus is exposed to considerable risks in terms of the competitive situation on the German cable market due to the merger between Vodafone and Unitymedia in July 2019. Since this merger was approved subject only to minor conditions, Tele Columbus perceives a long-term threat in that this monopoly could result in a lasting competitive disadvantage. Especially the monopoly's considerable market power in content, sales and purchasing, as well as the possibility of cross-subsidisation, could sustainably weaken the market position of Tele Columbus. Following the merger, Vodafone would gain a very strong position particularly on the German market and would thereby potentially be in a position to influence the pricing structure for network expansion, but also with regard to channels/ broadcasters. (critical risk)

Moreover, Tele Columbus is exposed to considerable competitive pressure in the cable and telecommunications market. New market players, such as regional and local providers of infrastructure networks, are increasingly crowding onto the market, which is resulting in rising supplier prices. The announced growth targets might not be achieved if the number of customer cancellations cannot be (more than) compensated by the acquisition of new customers. In this regard, Tele Columbus is also dependent on innovations and on enhancing existing products and services or introducing new ones. (high risk)

### **Strategic expansion of the fibre optic network**

Wide-scale and high-cost investments, along with the necessary cost-cutting in terms of our investments, mean there is the risk that our fibre optic network cannot expand as fast as the market develops with new technology. This is linked to customer dissatisfaction and revenue losses. In addition, there is the competition's market power and thus associated investment potential. (high risk)

### **Changing customer behaviour**

Another factor is continuous change in customer behaviour. Conventional TV products are increasingly being replaced by streaming services. This increases the demand for additional network capacities. At the same time, the demand for linear TV is declining. Tele Columbus mitigates this change by marketing attractive on-demand products (Advance TV Box) and the expansion of faster networks. (latent risk)

### **Falling prices/revenue**

The Group is exposed to significant price pressures in all business areas, as regional markets are partly saturated and new customer acquisition is only possible in these markets by targeting the customers of direct competitors. The industry is subject to rapid technological change, and the density of competition in the markets is increasing as a result of further technological developments, which has put prices under pressure in recent years for traditional offers such as fixed-line telephony and internet access (latent risk). Moreover, the terms for feed-in charges must be renegotiated with channels/broadcasters again and again. Billing-relevant parameters changing over time may also affect feed-in charges. (latent risk)

## **6.5 Legal and regulatory changes**

Tele Columbus is exposed to general risks arising from changes in the regulatory environment due to changes in legislation or other regulations. Such regulations concern, in particular, the German Telecommunications Act [Telekommunikationsgesetz], the media laws of federal states, as well as general labour, consumer or tax law. Given that the Company's business activity is limited to Germany, any changes in the legal environment are not expected to be sudden, so that a sufficient response time is ensured.

### **Data protection**

Along with the ever greater digitalisation of society, the issue of data protection is also gaining importance. Legislators have recognised there is a special need for protection and adopted the EU General Data Protection Regulation, which has been in effect since 28 May 2018. In view of the very high penalties for violation laid down therein, companies are exposed to significant intrinsic risk in principle. Yet, existing data protection laws also contain some uncertainty. There is so far no long-standing and uniform decisional law. The option, since 2016, for consumer protection agencies of issuing warnings or initiating injunctions has increased this risk. (latent risk)

## **Regulatory decisions**

The telecommunications market is a regulated market in which the German Federal Network Agency [BNetzA] intervenes strongly. Individual regulatory decisions may have the effect of slowing down business. Among other things, declining termination charges for fixed-line connections could lead to declining sales. There is general uncertainty as regards future regulatory decisions. In addition, government subsidies and other regulations could favour competitors and adversely affect our own competitive position. (latent risk)

## **"Must carry" obligations**

In addition, Tele Columbus is subject to "must carry" obligations regarding the provision and transmission of prescribed broadcasts, which in principle necessitates resource planning. Furthermore, end customer contracts are subject to monitoring by consumer protection organisations. (latent risk)

## **6.6 Operational risks**

### **IT risks**

While its business operations, Tele Columbus uses IT systems extensively, which could be disrupted or interrupted due to outside influences (environmental, building work, etc.) or updates in operation not yet carried out.

In addition, there is increasing risk from IT-related crime (data theft, blackmail, CEO fraud, etc.). More and more companies find themselves exposed to these risks and must take appropriate countermeasures. Tele Columbus limits these risks by using the latest firewall and antivirus programmes, continuous monitoring and maintenance of the IT landscape, use of a standalone network, and through the immediate backup and reproducibility of data relevant to operations. Raising awareness among employees of the issue further reduces the risk. (latent risk)

### **Customer satisfaction**

For Tele Columbus's customer-oriented business, customer satisfaction is a fundamental benchmark for the services it provides. Good customer service is particularly important in this context. As Tele Columbus has arrangements with various service providers in customer service, there is always the risk that these service providers will not perform the agreed services as expected, it loses a large service provider or the costs for this service skyrocket. This presents the risk that customers will cancel their contracts because of unsatisfactory service or potential customers select another provider. To counteract this, we have adopted comprehensive measures to achieve a high level of customer satisfaction. (latent risk)

## **Personnel risks**

To realise their strategic and operational objectives, the Tele Columbus AG Group companies depend on qualified specialists and senior staff. Regarding the recruitment and retention of qualified employees, the Group must measure itself against market competitiveness. The continuous updating and further development of the HR strategy represents an ongoing, high-priority task for management. (latent risk)

## **6.7 Legal proceedings, antitrust and consumer protection procedures**

### **Current litigation**

Tele Columbus Group is currently involved in one still ongoing significant legal dispute. It relates to a suit brought by Medienanstalt Berlin-Brandenburg (MABB) in respect of our feed-in model (risk in excess of >EUR 1 million). It is currently not possible to predict Tele Columbus Group's prospects of success with absolute certainty. (latent risk)

### **General litigation risk**

The Tele Columbus Group is also exposed to risks which could arise from court proceedings or arbitration proceedings with authorities, competitors and other parties. This especially applies to disputes relating to claims brought by sales agents and consumer protection claims. The legal department of Tele Columbus has the skills needed to assess and respond appropriately to such risks. For judicial disputes external law firms are also consulted. (latent risk)

## **6.8 Financial risks**

In the course of its business activities, Tele Columbus AG is exposed to various risks of a financial nature, in particular liquidity and interest rate risks.

The risk management of Tele Columbus is designed to identify potential risks and to mitigate their negative impact on the Group's financial performance. To this end, Tele Columbus uses financial instruments such as interest rate hedging transactions, factoring of receivables, and credit lines.

Financial risk management is mainly handled by the treasury department. Financial risks are identified, assessed and hedged in consultation with the responsible operating units. Tele Columbus AG is subject to written rules for certain areas such as interest rate risks, credit risks, the use of derivatives and other financial instruments, and the use of excess liquidity, which is largely governed by its facility agreements. Reporting to the Management Board occurs at regular intervals.

## **Liquidity risk**

Tele Columbus operates in a market where size and sustainable investments are necessary. This means there is a considerable need for capital and liquidity. The current financial funds available to Tele Columbus are limited and enable investments to a limited extent only. Therefore, the Management Board perceives a risk in that the financial reserves available are not sufficient in order to make all the necessary investments enabling sustainable customer growth and, thus, organic growth (high risk). In the medium term, at the level of each operating subsidiary and of the Group as a whole, current business transactions mirror the budget data. Liquidity projections for a specific planning horizon and credit lines available within the Group and partially utilised as at 31 December 2019 are designed to ensure a continuous supply of liquidity. As part of ensuring the liquidity of subsidiaries, the existing cash pooling procedure has been extended to all companies of the Group.

The Management Board is regularly and comprehensively informed on the current levels of liquidity through reports. (latent risk)

In addition, the Group is reliant on borrowed capital at reasonable terms for refinancing its operating activities or acquisitions. As part of the financing agreement, various requirements had to be fulfilled as at the reporting date. In the event of default, the lenders had the option to call in the loans. These are obligations under a financing agreement of the Group (facilities agreement). The related financial covenants include a statement on the Group's total debt/equity ratio as well as a defined EBITDA amount and presentation of gross assets, which are reviewed on a quarterly basis. As at the reporting date, the liquidity risk in the event of non-compliance with these covenants amounted to KEUR 1,459,555.

Furthermore, the Group was not in a position to dispose over all financial resources as at the end of the year (restricted cash 2019 in the amount of KEUR 1,016). (latent risk)

## **Interest rate risk**

Non-current, floating rate financial instruments, for which the interest rate is linked to a market interest rate such as EURIBOR, are exposed to risks arising from future cash flows. Market interest rates are monitored in order to take the necessary measures should the need arise to hedge or control interest.

To limit risks, Tele Columbus uses two interest rate caps (interest capped at 0.75% versus 3-month EURIBOR) acquired in February 2016, at a nominal value of KEUR 550,000 each and a term until December 2020. A significant increase in the EURIBOR thus only leads to a much more limited increase in interest expenditure for Tele Columbus AG. (latent risk)

## **Risks related to the financing structure**

The level of debt has increased compared to 2018. The Group's main financing runs until 2024 and 2025, respectively, thereby securing its financing structure in the long term.

Tele Columbus actively uses derivative financial instruments and is thus only exposed to limited risk arising from fluctuations in interest rates and the resulting cash flows. Therefore, a significant rise in the EURIBOR would only partially lead to a significant increase in the interest paid by Tele Columbus. As a result, movements in interest rates were subjected to close monitoring in order to respond appropriately in the event of a change in risk exposure. The existing hedging gap was closed by purchasing appropriate interest rate caps through the newly established hedging system. (minor risk)

### **Tax risks**

The Group is exposed to tax risks because of tax audits that may lead to back payments.

In connection with the spin-off by which the Company acquired the operational business of Tele Columbus Beteiligungs GmbH (formerly Tele Columbus GmbH), it could become exposed to tax risks from current tax audits.

Due to the potential tax risk, taxation of Tele Columbus Beteiligungs GmbH is expected, for which the Group has recognised provisions (presented under "Other provisions") due to continuing liability. (minor risk, as already taken into account in the financial statements)

## **6.9 Compliance risks**

### **Compliance in general**

A company's corporate culture is determined by management and shaped as well as implemented by its employees. Tele Columbus Group has implemented a compliance management system to ensure that their conduct is in compliance with rules and regulations. Apart from generally applicable policies, such as a code of conduct and guidelines, this also includes regular events, training as well as advice and a whistleblowing system. The Compliance Officer and his team are supported by the Compliance Committee and local contact persons.

Although there have not been any serious compliance violations so far and preventive measures are in place to mitigate these, some risk of potential violation of rules and policies remains. (minor risk)

## **6.10 Risks regarding Tele Columbus AG**

Besides the corporate risks, the following risks which directly affect Tele Columbus AG in addition to the above-mentioned risks, are itemised.

Tele Columbus AG extended two shareholder loans to refinance legacy liabilities in the amount of KEUR 344,899 and KEUR 185,772, respectively to its subsidiaries.

Servicing of the shareholder loans (recognised as bullet loans in accordance with German commercial law) and therefore their value depends on the liquidity of the benefi-

ciary societies. As they run until the beginning of 2023, this may expose Tele Columbus AG to liquidity risk if the loans are not repaid in time.

Furthermore, Tele Columbus AG has issued letters of comfort to various subsidiaries to ensure their ability to continue operations. This may also expose Tele Columbus AG to liquidity risk.

## **6.11 Risks related to Covid-19**

The current Covid-19 pandemic has a significant impact on the situation and development of the global economy and in particular on the economy in Germany.

Legal regulations to contain the pandemic are leading to drastic restrictions on public life and the functionality of companies, e.g. by closing down businesses, contact and exit restrictions or special hygiene regulations. Many companies have to close, order short-time work or send their employees to home offices. Supply chains are also slowing down or failing completely.

Tele Columbus, as a system critical telecommunications company, is aware of its responsibility and constantly monitors current developments and has established close risk and measures management system. An emergency team was created that interacts by phone several times a day. Weekly KPI-tracking, workstreams in critical areas and a daily reporting to the management complete these emergency measures.

Currently, Tele Columbus is only affected by the effects of the pandemic to a manageable extent. For example, all PYUR shops throughout Germany had to close temporarily. In some cases, however, the shops may reopen due to special permits. Potential risks may also arise from the planned legislation to protect citizens. The German government is currently planning to grant citizens and microentrepreneurs who have fallen into economic difficulties due to the pandemic the option to defer permanent current obligations (including telephone and internet contracts) until June 30, 2020.

Without direct compensation for the companies, this could lead to delays in recovering claims or total default of the receivable and revenues. If these are serious due to volume or duration of the deferral, this could lead to the Group's financial difficulties through no fault of its own. Currently, this risk cannot be assessed in monetary terms due to the lack of experience.

On the other hand, as a telecommunications company, we also see positive effects. Due to the current situation (short-time work, home office, etc.), the need for internet, telephone and television is increasing. We are therefore tending towards fewer terminations and more new contracts. Housing industries are also reconsidering terminations and are partially withdrawing them.

Overall, the current risk situation is difficult to assess due to a lack of experience and ignorance about the duration of the pandemic. As a fiber-optic company, we see ourselves in a stable industry and currently consider the risk situation to be manageable.

## **7. Opportunities**

### **7.1 Opportunity management**

The opportunity management of Tele Columbus is currently being developed into an in-house management system. The objective is to recognise opportunities as early as possible, to weigh them against possible risks, and to exploit them in consideration of suitable measures. Opportunities are seized and managed as part of regular evaluations. Opportunities are managed locally by the competent departments.

The order in which opportunities are presented is not a statement of the probability of their occurrence or significance.

### **7.2 Opportunities**

#### **Transformation of the Company**

The restructuring of the Group with the involvement of a strategic investor at the Company's networks offers the opportunity to push network expansion further, which can heavily leverage the fast-moving market and repay a portion of the external financing. (major opportunity)

However, both opening the networks of the Tele Columbus Group (wholesale) as well as using the networks of third parties offer Tele Columbus the opportunity to generate stronger growth and tap new market potential. (major opportunity)

Corporate consolidation (merger of individual subsidiaries), which began in 2019, provides Tele Columbus with an opportunity to streamline processes, simplify corporate management and thereby cut costs. (major opportunity)

### **Strategic expansion of the fibre optic network**

Germany lags far behind other industrialized countries in terms of providing available bandwidth. The German government's coalition agreement stipulates pushing extensive expansion of gigabit networks by 2025 and developing a specifically designated Federal Broadband Support Programme for broadband expansion. As part of funding projects, Tele Columbus will work more closely with cities and municipalities. Tele Columbus is using this opportunity to further increase its participation in the expansion of fibre optic networks. Tele Columbus can gain a competitive edge over the competition especially in rural areas.

Strategic expansion of our fibre optic network can provide the Tele Columbus Group with a considerable competitive edge (especially in the internet business) in terms of available bandwidths. The use of fibre optic technology means there will be less disruptions, so that customer satisfaction will go up, the number of calls received by call centres will go down and costs will decrease. An appropriate communications strategy can generate considerable media interest and attention, which benefit sales strategies and thereby help drive revenue. (major opportunity)

However, the further rollout of the DOCSIS 3.1. data transmission standard is enabling speeds of up to one gigabit – i.e. 1000 Mbit – per second. This affords Tele Columbus an opportunity to offer much higher speeds on the market and stand out from DSL providers. (latent opportunity)

### **5G expansion**

Licences for launching the new 5G mobile phone generation were auctioned in 2019 and construction of the necessary mobile masts has begun. In order to transport huge data volumes at highest speed, mobile communication systems must be connected to fibre optic networks. Direct connection of mobile stations to fibre optic networks will further increase in importance in the case of the 5th generation of mobile telephony. Apart from expansion of the mobile infrastructure, fibre optic networks will also have to be further expanded because without connection of the mobile stations to the fibre optic network, the many advantages of the new technology can be used only to a limited extent. Tele Columbus sees great growth opportunities in this development. As an operator of an already multi-faceted network and because of increasing expansion, Tele Columbus provides the necessary infrastructure for 5G operators. (latent opportunity)

## **Digitalisation**

The increase in digitalisation has had a significant economic as well as social and technological impact. The simultaneous use of different media, for example television and internet, has by now become a part of everyday life for many users. The demand for compatible cables and connections and for high flexibility has risen accordingly. As part of the digital transition, the reallocation of channels creates additional capacities for new bandwidth products. (latent opportunity)

Furthermore, the digitalisation of internal processes and systems at Tele Columbus is streamlining and accelerating individual activities. This offers the opportunity to position ourselves as an innovative and high-performing partner vis-à-vis customers and staff. (latent opportunity).

## **Raising the regional profile**

A stronger focus of sales structures on regional markets provides another opportunity, which will increase the adoption of PŸUR by local housing corporations and among business and private customers. Regions that have already been developed will be analysed more thoroughly in future for possible connection of additional households. This will be supported through increased cooperation on the part of the various network providers. This will increase coverage and make additional regions accessible. Overall, these measures have great potential of gaining additional customers. (latent opportunity)

## **Further opportunities**

Tele Columbus is continuously optimising internal processes and structures. The main focus are Tele Columbus's customers. A major goal is to create a positive customer experience and treat customers as equal partners. This is only possible when understanding the customers' needs. Tele Columbus therefore regularly rates customer feedback by means of a net promoter score (NPS) and uses this as a control instrument for offering customers higher quality service.

Providing positive services to customers ultimately also depends on the happiness of Tele Columbus's own employees. The TC Group has initiated various measures for attractively designing the PŸUR brand not only for customers, but also for current as well as future employees. These measures include optimising our processes, improved and broader customer perception, implementing a value management system, promoting work/life balance, attractive offices, the use of social media, etc. These measures boost employer attractiveness and employee satisfaction. This provides an opportunity to position ourselves as an attractive employer on the labour market and win and retain competent employees. (latent opportunity)

### **7.3 Overall conclusion on risks and opportunities from the perspective of Group Management**

Expansion of the fibre optic network currently represents the greatest opportunities for Tele Columbus, but also the greatest risk.

Our course into the gigabit age can no longer be averted. Although experts almost unanimously consider fibre optics networks the future, Germany is not in a good position by international standards. This offers excellent opportunities, especially for cable network providers, to upgrade their existing networks and to actively participate in fibre optics expansion. But expansion is expensive and therefore must be carefully planned. The Tele Columbus Group is seeking to actively shape this growth using the financial resources at its disposal. Tele Columbus is very aware of the intrinsic opportunities and risks and manages these with the greatest of attention.

We are very critical of the merger of Unitymedia and Vodafone, as we view such a major merger as having significant influence on the German telecommunications market. Numerous industry associations from the housing sector, network operators and media companies, along with Deutsche Telekom, other competitors as well as Tele Columbus, are also highly critical of the merger. Vodafone can obtain even greater market leverage on the MDU market after the acquisition of Unitymedia and also in respect of TV stations, which could lead to considerable cost increases and disadvantages for customers as well as for Tele Columbus and other cable network operators. Even if Tele Columbus Group intensively prepares for the impact of the merger, it is able to influence the effects to a limited extent only.

Tele Columbus possesses effective monitoring systems for dealing with risks early on and consistently. In our opinion, there are no discernible risks for the forecast years that individually – or in combination with other risks – could have a material or lasting adverse effect on the Company's assets and liabilities, financial position and financial performance. The risks identified are not such that they could affect the Company's ability to continue as a going concern, also in the future. Therefore, as at the date this report was prepared, the Management Board still considers the overall risk exposure as limited and manageable. We still consider the majority of the issues presented in the last annual report as low risk.

Based on the monitoring system described, Tele Columbus AG has taken the necessary precautions to counteract developments that could affect its ability to continue as a going concern. In the view of the Management Board of Tele Columbus AG, the Group's ability to continue as a going concern was not at risk at any time. Furthermore, as at the reporting date, the Management Board was not aware of any risks that could affect the Company's ability to continue as a going concern or have a lasting adverse effect on its assets, liabilities, financial position and financial performance and thereby create such a going concern risk. The Management Board considers the overall risk position as controllable and is confident that it will be able to use the opportunities and challenges presenting themselves also in future without having to take unacceptably high risks.

## **8. Corporate governance statement pursuant to Section 289f and Section 315d of the German Commercial Code [HGB]**

The corporate governance statement pursuant to Section 289f and Section 315d HGB can be downloaded from Tele Columbus AG's website at <https://www.telecolumbus.com/investor-relations/> under 'Corporate Governance Statement'.

## **9. Non-financial group report**

Tele Columbus AG's separate non-financial report pursuant to Sections 315b and 315c in conjunction with 289c to 289e HGB will be available after publication in the management report on the Tele Columbus AG website at <https://www.telecolumbus.com/investor-relations/> under 'Publications' ('Financial statements and quarterly releases').

## **10. Information on potential takeover offers**

### **Presentation and composition of share capital**

As at the reporting date, Tele Columbus AG's share capital amounted to KEUR 127,556. It consists of 127,556,251 no-par value bearer shares at a share capital value of EUR 1.00 each, with full profit-sharing rights from 1 January 2015. The share capital of Tele Columbus AG is fully paid. There are no different classes of shares. All shares are subject to the same rights and obligations, each arising in particular from Sections 12, 53a, 186 and 188 et seqq. of the German Stock Corporation Act [AktG]. A right of shareholders to securitise their shares is excluded pursuant to Article 4(3) of the Articles of Association. Each share grants one vote at the annual general meeting. The profit shares of shareholders are determined by their shares in the Company's share capital (Section 60 AktG).

### **Restrictions on voting rights or on the transfer of shares**

Restrictions on the voting rights of shares may arise in particular from the provisions of the German Stock Corporation Act [AktG]. Under certain conditions, shareholders are, for example, subject to a voting prohibition in accordance with Section 136 AktG when voting on their own discharge, the assertion of claims against it or the waiving of claims.

The shares are registered shares. There are no transfer restrictions.

### **Direct or indirect shareholdings exceeding 10% of the voting rights**

Under the German Securities Trading Act [WpHG], investors whose share of direct and indirect voting rights in listed companies has reached, failed to reach, or exceeded certain thresholds are obliged to notify the Company.

As at the reporting date, the following companies and individuals reported to Tele Columbus AG that they had exceeded the voting rights threshold of 10%:

- United Internet Investments Holding AG & Co. KG: 29.70%  
This interest is attributed to the following companies and individuals: United Internet AG, Montabaur; Ralph Dommermuth GmbH & Co. KG Beteiligungsgesellschaft, Montabaur; Ralph Dommermuth Verwaltungs GmbH, Montabaur; Ralph Dommermuth, Montabaur.
  
- Rocket Internet SE: 12.29%  
Company's registered office: Berlin, Germany.

### **Shares with special rights that confer powers of control**

There are no shares with special rights conferring powers of control.

### **Appointment and dismissal of members of the Management Board and Supervisory Board / amendments to the Articles of Association**

Management board members are appointed or dismissed in accordance with the provisions of Sections 84 and 85 AktG. Pursuant thereto, members of the Management Board are appointed by the Supervisory Board for a maximum of five years. Pursuant to Article 6(1) of the Company's Articles of Association, the Management Board consists of at least two members. The Supervisory Board determines the number of management board members. It may appoint a Chairman and a Deputy Chairman of the Management Board in accordance with Section 84 of the German Stock Corporation Act [AktG] and Article 6(3) of the Articles of Association.

The members of the Supervisory Board are elected at the annual general meeting by a simple majority of votes for a maximum period of five years. At the annual general meeting, shareholders may decide on shorter-term appointments for individual members they elect, or for the Supervisory Board as a whole. Reappointment or renewal of appointment for a maximum of five years is permissible. Supervisory Board members can be removed by a simple majority of votes.

## Combined management report as at 31 December 2019

Pursuant to Section 179 (1) sentence 1 AktG, the Articles of Association are amended by shareholder resolution at the annual general meeting. Resolutions at the annual general meeting on amendments to the Articles of Association shall be passed by a simple majority of the votes cast and by a simple majority of the share capital represented at the time of the resolution, in accordance with Article 23 of the Articles of Association of the Company in conjunction with Section 179 (2) sentence 2 AktG unless otherwise prescribed by law. No use was made in the Articles of Association of the option of requiring a majority higher than a simple majority also in other cases.

Pursuant to Article 10(4) of the Articles of Association, the Supervisory Board has the right to make amendments to the Articles of Association that involve only the wording.

### **Powers of the Management Board, in particular regarding issuing or repurchasing shares**

#### **Authorised capital**

Pursuant to a shareholder resolution at the annual general meeting on 15 May 2015, the Management Board is authorised, with the approval of the Supervisory Board, to increase the Company's share capital by issuing new no-par value registered shares against cash or non-cash contributions on one or more occasions, by a maximum of EUR 1,925,693 (Authorised Capital 2015/I). This corresponds to approximately 1.5% of the current share capital. This authorisation applies from 15 September 2015 until 14 May 2020.

#### **Conditional capital**

According to a shareholder resolution taken at the annual general meeting on 15 May 2015, the Company's share capital can be increased by a maximum of EUR 28,345,833 by issuing up to 28,345,833 new no-par value registered shares, contingent on the registered shares (Contingent Capital 2015/I). This authorisation expires on 14 May 2020 (midnight). The Management and the Supervisory Board are authorised until 14 May 2020 to issue convertible bonds, warrant-linked bonds and similar instruments which may be converted into shares of the Company. These shares would then be issued from the contingent capital. At present, this authorisation has not been exercised.

### **Significant agreements of the Company conditional on a change of control in the event of a takeover bid and the related implications**

Combined management report  
as at 31 December 2019

On 2 January 2015, Tele Columbus AG and some of its subsidiaries entered into a financing agreement with BNP Paribas, among others, as agent and security trustee. The credit agreement has been amended several times since. This financing agreement provides, among other things, for the granting of a term loan of KEUR 707,463 (Facility A; after a voluntary redemption payment of KEUR 597,537), a further term loan of KEUR 75,000 (Facility 75M) and a revolving working capital facility in the amount of KEUR 50,000. In the event of a change of control, the agreement provides for an individual right of termination by the lenders. A change of control occurs when a person, or persons acting in concert, (a) acquire(s) (directly or indirectly) more than 30% of the ordinary shares of the Company, (b) can exercise or control more than 30% of the voting rights present at an annual general meeting, and/or (c) acquire(s) the necessary powers to appoint or dismiss the majority of the members of the Supervisory Board of the Company elected by the shareholders. Termination results in an immediate claim to repayment on the part of the lenders. Their obligation to participate in future drawdowns under the loans (except in the case of rollover drawdowns) ceases to apply.

**Agreements concluded between the Company and members of the Management Board or employees governing compensation in the event of a takeover bid**

If a shareholder holds more than 30% of the voting rights, the Management Board members have the right to terminate their service contracts within six months of the change of control. In the event of such termination, the members of the Management Board shall be paid the compensation they are owed under their service contract until the end of the term, a maximum of two years' compensation, paid as a one-off severance payment. Calculation of the severance payment is based on the total compensation for the past financial year and where appropriate also on the expected overall compensation for the current financial year.

## **11. Compensation report**

### **11.1 Compensation of the Management Board**

#### **11.1.1 Management Board compensation system**

The Supervisory Board determines appropriate compensation for the individual members of the Management Board. The appropriateness of compensation is determined according to the duties and services rendered as well as the Company's position. The total compensation may not exceed the usual compensation without good cause and is regularly reviewed through peer group comparison. The compensation structure is geared towards sustainable corporate development.

Members of the Management Board in 2019 financial year were Timm Degenhardt (CEO) and Eike Walters (CFO). The compensation of Management Board members considers the size of Tele Columbus AG, its economic and financial position, its success and future prospects, the customary amount and structure of management compensation at comparable companies and the internal salary structure. The Supervisory Board has also considered the relationship between Management Board compensation and the compensation of senior managers and the workforce as a whole, and how it has developed over time. Further criteria are the individual duties and services rendered by members of the Management Board. The structure and appropriateness of compensation of the Management Board is reviewed regularly by the Supervisory Board.

The total compensation of the members of the Management Board consists of three fundamental components: the basic compensation plus fringe benefits, a short-term performance-linked compensation component relating to the financial year, and a long-term variable compensation component. In addition, the members of the Management Board participate in the matching stock programme (MSP). In determining the variable compensation, care was taken to create incentives for sustainable and long-term corporate development. Both positive and negative developments were also considered.

#### **11.1.2 Basic compensation**

Members of the Management Board receive an annual fixed basic compensation, which is paid in twelve equal monthly instalments regardless of performance at the end of the month and represents the fixed compensation component.

In addition to this, the Management Board members have a contractual entitlement to fringe benefits and non-cash benefits, which primarily include the use of a company car or compensation for such a car and the payment of premiums for accident and health insurance. These costs were assessed according to tax regulations.

### **11.1.3 Short-term variable compensation component**

The Management Board members are entitled to a short-term performance-based compensation component in the form of an annual bonus. This component is paid within one month following adoption of the Company's consolidated financial statements for the relevant financial year by the Supervisory Board. The maximum amount of the variable compensation component for a financial year is 75% of the fixed annual salary of the CEO and 66.25% of the CFO's, depending on the individual target achievement of the Management Board member concerned. The individual target achievement essentially relates to the following parameters: adjusted EBITDA, CAPEX, customer loyalty, revenue and cash flow. In addition, there is a discretionary component provided by the Supervisory Board. Target achievement is based on a weighting of the assessment bases of 30% for adjusted EBITDA, 20% for revenue, 15% for CAPEX and free cash flow, and 10% for customer loyalty and the discretionary component. The target values for the financial assessment bases are derived from the annual consolidated budget approved by the Supervisory Board. The customer loyalty component is determined by the Supervisory Board in good faith in writing in consultation with the respective Management Board member. The discretionary component can be granted by the Supervisory Board at its own discretion.

In the event that a member of the Management Board is not entitled to compensation for the whole financial year on which payroll is based, it is calculated on a pro rata basis.

### **11.1.4 Long-term variable compensation component (LTIP)**

Management Board members participate in a long-term incentive plan (LTIP). The LTIP is part of the Management Board's variable compensation, which focuses on sustainably positive corporate development and creates a long-term incentive for the Management Board member to promote the success of the company. To this end, the members of the Management Board are promised a gross amount (LTI instalment) in each financial year based on the bonus percentages set in their service contract and subject to and depending on achievement of predefined performance targets. At the end of three financial years (i.e. the performance period), the assessment bases and the respective degree of target achievement are determined for the performance targets. The gross amount (long term incentive - LTI) corresponding to the degree of achievement to be paid to the Management Board member is then determined. The performance targets and the bases of assessment are the average values of the annually calculated group EBITDA adjusted for the relative increase and decrease in capex during the performance period.

A performance period begins on the first day of the financial year for which the LTI instalment is being awarded and ends at the end of the second financial year following the financial year for which the LTI instalment was awarded. A claim to LTI payments is established with the approval of the consolidated financial statements by the Supervisory Board for the last financial year of the performance period. Any LTI must be settled and paid to the Management Board member within one month of approval of the consolidated financial statements. The maximum variable long-term compensation of each Management Board member is limited to 150% of basic compensation on the date of payment of the respective LTIP. If the average adjusted EBITDA on the date of payment of the LTI falls below 85% of the adjusted average target EBITDA, this compensation component is not granted. The minimum compensation for an LTI instalment is therefore EUR 0.00 for each Management Board member.

If a Management Board member leaves service before the end of 24 months of a performance period, that member has no entitlement to an LTI. If 24 months of the performance period of an LTI instalment have already lapsed on the date of termination of service, the board member is entitled to an LTI for this LTI instalment on a pro rata basis subject to satisfaction of the performance measurement conditions. If a Management Board member joins Tele Columbus AG during the course of a financial year, the Supervisory Board decides whether and to what extent the Management Board member is entitled to participate in the LTI instalment for that current financial year.

#### **11.1.5 Long-term share-based variable compensation component (MSP)**

Long-term share-based variable compensation takes the form of a matching stock programme (MSP). The MSP creates a long-term incentive for the Management Board member to promote the success of the Company. To this end, the members of the Management Board are allocated a number of options determined by the Supervisory Board in advance each financial year subject to and dependent on corresponding personal investment by the Management Board member in Tele Columbus AG. After the end of four financial years (i.e. the holding period), the Management Board member may exercise these options in accordance with further conditions. This compensation component came into effect in financial year 2015.

The number of shares that can be held by Management Board members (i.e. qualifying shares) is 50,000 for the CEO and 25,000 for the CFO. The members of the Management Board are obliged to hold these qualifying shares in a blocked custody account in their own name for the duration of their participation in the MSP. During the term of the respective service contract, the Management Board member will receive from each of the MSP's five annual instalments a specific number of options for each qualifying share held in the blocked custody account on the relevant reporting date. For the first instalment of the MSP (i.e. the 2015 instalment), the number of options per qualifying share is 4.3, and for the 2016 to 2019 instalments it is 4.5. The Supervisory Board will determine the number of options per qualifying share for the future instalments in due course. The 2015 instalment was allocated on the day of the IPO on 23 January 2015. The remaining instalments will be allocated for the following years in each case on 23 January, provided the service contract still applies on that date.

Combined management report  
as at 31 December 2019

Instalment 3, for Mr Degenhardt, was allocated on 1 September 2017 and the vesting period ends on 22 January 2019. For this instalment, the number of options for each qualifying share is not 4, but the number (4) is reduced on a prorated basis (period from 1 September 2017 to 22 January 2018 in proportion to a full twelve-month instalment period). Instalment 4, for Timm Degenhardt and Eike Walters was allocated on 28 September 2017.

The holding period for the first 2015 instalment ends on 22 January 2019. The holding period for each additional MSP instalment is four years. It begins on the day of allocation of an MSP instalment and ends at the end of four calendar years. The options for an instalment may be exercised after the holding period has elapsed, provided that the weighted average of the share price during the preceding 60 stock exchange trading days immediately prior to exercising the respective option exceeds the respective exercise threshold. The relevant exercise threshold is determined by the Supervisory Board when allocating the respective instalment and amounts to at least 130% of the exercise price. A deviating exercise threshold of 120% was defined for instalments 4 and 5.

The options exercised for an instalment are converted into a euro amount, equal to the difference between the closing share price on the last stock exchange trading day before receipt of the exercise notification and the exercise price of the respective instalment multiplied by the number of options exercised (i.e. gross profit on options). The net profit on options remaining to the Management Board member after deduction of statutory fees and personal taxes is in turn allocated to the respective Management Board member in the form of shares. The Management Board member is obliged not to sell the shares acquired in this manner for a period of twelve months.

The gross profit on options for a member of the Management Board determined after exercising the option is limited to a maximum of 400% of his/her annual base salary on the date the respective MSP instalment is paid out.

The options of an MSP instalment always become vested monthly after allocation.

If a Management Board member discontinues his/her services for the Company before the exercise or expiry of his/her options as a result of expiration of the agreed contract term, death, permanent inability to work, retirement, or due to effective extraordinary termination on the part of the Management Board member, he/she and/or his/her heirs may exercise the vested options in the event of his/her departure even after he/she has departed. By contrast, all options not yet vested shall expire. If the service contract for a member of the Management Board is terminated for other reasons, all vested and unvested options not exercised on the date of legal termination of service shall expire.

If a Management Board member joins Tele Columbus AG during a financial year, the Supervisory Board decides whether and, if so, with which reduced instalment the Management Board member is entitled to participate in the MSP for that current financial year.

#### **11.1.6 Other commitments**

Tele Columbus AG maintains a Directors and Officers Liability Insurance Policy (D&O Insurance) for members of the executive bodies of Tele Columbus AG. It is concluded and/or renewed annually. D&O insurance covers the personal liability risk should members of executive bodies be made liable for financial losses when exercising their duties. The policy for financial year 2019 includes a deductible premium for members of the Management Board and the Supervisory Board which complies with the provisions of the German Stock Corporation Act and the German Corporate Governance Code.

The members of the Management Board do not participate in the existing company pension plan. The CEO therefore receives, for the duration of his service contract, an annual amount of 7.5% of his respective current annual salary either in the form of direct insurance (life insurance) or a pension relief fund to his benefit.

#### **11.1.7 Payments in the event of termination of a service contract**

The service contracts of both members of the Management Board do not provide for termination benefits in the event of premature termination of contract without good cause.

However, pursuant to the German Corporate Governance Code, the contracts provide that in the event payment for premature termination of the contract without good cause should be agreed, such termination benefits be limited to a maximum of two years' compensation ('severance cap') and not exceed the value of the compensation for the remaining term of that service contract. Calculation of the severance cap is to be based on the total compensation for the past financial year and where appropriate also on the expected overall compensation for the current financial year. If the residual term of the Management Board service contract is less than two years, the termination benefits must be calculated pro rata temporis.

If the service contract is terminated for good cause to be justified by the member of the Management Board, no payments are made to that member of the Board.

In the event of premature termination of a Management Board member's activity due to a change of control, the following has been contractually agreed. The Management Board member has the right to terminate his/her service contract within a period of six months after the change of control by giving six months' notice prior to the end of any month and to resign from his/her office as a member of the Management Board (i.e. 'CoC termination'). In the event of CoC termination due to change of control, the Management Board member shall receive his/her contractual compensation for the remaining term of the service contract in the form of a one-off payment (i.e. 'CoC termination benefits'), but no more than a maximum of two years' annual compensation. While the matching stock programme is not factored into the annual compensation of the CEO (payments under the MSP are unlimited), this exception does not apply to the CFO. Calculation of the one-off termination benefits is to be based on the total compensation for the past financial year and where appropriate also on the expected overall compensation for the current financial year.

Members of the Management Board are generally subject to a post-contractual non-compete clause for a period of 18 months after termination of their service contract. During the period of the non-compete obligation, the Management Board member concerned shall receive compensation amounting to 50% of his/her most recent fixed annual compensation. Other actual and hypothetical income of the Management Board member will be deducted from this compensation, insofar as this income exceeds the amount of the most recently received annual fixed salary by more than 10%.

#### **11.1.8 Overview of the total compensation of the Management Board**

The total compensation granted to the members of the Board of Management for financial year 2019 amounted to KEUR 2,254 (previous year: KEUR 1,654). Of this amount, KEUR 850 (PY: KEUR 885) was attributable to fixed non-performance-linked compensation components, KEUR 60 (PY: KEUR 65) to other non-performance-linked benefits, KEUR 450 (PY: KEUR 257) to short-term performance-linked compensation components, KEUR 311 (PY: KEUR 0) to long-term variable compensation components (LTIP), KEUR 283 (PY: KEUR 247) to share-based compensation under the MSP, and KEUR 300 to other compensation or contractual benefits (PY: KEUR 200).

Both members of the Management Board were also active in the parent company and/or subsidiaries of Tele Columbus AG. The compensation awarded for activities on the Management Board of Tele Columbus AG also covers these activities.

The individualised, overall compensation of the members of the Management Board, broken down into the respective components, is shown in the following table for financial year 2019. The first table shows the target compensation for the reporting year. The second table shows the actual payments made for that financial year.

Pension benefits granted to Mr. Degenhardt in 2019 financial year amounted to KEUR 45 (PY: EUR 45).

As in the previous year, no advances were paid to Management Board members in financial year 2019, and there were no loans.

## **11.2 Compensation of the Supervisory Board**

### **11.2.1 Supervisory Board compensation system**

The compensation of the Supervisory Board is governed by Article 18 of the Articles of Association of Tele Columbus AG. Members of the Supervisory Board receive fixed annual compensation in the amount of KEUR 33 (PY: KEUR 33). The Chairman of the Supervisory Board receives KEUR 75 annually (PY: KEUR 75).

Membership and chairmanship of committees are remunerated separately. Each member of the Audit Committee receives an additional KEUR 4 (PY: KEUR 4). The Chairman of the Audit Committee receives in additional KEUR 12 (PY: KEUR 12). The Chairman of the Executive Committee receives an additional KEUR 5 (PY: KEUR 5). If a member of the Supervisory Board is not part of the Supervisory Board or a committee for the entire financial year, compensation is reduced proportionally to the time of service. For attending meetings of the Supervisory Board and its committees, the members of the Supervisory Board receive attendance fees in the amount of KEUR 1 (PY: KEUR 1) per meeting day. Participation by way of video or telephone link is considered participation in this sense.

Tele Columbus AG reimburses members of the Supervisory Board for expenses incurred in exercising their supervisory board functions as well as value added tax on their compensation.

Members of the Supervisory Board are also included in the company D&O insurance policy maintained by Tele Columbus AG with an appropriate deductible, in accordance with the provisions of the German Stock Corporation Act and the German Corporate Governance Code. The premiums are paid by Tele Columbus AG.

### **11.2.2 Overview of the total compensation of the Supervisory Board**

The total compensation of members of the Supervisory Board in financial year 2019 amounted to KEUR 341 (previous year: KEUR 426) (excluding VAT). Of this amount, KEUR 226 (previous year: KEUR 290) was attributable to fixed compensation for activities on the Supervisory Board. Compensation for committee work amounted to KEUR 24 (previous year: KEUR 25). In financial years 2019 and 2018, Tele Columbus AG entities did not pay or grant any compensation or other benefits to members of the Supervisory Board for personally rendered services, in particular advisory and agency services. Nor were members of the Supervisory Board granted any advances or loans. The compensation of members of the Supervisory Board for financial years 2019 and 2018 is shown in the following tables:

Combined management report

Because amounts are disclosed in thousands of euros, standard commercial rounding may result in rounding differences. In some cases, such rounded amounts and percentages may not correspond 100% to the stated sums when added together. Due to standard commercial rounding, subtotals in tables may differ slightly from non-rounded figures in other sections of the consolidated financial statements.

The following notes are an integral component of these consolidated financial statements.

## **VI. Notes to the consolidated financial statements**

### **A. General information**

#### **A.1 Introduction**

Tele Columbus AG, registered at Kaiserin-Augusta-Allee 108, 10553 Berlin, has been listed on the Frankfurt Stock Exchange (Prime Standard) since 23 January 2015.

#### **A.2 Description of operating activities**

The companies of Tele Columbus AG are fibre-optic network operators operating primarily in the eastern German federal states. The Group's core business is operating and managing broadband cable equipment, in some cases using own satellite receiving equipment for providing residential apartment complexes of various housing companies and their tenants with television and radio signals, internet as well as telephony services. Operation of the equipment includes servicing, maintenance, customer care and collection. In addition to operating cable networks, the companies of Tele Columbus AG also offer B2B and construction services. Their B2B business comprises products to provide carrier companies with bandwidth services and business client networking, products to provide business clients with Internet and telephony in addition to network monitoring and data centre marketing. Construction services include the installation of fibre optic networks or connecting residential areas to its own backbone.

#### **A.3 Basis of accounting**

Applying Section 315e of the German Commercial Code (HGB), the consolidated financial statements of Tele Columbus AG as at 31 December 2019 were prepared in accordance with the International Financial Reporting Standards (IFRS), as adopted by the European Union (EU).

The consolidated financial statements comprise the consolidated income statement, the consolidated statement of profit or loss and other comprehensive income, the consolidated statement of financial position, the consolidated statement of cash flows, the consolidated statement of changes in equity and the notes for financial year 2019 and for the comparative period of 2018.

Notes to the consolidated financial statements  
as at 31 December 2019

The functional currency of the combined financial statements is the euro. Unless otherwise stated, all figures are presented in thousands of euros (KEUR). Because amounts are disclosed in thousands of euros, standard commercial rounding may result in rounding differences. In some cases, such rounded amounts and percentages may not correspond 100% to the stated sums when added together, and subtotals in tables may differ slightly from non-rounded figures in other sections of the consolidated financial statements due to standard commercial rounding.

With regard to the financial information contained in the consolidated financial statements, a dash ("-") means that the item in question is not applicable and a zero ("0") means that the respective figure has been rounded to zero.

The consolidated financial statements were prepared by the Management Board of Tele Columbus AG on 23 March 2020 and approved by the Supervisory Board on 30 March 2020.

These consolidated financial statements are prepared on the going concern assumption.

The consolidated financial statements and the combined management report have been published in the German Federal Gazette (Bundesanzeiger).

#### **A.4 Changes in significant accounting policies**

The Group has applied IFRS 16 Leases for the first time as at 1 January 2019.

The Group applied IFRS 16 according to the modified retrospective approach. Comparative information presented for 2018 was not restated, i.e. it is presented, as previously reported, in line with IAS 17 and the related interpretations. Details on the changes in accounting policies are presented below.

Furthermore, the disclosure requirements pursuant to IFRS 16 have generally not been applied to comparative information.

##### Definition of a lease

Previously the Group determined whether, pursuant to IFRIC 4 *Determining Whether an Arrangement Contains a Lease*, an arrangement contained or was a lease. The Group now evaluates where a contract is or contains a lease based on the definition of a lease, as illustrated in note D.2.4.

For the transition to IFRS 16, the Group decided to apply the practical expedient to retain the evaluation regarding which transactions are leases. The Group applies IFRS 16 solely to contracts which had previously been identified as leases. Contracts which were not identified as leases according to IAS 17 and IFRIC 4 were not examined to determine whether a lease according to IFRS 16 is present. Thus, the definition of a lease according to IFRS 16 is only applied to contracts which were concluded or amended on or after 1 January 2019.

### As lessee

As lessee the Group leases numerous of assets, including buildings, network infrastructure and IT equipment. The Group had previously classified leases as operating leases or financing leases based on its assessment of whether the lease transferred substantially all risks and rewards of ownership of the underlying asset to the Group. Pursuant to IFRS 16, the Group recognises right-of-use assets and lease liabilities for most of these leases, i.e. these leases are recognised in the statement of financial position.

### Leases that were classified as operating leases pursuant to IAS 17

Previously, the Group classified leases of various asset categories as operating leases according to IAS 17. Upon transition the lease liabilities for these leases were measured at the present value of the remaining lease payments, discounted using the incremental borrowing rate of the Group as at 1 January 2019. Right-of-use assets are measured in the amount of the lease liability, adjusted by the amount of the lease payments paid in advance or deferred.

The Group tested its right-of-use assets for impairment on the date of transition and concluded that there was no objective evidence of impairment of right-of-use assets.

The Group has made use of a series of relief provisions for the application of IFRS 16 to leases that had been classified under IAS 17 as operating leases. Specifically, the Group has:

- not recognised right-of-use assets or lease liabilities for leases for which the term will end within 12 months of the date of first-time adoption,
- not recognised right-of-use assets or lease liabilities for leases for which the underlying asset is of low value,
- not taken account of initial direct costs for the measurement of the right-of-use asset at the date of first-time adoption.

### Leases that were classified as financing leases pursuant to IAS 17

The Group leases numerous of transmission lines and IT-equipment. A part of these leases was classified as finance leases under IAS 17. For these finance leases, the carrying amount of the right-of-use asset and lease liability as at 1 January 2019 was stated at the carrying amount of the leased asset and the lease liability under IAS 17 directly before this date.

### As lessor

Leases in which the Group acts as lessor are of no significance.

Notes to the consolidated financial statements  
as at 31 December 2019

Effect at the date of transition

As part of the transition to IFRS 16, additional assets for rights of use in the amount of KEUR 24,930 and additional lease liabilities in the same amount were recognised as of 1 January 2019. As a consequence, there were no effects on equity or deferred taxes as at the date of first-time adoption.

For the measurement of lease liabilities from operating leases, the Group discounted the lease payments using its incremental borrowing rate as at 1 January 2019. The average weighted interest rate amounts to 2.1 percent.

KEUR	1 January 2019
Operate Lease obligations as at 31 December 2018 as referenced in Annual Report 2018 according to IAS 17	30,592
Leases that are not capitalised, according to existing option, which term ends within 12 months after the date of first application	-1,091
Leases that are not capitalised, according to existing option, in which the underlying asset is of low value	-1,948
Other effects	247
Operate lease obligations as at 31 December 2018 capitalised according to IFRS 16	27,800
Discounting with incremental borrowing rate at 1 January 2019	-2,870
(additional) lease liabilities at 1 January 2019	24,930

The impact of the application of IFRS 16 on earnings before taxes beginning on 1 January 2019 is presented below:

KEUR	2019
Reduction cost of materials	3,683
Reduction other expenses	4,561
<b>EBITDA</b>	<b>8,244</b>
Depreciation and amortisation	-8,266
Interest expenses	-746
<b>Earnings before taxes</b>	<b>-768</b>

Beyond this, there were no significant changes to the accounting and valuation methods compared with the Group's uniform accounting and valuation methods applied in the comparative period of the previous year.

## **B. Scope of consolidation**

### **B.1 Consolidation methods**

#### **B.1.1 Subsidiary**

Subsidiaries are companies controlled by Tele Columbus AG. Tele Columbus AG controls a company when it is exposed to or has rights to variable returns from its involvement with the company and has the ability to affect those returns through its power over the company. The financial statements of subsidiaries are included in the consolidated financial statements from the date that control is gained until the date when control ceases.

In preparing the financial statements, all internal Group balances, income and expenses as well as all unrealised gains and losses from transactions within the reporting entity were eliminated in the course of consolidation. The cost of interests in subsidiaries in the context of corporate acquisitions is offset against the pro-rata fair value of the assets acquired and liabilities assumed as at the acquisition date. Any positive difference arising from the offsetting is reported as goodwill and capitalised in the amount of the interest acquired in the respective subsidiary.

#### **B.1.2 Minority interests (non-controlling interests)**

Minority interests (non-controlling interests) are measured at the acquisition date with the proportionate share of the acquired subsidiary's net assets.

Changes in Tele Columbus AG's interest in a subsidiary that do not result in a loss of control are accounted for as equity transactions.

#### **B.1.3 Loss of control**

When Tele Columbus AG loses control of a subsidiary, it derecognises assets and liabilities of the subsidiary and all related non-controlling interests and other equity components. Any gain or loss is recognised in profit or loss. Any retained interest in the former subsidiary is recognised at fair value on the date when control was lost.

#### **B.1.4 Investments accounted for using the equity method**

The interests of the companies of Tele Columbus AG in financial assets accounted for using the equity method include investments in associates and joint ventures.

Associates are companies in which Tele Columbus AG has a significant influence, but not control or joint control in respect to financial and business policy. A joint venture is an arrangement by which Tele Columbus AG exercises joint governance with rights to its net assets, but not to the assets' value or the obligation for the venture's liabilities.

Notes to the consolidated financial statements  
as at 31 December 2019

Associates and joint ventures are initially recognised at cost, which includes the transaction costs. After initial recognition, the consolidated financial statements contain Tele Columbus AG's share in the profit or loss and in other comprehensive income until the time when the significant influence or joint control ends.

## B.2 Changes in the consolidated group

### B.2.1 Acquisition of the controlling interest in ANTEC Servicepool GmbH, Hannover

In financial year 2019 Tele Columbus AG acquired a controlling interest of 76.0% in ANTEC Servicepool GmbH, Hannover. The purpose of this company is the operation, distribution and management of multimedia supplies. The acquisition was conducted with the aim to further support the infrastructure expansion in regional core markets.

The acquisition amounted to KEUR 7,422 and has been paid in cash.

The cost of the business combination was allocated to the acquired assets and liabilities as at the acquisition date as follows:

in KEUR	Fair values after acquisition	Non-controlling interests
Intangible assets	3,466	1,095
Property, plant and equipment	1,021	322
Trade and other assets	255	81
Inventories	5	1
Cash and cash equivalents	537	169
Provisions and other liabilities	140	44
trade payables	615	194
Other liabilities	380	121
Deferred taxes	1,097	346
<b>Net of assets</b>	<b>3,052</b>	<b>963</b>
<b>Consideration paid</b>	<b>7,422</b>	
<b>Goodwill</b>	<b>4,370</b>	

The non-tax-deductible goodwill is mainly attributed to expected synergy effects and the value of the acquired business model and was allocated to the "TV" segment.

The gross amount of the acquired receivables was KEUR 178. Allowances on receivables of KEUR 5 were recognised.

Since first consolidation, the acquired company has made a contribution to group revenue of KEUR 5,095 to EBITDA of KEUR 1,463 and to profit for the period of KEUR 728.

The Group incurred acquisition-related costs of KEUR 212 for legal advice and due diligence costs. These costs are recognised in other expenses.

Notes to the consolidated financial statements  
as at 31 December 2019

Besides the matters already described, there were no other changes in the consolidated group in the reporting period as well as in the previous financial year.

### B.3 Scope of consolidation

Tele Columbus AG and the following subsidiaries are fully consolidated in the consolidated financial statements of Tele Columbus AG; the respective ownership interests correspond to the voting right percentages:

## B.4 Interests in investments accounted for using the equity method

Investments in associates and joint ventures have only an immaterial effect on the consolidated financial statements, both individually and in aggregate.

### Associates

	Capital Share in %	
	31 December 2019	31 December 2018
AproStyle AG, Dresden	25.10	25.10
Deutsche Netzmarketing GmbH, Köln	20.00	20.00
TV Produktions- und Betriebsgesellschaft GmbH & Co. KG, Jena	40.00	40.00
TV Produktions- und Betriebsverwaltungs GmbH, Jena	40.00	40.00

The carrying amount of investments in associates totals KEUR 414 (2018: KEUR 411) and mainly results from the investment in AproStyle AG, Dresden.

Income from AproStyle AG, which was accounted for using the equity method, amounted to KEUR 0 in financial year 2019 (2018: KEUR 0).

### Joint Ventures

	Capital share in %	
	31 December 2019	31 December 2018
GlasCom Salzlandkreis GmbH, Staßfurt-Brumby	50.00	50.00
JVA Media GmbH, Magdeburg	-	50.00

The carrying amount of interests in joint ventures totalled KEUR 0 (2018: KEUR 1).

Tele Columbus has a residual interest in the net assets of GlasCom Salzlandkreis GmbH, Staßfurt-Brumby, and therefore classified this company as a joint venture.

As in previous year, there was no significant income or expense from joint ventures in the financial year.

## C. Basis of accounting

### Disclosure and measurement

The entities included in the consolidated financial statements of Tele Columbus AG are presented in accordance with IFRS accounting policies for all reporting periods. The consolidated income statement was prepared in accordance with the nature of expense method. The consolidated financial statements were prepared based on historical or amortised cost except for the net defined benefit liability and derivative financial instruments. The net defined benefit liability recognised is determined as the present value of defined benefit obligations less the fair value of plan assets. Derivative financial instruments were measured at fair value through profit or loss.

## **D. Accounting policies**

### **D.1 Significant estimation uncertainty**

The preparation of the consolidated financial statements in accordance with IFRS requires assessment, estimates and assumptions that have a direct impact on the application of accounting policies. The reported amounts of assets and liabilities, the contingent assets and liabilities presented on the reporting date and the revenue and expenses recognised during the reporting period are also affected. Although management has formulated the estimates to the best of their knowledge as well as taken the most recent results into consideration, the actual results may differ.

These estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to estimates are recognised prospectively.

Notes to the consolidated financial statements  
as at 31 December 2019

An explanation of the most important forward-looking assumptions and other major sources of estimation uncertainty as at the reporting date that have a significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities within the next financial year is provided in the following notes. The carrying amounts are presented in the consolidated statement of financial position or in the additional explanatory notes to the relevant assets and liabilities.

- Impairment testing of the carrying amount of non-financial assets (31 December 2019: KEUR 1,042,656; 31 December 2018: KEUR 1,039,634):

At the end of each reporting period, the companies of Tele Columbus AG assess whether there is objective evidence of impairment of non-financial assets. Goodwill and construction in progress are not amortised or depreciated, but are impairment-tested annually instead. For impairment testing of goodwill according to IAS 36 as at 31 December 2019, the fair value less costs to sell for each cash-generating unit was used as the recoverable amount. Fair value less costs to sell was measured pursuant to IFRS 13 based on unobservable inputs (level 3 inputs).

- Definition of measurement parameters for the recognition and subsequent measurement of property, plant and equipment (2019: KEUR 669,166; 2018: KEUR 639,440):

The companies of Tele Columbus AG use various different measurement parameters for the recognition and subsequent measurement of property, plant and equipment (differentiation between maintenance and investment measures, capitalisation of own work, allocation to asset classes, grouping of utilisation units, delimitation of valuation units, assessment of future decommissioning measures, definition of useful lives and identification of events that lead to the performance of an impairment test). When defining the measurement parameters, management estimates on the basis of technical and economic experience are required. Any individual assets required to be measured as part of these estimates were measured at fair value less costs to sell pursuant to IFRS 13 based on unobservable inputs (level 3).

- Accounting of deferred tax assets (2019: KEUR 4,096; 2018: KEUR 1,593):

Deferred tax assets are capitalised if it is likely that sufficient taxable income will be generated in the future against which the deductible temporary differences can be offset. The calculation of deferred tax assets requires estimates by the Management Board about the timing and levels of future taxable income as well as future tax planning strategies.

Based on the current planning of the companies of Tele Columbus AG, deferred tax assets on temporary differences are generally recognised in the amount of the deferred tax liabilities. In the case of subsidiaries that are independent taxable entities, deferred tax assets are capitalised if their taxable income in future years is expected to be sufficiently high.

## **D.2 Significant accounting policies**

### **D.2.1 Intangible assets**

Acquired intangible assets are recognised at cost in the statement of financial position. Internally generated intangible assets are carried at cost if they comply with the requirements of IAS 38.

Intangible assets with finite useful lives are generally amortised over their estimated useful life (between 3 and 15 years) using the straight line method from the time of their operational readiness. Acquired customer bases are amortised over their estimated useful life taking account of minimum contract terms.

Development expenses for improving and enhancing internally generated software are capitalised insofar as they fulfil the recognition requirements. Capitalised development expenses are amortised over a period of two years.

Expenses for the acquisition of new customers are capitalised as intangible assets pursuant to IFRS 15 if they are payments directly related to the conclusion of a contract. These expenses are amortised over the expected useful life of three years.

The costs of obtaining the contract include the costs for contract initiation (mainly sales commissions to employees in the direct and indirect distribution channel) and the costs to fulfil the contract. These are to be capitalised if it can be assumed that the costs will be offset by future revenue from the contract. Costs for contract initiation are additional costs which would not have been incurred without the contract being concluded. Costs to fulfil a contract are costs directly incurred after contract inception, which serve contract performance but are incurred in advance and are not capitalised under another reporting standard. Tele Columbus makes use of the option to recognise contract costs that have an amortisation period of less than one year as expenses.

Goodwill and intangible assets with indefinite useful lives are not amortised on a systematic basis but impairment-tested annually instead for potential impairment. Further assessments are performed if there is any indication of impairment. The impairment test is performed based on the corresponding cash-generating unit.

An impairment loss is recognised in the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and its value in use. The impairment test is performed based on the cash-generating unit to which goodwill is attributable.

The estimated economic useful lives are reviewed at each reporting date and adjusted as necessary.

Amortisation expenses and impairment losses are recognised in the "Amortisation" item in the income statement.

Gains and losses on disposals are recognised in the "Other income" or "Other expenses" item.

### **D.2.2 Business combinations**

For business combinations, capital is consolidated by applying the acquisition method pursuant to IFRS 3. Assets and liabilities of the newly acquired subsidiaries that are identified when preparing the opening balance are recognised at fair value. These also include identified intangible assets and contingent liabilities. The remaining difference corresponds to goodwill. Non-controlling interests in the acquired company were provisionally recognised at fair value.

### **D.2.3 Property, plant and equipment**

Property, plant and equipment (PPE) are measured at cost less accumulated depreciation and any accumulated impairment losses. Impairment losses are reversed when there is any indication that a previously recognised impairment loss no longer exists or has decreased.

The cost of acquisition comprises any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.

Property, plant and equipment are generally depreciated straight-line over a period of three to 15 years. The cable network infrastructure comprises technical equipment with an estimated useful life of between eight and 15 years. If there is a licence agreement, then the remaining term of the licence agreement represents the upper limit for the useful life. Borrowing costs are capitalised if they are directly attributable to the acquisition of a qualifying asset for which the period required to get it ready for its intended use is more than 12 months. If they are not directly attributable, they are expensed in the period incurred.

Customer terminals in the form of modems and receivers – provided they are not sold to the customer under a contract – are recognised as part of the network infrastructure under technical equipment and depreciated over their estimated useful life of three years for modems or two years for receivers. If returned before the anticipated end of the contract, the customer terminal is written down to one euro and allocated to inventories.

Estimated useful lives are reassessed at each reporting date. Adjustments are made in accordance with the new basis for assessment.

If there are any indications of impairment and if the recoverable amount is lower than amortised cost, an impairment loss is recognised for property, plant and equipment. The recoverable amount is the higher of an asset's fair value less costs to sell and its value in use. The impairment test is generally carried out at individual asset level; in some circumstances, an appropriate portfolio may be formed.

Notes to the consolidated financial statements  
as at 31 December 2019

Costs for maintenance and repair are recognised in the period in which they are incurred. Costs for property, plant and equipment are recognised as an asset if it is likely that the associated future economic benefits flowing to the company will exceed the benefits that would have been possible without the acquisition.

Straight-line depreciation expenses and impairment losses are recognised as “Depreciation” in the income statement.

Gains and losses on asset disposals are recognised through profit or loss in the “Other income” or “Other expenses” item.

#### **D.2.4 Leases**

##### Method applied from 1 January 2019 on:

The Group assesses whether a contract constitutes or includes a lease upon contract inception. This is the case if the contract entitles control over the use of an identified asset for a period of time in exchange for consideration. To identify whether the contract includes the right to control an identified asset, the Group uses the definition of a lease according to IFRS 16 as its base.

This method is used for contracts which have been concluded on or after 1 January 2019.

##### As lessee

At the commencement date or modification of the contract containing lease components, the contractually agreed remuneration based on the stand-alone selling price has to be distributed. The Group has, however, decided to refrain from separation of non-lease components for all asset categories and instead to recognise lease and the non-lease components as one single lease component.

At the commencement date, the Group recognises an asset for the right-of-use asset granted and a lease liability. The right-of-use asset is initially measured at cost commensurate with the initial measurement of the lease liability, adjusted by the payments made on or before the commencement date plus any initial direct costs and estimated costs for the dismantling or removal of the underlying assets or the restoration of the underlying assets or site where the asset is located, less any received lease incentives.

Subsequently the right-of-use asset is depreciated straight line from the commencement date to the end of the lease term unless ownership of the underlying asset transfers to the Group at the end of the lease term or the costs of the right-of-use asset take account of the Group exercising a purchase option. In this case, the right-of-use assets is depreciated over the useful life of the underlying assets, which has been determined in line with the rules for property, plant and equipment. In addition, the right-of-use asset is continually tested for impairment where necessary and adjusted by specified re-measurements of the lease liability.

Notes to the consolidated financial statements  
as at 31 December 2019

The lease liability is initially recognised at the present value of the lease payments not yet made at the commencement date, discounted with the interest rate underlying the lease or, if this cannot be readily determined, at the incremental borrowing rate of the Group.

The Group uses a credit-risk appropriate yield curve based on market data to determine its incremental borrowing rate, which was adjusted further for the various asset categories.

The lease payments incorporated in the measurement of the lease liability include:

- fixed payments, including de facto fixed payments
- variable lease payments which are linked to an index or (interest) rate, initially measured using the applicable index or (interest) rate at the commencement date
- amounts, which are expected to be paid based on a residual value guarantee, and
- the exercise price of a purchase option, if the Group is reasonably certain to exercise this, lease payments for an extension option if the Group is reasonably certain to exercise this and penalty payment for early termination of the lease, unless the Group is reasonably certain that the lease will not be terminated early.

The lease liability is measured at net carrying amount using the effective interest method. The lease liability is remeasured if the future lease payments change due to a change in the index or (interest) rate, if the Group adjusts its estimate of the expected payments in the context of a residual value guarantee, if the Group changes its assessment of a purchase, extension or termination option being exercised or a de facto fixed lease payment changes.

In the event of such remeasurement of the lease liability, a commensurate adjustment to the carrying amount of the right-of-use asset is made or is made through profit or loss where the carrying amount of the right-of-use asset has been reduced to zero.

*Short-term leases and leases which are based on low value assets*

The Group has decided not to report right-of-use assets and lease liabilities for leases based on low value assets as well as for short-term leases. The Group recognises the lease payments associated with these leases as an expense on a straight-line basis over the term of the lease.

### As lessor

Where the Group acts as lessor, it classifies each lease either as a finance lease or operating lease at contract inception.

The Group makes an overall assessment to classify each lease based on whether the lease transfers substantially all risks and rewards of ownership of the underlying assets. If this is the case, the lease is classified as a finance lease; if not, it is classified as an operating lease. For the purposes of this assessment, the Group takes account of specific indicators, such as whether the lease includes the major part of the economic life of the asset.

Generally the financial reporting methods according to IFRS 16 applicable for the Group as lessor do not diverge from those applied during the comparative period.

The companies of Tele Columbus AG also lease customer premises equipment ("CPE") necessary for receiving digital television and broadband transmission packages to their customers. Such lease arrangements, in which the companies of Tele Columbus AG are the lessors, are classified as operating leases. Leased CPE of the companies of Tele Columbus AG is accordingly capitalised at cost under property, plant and equipment.

### Method applied before 1 January 2019:

For contracts concluded before 1 January 2019, the Group has assessed whether an arrangement was or contained a lease as follows:

- Fulfilment of the arrangement depended on the use of a specific asset or specific assets and
- the arrangement conveys a right to use the asset. An arrangement conveyed the right to use an asset, if the following is met:
  - o The purchaser had the ability or right to operate the asset, while obtaining or controlling more than an insignificant amount of the output.
  - o The purchaser had the ability or right to determinate physical access to the asset, while obtaining or controlling more than an insignificant amount of the output.
  - o Facts and circumstances indicated it was improbable that other parties would assume more than an insignificant amount of the output and the price per unit was not contractually fixed per unit of production nor did it correspond to the current market price per unit of performance.

### As lessee

In the comparative period, the Group had classified leases in which substantially all of the risks and rewards of ownership were transferred as finance leases. If this was the case, the leased assets were measured initially at an amount equal to the lower of their fair value and the present value of the minimum lease payments. Minimum lease payments were those payments over the lease term which the lessee had to pay, excluding contingent payments. Subsequent to initial recognition, the assets were recognised in accordance with the accounting policy applicable to that asset.

Assets held under other leases were classified as operating leases and not recognised in the Group's statement of financial position.

Payments made under operating leases were recognised in profit or loss on a straight-line basis over the lease term. Lease incentives received were recognised as component of the total lease expense over the term of the lease.

#### **D.2.5 Inventories**

Inventories are recognised at the lower of cost and net realisable value. The cost of inventories is measured on the basis of weighted average cost. Net realisable value is measured on the basis of appropriate reductions in selling price in the ordinary course of business based on marketability.

#### **D.2.6 Financial Instruments**

A financial instrument is any contract that gives rise to both a financial asset of one enterprise and a financial liability or equity instrument of another enterprise. As defined in IAS 32 and IFRS 9, financial instruments include both non-derivative financial instruments (such as receivables, liabilities and shares) and derivative financial instruments.

##### **a) Recognition and initial measurement**

Financial assets and liabilities are recognised for the first time when an entity becomes party to the contractual provisions of the financial instrument. Regular-way purchases and sales of financial instruments are recognised on the trade date, i.e. the date on which the companies of Tele Columbus AG commit to purchasing the asset. Regular-way purchases or sales are purchases or sales of financial assets under a contract whose terms require delivery of the assets within the time frame established generally by regulation or convention in the marketplace concerned. With the exception of derivative financial instruments, financial assets are recognised as at their settlement date.

On initial recognition, financial instruments are measured at fair value. Financial instruments that are not categorised as “at fair value through profit or loss” in the context of classification are recognised at fair value including the acquisition or issue of directly attributable transaction costs. Trade receivables excluding a significant financing component are measured at their transaction price.

##### **b) Classification and subsequent measurement**

On initial recognition of financial assets, Tele Columbus AG makes an allocation to one of the following measurement categories: “at amortised cost”, “at fair value through other comprehensive income – debt”, “at fair value through other comprehensive income – equity” and “at fair value through profit or loss”. With the exception of equity instruments, financial assets are allocated to the measurement categories respective of the identified business model under which the assets are held and the characteristics of the contractual cash flows. The contractual terms of the financial asset must generate cash flows that are solely “interest and principal payments” on specified dates.

Notes to the consolidated financial statements  
as at 31 December 2019

Financial assets are allocated to the category “at amortised cost” if they are held under a business model whose objective is to hold assets and if the payments are solely interest and principal payments and are made on specified dates.

Financial assets are allocated to the category “at fair value through other comprehensive income – debt” if they are held under a business model whose objective is to hold and sell assets and if the payments are solely interest and principal payments and are made on specified dates.

All other financial assets that are not classified as “at amortised cost” or “at fair value through other comprehensive income – debt” as described above are measured at fair value through profit or loss.

The business model is assessed at the portfolio level of the individual financial assets and their objectives. The Group has currently identified the “hold” business model for the financial instruments held.

Financial assets under the “hold” business model and thus in the category “at amortised cost” particularly include trade receivables and other receivables and assets.

Financial assets in the category “at fair value through profit or loss” consist entirely of financial assets held for trading in the sense of primary financial instruments and derivatives.

Equity instruments are generally measured at fair value. On initial recognition of an equity instrument that is not held for trading, Tele Columbus AG can irrevocably decide to present the change in fair value in other comprehensive income (“at fair value through other comprehensive income – equity”). This decision is made for each individual instrument. The option is not currently exercised.

Financial liabilities are generally classified in the category “at amortised cost”, irrespective of other criteria. If certain conditions are met on initial recognition, a different accounting treatment can be used. In addition to recognition at amortised cost, measurement at fair value through profit or loss is also possible. Derivatives must always be measured at fair value through profit or loss, and it is also possible to exercise the option “at fair value through profit or loss”. This option is not currently exercised. For issued loan commitments, the expected credit losses are also determined if certain conditions are met.

Notes to the consolidated financial statements  
as at 31 December 2019

c) Measurement categories

Subsequent measurement of financial assets is based on the following measurement categories:

- “Fair value through profit or loss”:  
Gains and losses and any interest income and dividends on financial assets that are measured at fair value through profit or loss are recognised in profit or loss.
- “At amortised cost”:  
Financial assets measured at amortised cost are measured using the effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses, and impairment losses are recognised in profit or loss. In addition, gains and losses that arise on derecognition are also recognised in profit or loss.
- “At fair value through other comprehensive income – debt”:  
Other debt instruments are measured at fair value. Interest income calculated using the effective interest method, foreign exchange gains or losses, and impairment losses are recognised in profit or loss. Other net gains and losses are recognised in other comprehensive income. On derecognition, aggregate gains and losses are reclassified to profit or loss.
- “At fair value through other comprehensive income – equity”:  
Other equity instruments are measured at fair value. Dividends that do not clearly compensate for part of the investment costs are recognised through profit or loss in the income statement. Other net gains and losses are recognised in other comprehensive income and cannot be reclassified to the income statement.

Subsequent measurement of financial liabilities is based on the following measurement categories:

- “Fair value through profit or loss”:  
Gains and losses and any interest expenses on financial liabilities that are measured at fair value through profit or loss are recognised in profit or loss.
- “At amortised cost”:  
Financial liabilities measured at amortised cost are measured using the effective interest method. Interest expenses and foreign exchange gains and losses are recognised in profit or loss. In addition, gains and losses that arise on derecognition are also recognised in profit or loss.

The fair value of derivative financial instruments is determined by discounting future cash flows at an interest rate in line with the market, and by using other common financial calculation methods. On initial recognition, the fair value of derivatives is generally zero under conditions in line with the market. Credit risks in relation to specific counterparties are taken into account when measuring derivative financial instruments. If the assessed fair value deviates from the transaction price, the difference is amortised over the term of the contract.

Notes to the consolidated financial statements  
as at 31 December 2019

An impairment loss is recognised for financial assets carried at amortised cost when amortised cost exceeds the present value determined on the basis of the instrument's original effective interest rate.

Cash and cash equivalents comprise of cash and bank deposits.

Financial assets and liabilities at fair value through profit or loss are derivative financial instruments. Their fair values are calculated based on market parameters or using calculation models based on market parameters.

d) Derecognition

Financial assets are derecognised when the contractual rights to cash flows from the financial asset have expired or the rights to receive the contractual cash flows from a transaction in which substantially all the risks and rewards incidental to ownership are transferred to a third party or are neither transferred nor retained and there is no control over the financial asset.

A financial liability is derecognised from the statement of financial position when it is repaid, i.e. when the obligation under the liability is discharged or cancelled, or when the financial liability has expired. When the financial liability is derecognised, the difference between the previous carrying amount and the consideration paid (including non-cash assets or liabilities) is recognised in profit or loss.

When there is a substantial modification of terms for existing financial liabilities, the existing financial liability based on the previous terms is treated as extinguished, and the financial liability is recognised based on the changed terms at fair value.

e) Impairment of financial assets

Tele Columbus recognises expected credit losses for all financial assets measured "at amortised cost". The amount of the losses recognised and the interest collected are determined in line with the calculation model and the allocation of the instrument to the respective level.

For all other financial instruments except for trade receivables and contractual assets, the amount of impairment is calculated in line with the "general approach" based on the following three levels:

Level 1: All relevant financial instruments are initially allocated to level 1. The present value of the expected losses from possible defaults within the next twelve months after the reporting date ("12-month expected credit losses") is recognised as an expense. The interest income in connection with the financial instrument is calculated by multiplying its gross carrying amount at the start of the period by the effective interest rate calculated as at the time of its addition. Consequently, the effective interest method is applied on the basis of the carrying amount before taking account of risk provisions.

Notes to the consolidated financial statements  
as at 31 December 2019

Level 2: Financial instruments that have a significantly increased credit risk in comparison to their addition date are allocated to level 2 of the impairment model. The impairment loss corresponds to the present value of the expected losses from possible defaults over the contractual remaining term of the financial instrument ("lifetime expected credit losses"). Interest income is calculated in the same way as in level 1.

Level 3: If objective evidence of impairment of the financial instrument can be observed in addition to significantly increased credit risk, the loss allowance continues to be measured based on the present value of the expected credit losses from possible default events over the remaining term of the financial instrument ('lifetime expected credit losses'). In contrast to levels 1 and 2, however, interest income is collected on the basis of the net carrying amount, i.e. the gross carrying amount less risk provisions, taking account of the original effective interest rate.

The carrying amount of the asset is reduced through use of an allowance account (provision for impairment). The impairment loss is recognised in profit or loss. Trade receivables with similar risk exposures are checked for irrecoverability on a portfolio basis. A portfolio combines receivables with a similar risk structure. Lump-sum specific allowances for credit losses are determined on the basis of the maturity structure of receivables and experience with credit losses in the past.

If, in one of the following reporting periods, the amount of the impairment loss decreases and this decrease can be objectively attributed to an event occurring after the impairment was recognised, the previously recognised impairment loss is adjusted. This reversal may not result in the carrying amount of the financial assets exceeding the carrying amount at amortised cost that would have resulted had the impairment not been recognised at the date of reversing the impairment. The amount of the reversal is recognised in profit or loss.

Cash and other receivables and assets are subject to the impairment requirements in accordance with the general approach. The (net) carrying amount of these financial instruments represents the maximum default risk in each case.

To determine a significantly increased credit risk relative to initial recognition, Tele Columbus takes account of suitable information that is available without requiring excessive costs or effort.

Financial instruments in the general approach are subject to a significantly increased credit risk in the event of a (relative) change in the probability of default of more than 20%, and a significantly increased credit risk is assumed at the latest when the financial instrument is more than 90 days past due.

Notes to the consolidated financial statements  
as at 31 December 2019

For cash, the exemption for financial instruments with a low credit risk is utilised where possible as at the reporting date. A low credit risk is judged on the basis of country and debtor ratings and outlooks, among other information. The requirements for financial instruments with a low credit risk are considered to be satisfied for cash with at least one investment-grade rating (AAA to BBB- at Standard & Poor's), meaning that the credit risk does not need to be tracked for financial instruments with a low credit risk. For materiality reasons, Tele Columbus does not recognise impairment on cash.

In the case of trade receivables and contract assets, a simplified approach is used for calculating impairment in the amount of life-time credit losses over the remaining term. Consequently, these financial instruments must at least be allocated to level 2, and if there is objective evidence of impairment they must be transferred to level 3. The simplified approach is also applied for trade receivables and contract assets that contain a financing component pursuant to IFRS 15, as well as for lease receivables. The (net) carrying amount of these instruments represents the maximum credit risk in each case.

If, in the case of trade receivables, there is objective evidence that not all amounts due are received in accordance with the originally agreed invoicing terms, an impairment loss is recognised through use of an allowance account (provision for impairment). The receivables are derecognised when they are classified as uncollectible.

Embedded derivatives are separated from the respective host contracts pursuant to IFRS 9 and recognised as independent instruments under the category "At fair value through profit or loss". The companies of Tele Columbus AG have embedded derivatives in connection with loan agreements and the senior secured notes.

At each reporting date, the financial instruments are examined individually to determine whether there is objective evidence of impairment. If this is the case, Tele Columbus carries out an individual review of the financial instruments. Objective evidence of impairment of a financial asset exists if reliably measurable negative effects on the future cash flows from the asset can be identified.

For example, objective evidence of impairment may include significant financial difficulty of the debtor, defaults and late payments, credit rating downgrades, insolvency or other restructuring processes at the debtor. A financial asset is derecognised if legal collection measures are expected to be generally unsuccessful.

If events occur in subsequent financial periods that indicate that the future cash flows from the financial asset will once again approximate the original level (e.g. due to a rise in the credit rating), the impairment loss is reversed through profit or loss.

When calculating expected credit losses and assessing the change in the relative probability of default, Tele Columbus takes account of forward-looking macroeconomic factors as well as debtor-specific, geographical and industry-specific characteristics. Further information on calculating expected credit losses and assessing the relative change in the probability of default is given in section F.3.2.3 "Credit risk (default risk)".

Tele Columbus defines a default as a counterparty being unable to meet its contractual obligations in respect of a financial instrument. At this time, the probability of default is 100% and the contractual cash flows are no longer expected to be collected. The item is also written down, adjusting for any collateral. Further information on defaults is provided in section F.3.2.3 "Credit risk (default risk)".

### **D.2.7 Employee benefits**

Employee benefits include benefits due in the short-term as well as benefits due after employment has been terminated, other long-term benefits and termination benefits.

Post-employment benefits are classified as either defined benefit plans or defined contribution plans, depending on the economic substance of the plan as derived from its principal terms and conditions.

#### *Short-term employee benefits*

Short-term employee benefits are recognised as an expense in the period in which the benefit is provided. A liability for the anticipated payable amount is recognised if the companies of Tele Columbus Group currently have a legal or constructive obligation to pay this amount due to work performed by the employee in the past and if the amount of the obligation can be estimated reliably.

#### *Share-based payment arrangements*

The fair value of the equity-settled share-based payment programmes granted to employees at the grant date is generally recognised as an expense over the vesting period with a corresponding increase in equity. The amount recognised as an expense is adjusted to reflect the number of claims for which the related service conditions and non-market performance conditions are expected to be met, so that the amount ultimately recognised is based on the number of claims that meet the related service conditions and non-market performance conditions at the vesting date. For share-based payments with non-vesting conditions, the fair value of the share-based payment is measured at the date of granting in order to take these conditions into account and no adjustments are made for any differences between the anticipated results and the actual results.

#### *Defined contribution plans*

Defined contribution plans are post-employment benefit plans under which an entity pays fixed contributions into a separate entity (e.g. a fund) and will have no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods.

*Defined benefit plans*

Defined benefit pension plans are post-employment benefit plans other than defined contribution plans, under which the respective companies are required to provide the agreed benefits to current and former employees.

Defined benefit plans are measured by using the projected unit credit method, which is based on various assumptions and expectations regarding future increases in salaries and pension payments as well as employee turnover and mortality. The obligations are measured by independent qualified actuaries once a year. The accumulated defined benefit obligations are recognised under personnel expenses, interest expenses and other expenses.

Should there be plan assets for defined benefit plans, which are used exclusively to secure retirement benefit obligations, such plan assets are measured at fair value and recognised on a net basis at the value of the pension provisions by using the projected unit credit method. Assets that are not netted are reported as other financial receivables.

Gains and losses resulting from changes in actuarial assumptions as well as the difference between standard and actual interest on plan assets are recognised in other comprehensive income.

*Agreements for partial retirement benefits*

In certain cases, employees of some companies are offered agreements for partial retirement benefits. Such provisions are measured at their present value, considering benefit entitlements of employees based on years of service.

*Anniversary obligations*

Employees of some companies receive jubilee or other long-service benefits upon having served the company for a certain number of years. Such provisions are measured at their present value, considering benefit entitlements of employees based on years of service.

*Benefits resulting from termination of employment*

Termination benefits are expensed when the companies of Tele Columbus AG can no longer withdraw the offer of such benefits. They are discounted if they are not expected to be fully settled within twelve months of the reporting date.

### **D.2.8 Other provisions**

According to IFRS, a provision is recognised when there is a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. If the companies of Tele Columbus Group expect that some or all of the expenditure required to settle a provision will be reimbursed, then the reimbursement is recognised as a separate asset when it is virtually certain that reimbursement will be received. Where the effect of the time value of money is material, provisions relating to future cash flows are discounted using a pre-tax discount rate that reflects the current market assessments of the time value of money and the risks specific to the liability, to the extent applicable.

### **D.2.9 Prepaid Income**

Private grants and prepayments from customers for services rendered after the reporting date are recognised as deferred income. These funds are released in accordance with contractually agreed terms to revenue or other income.

### **D.2.10 Recognition of revenue**

In the case of multi-component transactions (e.g. IP, telephony and TV), the total transaction price of the combined contract is allocated to the individual, separate performance obligations on the basis of the pro-rata stand-alone selling prices. The stand-alone selling price of each individual component is stated as a ratio of the sum of the stand-alone selling prices of the contractual performance obligations.

A contract asset is recognised if Tele Columbus has recognised revenue due to the fulfilment of a contractual performance obligation before the customer has made a payment or (regardless of due date) the preconditions for invoicing, and thus the recognition of a receivable, are in place. Typically this occurs in the course of revenue smoothing due to discounts granted at the start of an end customer contract.

A contract liability is recognised if the customer has made a payment or a receivable from the customer is due before Tele Columbus has satisfied a contractual performance obligation and thus recognised revenue. Typically this occurs by way of paid provision fees and other advance one-off payments of the customer which do not constitute a consideration for a separate performance obligation.

For each contract with a customer, contract liabilities are netted with the contract assets.

Tele Columbus capitalises expenses for sales commissions (contract costs) and amortises these over the estimated customer retention period per customer group and contract type.

Notes to the consolidated financial statements  
as at 31 December 2019

When a contract is concluded in the B2C segment, Tele Columbus charges the customer a one-off installation fee that is not reimbursed. Installation does not constitute a separate performance obligation. Furthermore, the customer is not granted any material rights with the installation fee. The installation fee is categorised as a non-refundable upfront fee. Pursuant to IFRS 15, these upfront payments are recognised as a liability and – in line with the transfer of the service to the customer – recognised as revenue over the contract term. Companies can choose not to include a financing component at the level of the individual contract for materiality reasons.

The majority of revenue arises from customers which have already terminated the original contract term and have received performance under contract extensions with a maximum term of one year. No information is provided on the remaining performance obligations as at 31 December 2019 that have an original expected duration of one year or less.

The carrying amount of the contract costs included in the statement of financial position as at 31 December 2019 (excluding costs for contract initiation) was KEUR 27,897 (2018: KEUR 22,538) and mainly consists of sales commissions to third-party dealers in direct and indirect distribution channels and to employees.

#### Performance obligations and revenue recognition methods

Revenue is measured based on the consideration specified in a contract with a customer. The Group recognises revenue when it transfers control of a good or service to a customer.

The following provides information on the type and point in time at which the performance obligation from contracts with customers is satisfied, including significant payment terms, and the associated revenue recognition principles for the individual products and/or services of the Group.

#### Analogue, internet/telephony, additional digital services

The customer is provided with the analogue connection, the internet/telephone connection and the additional digital service during the contract period. Revenue is recognised over this period and must be paid in advance by the customer (invoices issued on a monthly, quarterly or annual basis).

Revenue is recognised pursuant to IFRS 15 over time. Revenue recognition corresponds to the provision of services for the customer (output-based method). If the aforementioned services are performed in different reporting periods under a single agreement, the fee is divided between the services on the basis of the relative stand-alone selling prices. The stand-alone selling prices are determined based on the list prices at which the Group offers the services in separate transactions. If no list prices are available, the stand-alone selling prices are estimated in accordance with the requirements of IFRS 15.

#### Other transmission fees and feed-in fees

Revenue for other transmission fees and various feed-in fees (distribution of programmes to the companies of Tele Columbus AG) are recognised over the contract term. The invoicing intervals (monthly, quarterly or annual) depend on the negotiated contractual terms. Revenue is recognised on a monthly basis and is estimated regarding the requirements of IFRS 15, which means that the estimate of variable parts of the transaction price is constrained in line with the requirements in IFRS 15.56-58.

Revenue is recognised pursuant to IFRS 15 over time. Revenue recognition corresponds to the provision of services for the customer (output-based method).

#### Construction work

Construction services include installing fibre-optic networks, connecting residential areas to the Group's own backbone, and expanding or modernising coaxial or glass infrastructure in residential buildings owned by the customer. Construction services are recognised over the performance period. The length of the performance period depends on the scope of the respective construction service. At individual contractually agreed payment dates, Tele Columbus issues an invoice to the customer in line with the stage of completion of the construction service. Advance payments are also contractually agreed with the customer on an individual basis.

Revenue is recognised pursuant to IFRS 15 over time. An input-based method (cost-to-cost method) is used for revenue recognition. Advance payments received are recognised under contract liabilities.

#### Network capacity

Major customers are provided with a contractually agreed bandwidth (transfer capacity) for transmitting data via Tele Columbus infrastructure (networks).

Pursuant to IFRS 15 revenue is recognised over time. Revenue recognition corresponds to the provision of services for the customer (output-based method).

#### One-off fees for business customers

The item includes revenue from the installation of individual facilities at the customer.

Revenue is recognised at the date of service provision in accordance with IFRS 15.

### **D.2.11 Impairment of non-financial assets**

An intangible asset or an item of property, plant and equipment is impaired when the carrying amount of the applicable cash-generating unit exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and its value in use.

#### **D.2.12 Fair value measurement according to IFRS 13**

The companies of Tele Columbus AG measure their derivative financial instruments at fair value. The measurement model used is based on a calculation of fair value on the basis of different yield curves and assumed decision trees to take account of different scenarios.

All other assets and liabilities are only recognised at fair value if there are impairment losses or indications of impairment. In such cases, their fair value is measured using an appropriate valuation technique.

In addition, the fair value of financial assets and liabilities measured at amortised cost is reported in section F.3.1 “Carrying amounts and net income from financial instruments”.

The general responsibility for monitoring all significant fair value measurements, including level 3 inputs to measure fair value, lies directly with the finance and accounting department of the company preparing the statements, which reports directly to the Management Board. The management of Tele Columbus regularly reviews the most important inputs and measurement parameters. If information from third parties – such as quoted prices from price information services – is used to determine fair value, the management assesses the evidence obtained from the third parties in terms of the compliance of these measurements with IFRS requirements, including the fair value hierarchy level to which these measurements are assigned.

In determining the fair value of an asset or liability, the companies of Tele Columbus AG use data observable in the market insofar as possible. The inputs used to determine fair value are assigned to different levels of the fair value hierarchy in line with the valuation technique applied:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: inputs for the asset or liability that are not based on observable market data.

If the inputs used to measure the fair value of an asset or a liability might be categorised within different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement. If there are transfers between individual levels of the fair value, these are assessed as having taken place at the end of the reporting period. Derivatives are generally reported in level 2. In 2019, there were no transfers between level 1 and level 2 of the fair value hierarchy.

### **D.2.13 Income taxes**

#### *Current income taxes*

Current income tax assets and liabilities are measured at the amount at which a refund from the tax authority or a payment to the tax authority is expected; they are not discounted. The respective amount is calculated based on tax rates and tax laws that have been enacted or substantively enacted by the end of the reporting period. The Group operates only in Germany and generates its taxable income there.

Current taxes relating to items that are accounted for directly in equity are not recognised in the income statement but rather in equity. The management regularly assesses individual tax issues to determine whether there is scope for interpretation in view of the applicable tax regulations. If necessary, tax provisions are recognised.

#### *Deferred tax assets and liabilities*

Deferred tax assets and liabilities are recognised using the liability method for all temporary differences between the carrying amount of the assets/liabilities recognised for tax purposes and the carrying amount according to IFRS.

Deferred tax liabilities for temporary differences are recognised for all taxable temporary differences, with the exception of deferred tax liabilities from the initial recognition of goodwill or of an asset or liability in the context of a transaction that was not a business combination and did not impact either the profit for the period under commercial law or the taxable profit at the time of the transaction. In addition, deferred tax liabilities from taxable temporary differences in connection with investments in subsidiaries, associates and interests in joint arrangements also are not recognised if the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets for deductible temporary differences and tax loss carry forwards are recognised only to the extent that it is probable that the respective taxable entity (company or reporting entity) will generate sufficient taxable profit against which the deductible temporary differences and unused tax losses can be utilised. There is an exception to this in the case of deferred tax assets from deductible temporary differences that arise from the initial recognition of an asset or liability in the context of a transaction that is not a business combination and that did not impact either the profit for the period under commercial law or the taxable profit at the time of the transaction. The same applies to deferred tax assets from deductible temporary differences in connection with investments in subsidiaries, associates and interests in joint arrangements if it is probable that the temporary differences will not reverse in the foreseeable future or that sufficient taxable profit will not be available against which the temporary differences can be used.

Notes to the consolidated financial statements  
as at 31 December 2019

The value of deferred tax assets is based on future taxable income generated by the taxable entity (company or reporting entity) and is reviewed annually. If it is no longer probable that sufficient taxable income will be generated against which the deferred tax assets can be used at least in part, then the recognition for the deferred tax assets is corrected to the appropriate level.

Deferred tax assets and liabilities are measured using the tax rates expected to be valid for the period in which an asset is realised or a liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the reporting date. Deferred tax assets and liabilities are not discounted.

Deferred tax assets and liabilities are recognised under non-current assets or liabilities. If changes in assets and liabilities are reported in other comprehensive income or directly in equity, the change in the corresponding deferred tax assets or liabilities is also recognised in other comprehensive income or separately in equity.

Deferred tax benefits acquired as part of a business combination that do not satisfy the criteria for separate recognition at the acquisition date are recognised in subsequent periods, provided they result from new information about facts and circumstances that existed at the acquisition date. The adjustment is either treated as a decrease in goodwill (provided it does not exceed goodwill) if it arises during the measurement period, or is recognised in profit or loss.

Deferred tax assets and liabilities are offset only if the Group has a legally enforceable right to set off current tax assets against current tax liabilities and if the deferred tax assets and liabilities relate to income taxes levied by the same taxation authority either for the same taxable entity or for different taxable entities that intend either to settle current tax liabilities and assets on a net basis or to recover the assets and settle the liabilities simultaneously in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

#### **D.2.14 Assets held for sale**

Assets held for sale are classified as such if their carrying amount will be recovered principally through a highly probable sale transaction within the next twelve months rather than through continuing use. These assets are measured at the lower of their carrying amount and their fair value less costs to sell and are classified as assets held for sale. In this case, depreciation is no longer recognised. Impairment is recognised on these assets if their fair value less costs to sell is lower than their carrying amount. In the event of a subsequent increase in fair value less costs to sell, the previously recognised impairment loss is reversed. The amount of the reversal is limited to that of the impairment loss previously recognised for the assets in question. If the requirements for classification as assets held for sale are no longer met, the assets can no longer be reported as held for sale. In the reporting period, assets held for sale were recognised at the lower of their carrying amount and their fair value less costs to sell at the start of the active search for the buyer. The assets are available for immediate sale on terms that are usual and customary for the sector; a sale is therefore highly probable.

## D.2.15 Service Concession Agreement

### *Revenues*

Revenue associated with construction or upgrade services under a service concession arrangement is recognized on a time proportion basis.

This is done analogous to the Group's accounting method for the recognition of sales revenues from construction contracts. Revenue from operating or service contracts is recognized in the period in which the services are rendered by the Group. If the service concession agreement contains more than one service obligation, the consideration received is allocated in accordance with the relative individual selling prices of the individual services provided.

### *Intangible assets*

The Group recognises an intangible asset under a service concession arrangement when it has the right to use the infrastructure facility.

An intangible asset received as consideration for the rendering of construction or upgrade services under a service concession arrangement is measured on initial recognition at fair value in accordance with the fair value of the services performed. After initial recognition, the intangible asset is measured at cost including capitalised borrowing costs and less accumulated amortisation and accumulated impairment losses.

## D.3 Compliance with IFRS

Tele Columbus AG has adopted all IFRSs and IFRIC interpretations in the consolidated financial statements for the year ended 31 December 2019, as adopted by the EU, that are effective for financial years commencing on or after 1 January 2019.

The following accounting standards and interpretations were adopted for the first time in these financial statements:

Standard/ Interpretation	Effective as at	Publication of endorsement by the EU Commission	
Amendments to IFRS 9	Prepayment Features with Negative Compensation	01.01.2019	26.03.2018
IFRS 16	Leases	01.01.2019	09.11.2017
IFRIC 23	Uncertainty over Income Tax Treatments	01.01.2019	24.10.2018
Amendments to IAS 28	Long-term Interests in Associates and Joint Ventures	01.01.2019	11.02.2019
Amendments to IAS 19	Plan Amendment, Curtailment or Settlement	01.01.2019	14.03.2019
AIP 2015 - 2017	Annual Improvement Project, annual improvements to IFRS 3, IFRS 11, IAS 12 and IAS 23	01.01.2019	15.03.2019
Amendments to IAS 1	Presentation in the statement of financial position: Classification of Liabilities as Current or Non-Current	01.01.2019	23.01.2020

Apart from the application of IFRS 16, the standards and interpretations mentioned above did not have any significant impact on the consolidated financial statements as

Notes to the consolidated financial statements  
as at 31 December 2019

at 31 December 2019. Please refer to the explanatory notes in Section “A4 Changes in significant accounting policies”.

The following table shows the main new or revised standards (IAS/IFRS) and interpretations (IFRIC) that are not required to be applied until subsequent financial years and that the companies of Tele Columbus AG do not intend to apply early. Unless otherwise indicated, their effects on the consolidated financial statements are currently being examined. The overview is divided into provisions that have already been endorsed by the EU and provisions that have not yet received EU endorsement. Unless otherwise stated, the adoption date refers to the effective date as specified in the EU endorsement.

Standard/ Interpretation	Effective as at <sup>1)</sup>	Publication of endorsement by the EU Commission
<b>EU Endorsement took place until date of publication</b>		
Amendments to IFRS 9, IAS 39 and IFRS 7	Interest Rate Benchmark Reform	01.01.2020
Amendments to IAS 1 and IAS 8	Definition of materiality	01.01.2020
Amendments to References to the Conceptual Framework	Amendments to References to the Conceptual Framework	01.01.2020
<b>EU Endorsement pending</b>		
Amendments to IFRS 3	Business Combinations	01.01.2020
IFRS 17	Insurance Contracts	01.01.2021
Amendments to IFRS 10 und IAS 28	Sale or Contribution of Assets between an Investor and its Associate or Joint Venture	open

<sup>1)</sup> Financial years beginning on or after the date indicated.

There is expectation that amendments to IFRSs will have a significant impact on the financial reporting of the companies of Tele Columbus AG.

## E. Explanatory notes to the consolidated income statement and consolidated statement of financial position

### E.1 Revenue

KEUR	2019				2018
	TV	Internet & Telephony	Other	Total	Total
<b>Revenue from contracts with customers</b>	<b>243,414</b>	<b>154,703</b>	<b>79,093</b>	<b>477,210</b>	<b>473,237</b>
Analogue	196,180	-	-	196,180	204,750
Internet / telephony	-	142,683	14,133	156,816	153,051
Additional digital services	29,754	-	-	29,754	28,154
Other transmission fees and miscellaneous feed-in charges	14,236	10,118	-	24,354	25,160
Construction services	-	-	28,725	28,725	23,238
Network capacity	-	-	13,301	13,301	12,254
Computing centre	-	-	3,547	3,547	3,770
One-off fees for B2B customers	-	-	10,126	10,126	8,459
Antenna / maintenance	901	788	563	2,252	2,171
Hardware sales	61	36	8,398	8,495	3,580
Other	2,283	1,078	300	3,662	8,649
<b>Revenue from renting</b>	<b>10,073</b>	<b>5,815</b>	<b>6,307</b>	<b>22,195</b>	<b>21,144</b>
Receiver rent	10,073	5,815	-	15,887	15,026
Network infrastructure rent	-	-	6,307	6,307	6,118
	<b>253,487</b>	<b>160,518</b>	<b>85,400</b>	<b>499,405</b>	<b>494,381</b>

The revenues of the companies of Tele Columbus AG mainly comprise monthly subscription fees and, to a small extent, one-off installation and connection charges for basic analogue and digital cable television as well as premium ancillary digital services. They also include fees for high-speed internet access and telephony charges. Other revenue includes other transmission fees and feed-in fees paid as consideration for the distribution of programmes to the companies of Tele Columbus AG, as well as construction services.

### E.2 Own work capitalised

Own work capitalised in the amount of KEUR 22,591 in 2019 (2018: KEUR 20,753) mainly comprises expenses for work performed by our own employees in connection with expanding the cable network.

Notes to the consolidated financial statements  
as at 31 December 2019

### E.3 Other income

KEUR	2019	2018
Gains on disposal of non-current assets	1,805	3,507
Income from dunning fees	1,049	1,203
Income from the de-recognition of liabilities and reversal of provisions	928	6,399
Income from marketing subsidies	417	2,030
Income from sale	264	1,898
Other income from bad debt	-4	1,045
Miscellaneous other income	4,934	8,385
	<b>9,393</b>	<b>24,467</b>

Payments and increases in value that are not directly related to the corporate purpose are recognised in other income.

### E.4 Cost of materials

KEUR	2019	2018
Cost of raw materials and supplies	-1,524	-2,978
Cost of purchased services / goods	-169,421	-178,527
	<b>-170,945</b>	<b>-181,505</b>

Costs of raw materials, supplies and operating materials were for goods used for doing repair and maintenance work.

The cost of purchased services mainly relates to fees for the reception of signals, construction services, maintenance costs, commissions, electricity and other services as well as changes in inventories of customer terminals.

### E.5 Employee benefits

KEUR	2019	2018
Wages and salaries	-63,913	-65,200
Social contributions and expenses for pension provisions	-11,476	-10,883
Other personnel costs	-2,347	-3,293
	<b>-77,736</b>	<b>-79,376</b>

Notes to the consolidated financial statements  
as at 31 December 2019

## E.6 Other expenses

KEUR	2019	2018
Legal and advisory fees	-19,200	-26,555
Advertising	-10,880	-12,342
IT costs	-6,974	-8,839
Impairment on receivables	-5,396	-9,223
Occupancy costs	-5,161	-8,774
Communication costs	-2,999	-2,818
Vehicle costs	-2,676	-3,045
Non-period expenses	-2,401	-1,090
Insurance, fees and contributions	-1,725	-1,568
Travel expenses	-1,654	-1,724
Maintenance	-1,478	-2,084
Office supplies and miscellaneous administrative expenses	-1,054	-1,283
Incidental bank charges	-942	-1,077
Losses on disposal of non-current assets	-736	-1,124
Miscellaneous other expenses	-5,252	-7,625
	<b>-68,528</b>	<b>-89,171</b>

## E.7 Amortisation, depreciation and write-downs

Depreciation, amortisation and impairment of non-current assets amounted to KEUR 184,177 (2018: KEUR 283,003), of which KEUR 85 (2018: KEUR 124,209) was attributable to impairment.

## E.8 Interest income and expenses

KEUR	2019	2018
Interest and similar income from third parties	91	308
<b>Interest and similar income</b>	<b>91</b>	<b>308</b>
Interest paid to third parties	-56,000	-68,834
Expenses resulting from compounding of loans and bond under the effective interest rate method	-6,481	-5,337
Expenses resulting from revaluation of interest caps	-95	-1,484
<b>Interest and similar expenses</b>	<b>-62,576</b>	<b>-75,655</b>
	<b>-62,485</b>	<b>-75,347</b>

The interest paid mainly relates to liabilities to banks and liabilities arising from the senior secured notes.

Notes to the consolidated financial statements  
as at 31 December 2019

## E.9 Other finance income/costs

KEUR	2019	2018
Value adjustment due earn-out liability	145	-2,329
Value adjustment due to refinancing	864	1,218
Value adjustment of embedded derivatives	-5,122	-1,296
	<b>-4,112</b>	<b>-2,407</b>

## E.10 Income tax expense

KEUR	2019	2018
Income from deferred taxes	9,254	11,192
Current deferred taxes, current year	-4,046	-3,118
Current deferred taxes, previous years	-3,947	1,743
<b>Deferred tax income / loss</b>	<b>1,261</b>	<b>9,817</b>

The following table shows the reconciliation of annual profit multiplied by the effective tax rate to income taxes:

KEUR	2019	2018
Earnings before tax (EBT)	-36,762	-171,213
Group's tax rate	30.82%	30.43%
<b>Expected tax expense (-) / income (+)</b>	<b>11,330</b>	<b>52,104</b>
Adjustments of temporary differences	-	-635
Effects due to changes in tax rates	-1,589	968
Adjustments for changes in recognition	-1,300	-3,554
Trade tax additions / subtractions	-2,101	-1,937
Non-deductible expenses	-443	-543
Non-taxable income	0	31
Amortization goodwill	0	-38,225
Consolidation effects	-656	167
Taxes for previous years	-3,947	1,743
Other differences	-33	-302
<b>Reported income tax expense (-) / income (+)</b>	<b>1,261</b>	<b>9,817</b>

Notes to the consolidated financial statements  
as at 31 December 2019

The overall tax rate of 30.82% (2018: 30.43 %) corresponds to the weighted tax rate for the consolidated entities. The reduction is due to the change in the trade tax multiplier for the taxable group.

Because of the potential risk of retrospective tax payments due to a tax audit at subsidiary level, the Tele Columbus AG as the parent company and other tax debtors recorded liabilities for uncertain income tax payments.

Adjustments for recognizing changes result particularly from not capitalizing interest carryforwards as well as from corrections of loss carried forwards to lower values.

Impairment losses on goodwill were recognised in the financial year under review, which had no impact on the current as well as the deferred taxes.

Deferred tax assets and liabilities are recognised for the following types of temporary differences and loss carryforwards:

KEUR	31 December 2019	31 December 2018
Property, plant, and equipment	6,875	3,682
Financial assets (without derivatives) and other assets	15,815	9,230
Intangible assets	9,567	8,473
Tax loss and interest carry forwards	12,689	19,710
Derivatives	3,091	1,382
Liabilities and provisions	12,839	8,736
Offset	-56,781	-49,620
<b>Deferred tax assets</b>	<b>4,096</b>	<b>1,593</b>
Property, plant, and equipment	-4,240	-5,074
Intangible assets	-55,033	-50,083
Receivables and other assets	-2,813	-2,023
Liabilities and provisions	-21,542	-25,384
Derivatives	-695	-305
Offset	56,781	49,620
<b>Deferred tax liabilities</b>	<b>-27,544</b>	<b>-33,249</b>
Change	8,208	11,210
of which through profit or loss	9,254	11,192
thereof recognised by consolidation (current assets)	0	184
of which not through profit or loss through consolidation (intangible assets)	-1,378	
of which offset against other comprehensive income (provisions)	332	-166

The deferred tax assets and liabilities recognised in other comprehensive income result from measurement differences in pension provisions.

All other changes in deferred tax items were recognised as deferred income tax expense/income.

Notes to the consolidated financial statements  
as at 31 December 2019

At group level there are construction projects which, in contrast to the tax law, are reported in accordance with the regulations of IFRS 15 and are therefore based on a period-related revenue recognition. Thus, in the tax balance sheet inventories are being capitalized and payments received are being passivated, whereas according to IFRS, receivables are reported on the balance sheet. This results in changes in deferred tax items among “Financial Assets (excluding derivatives) and other assets”, “receivables and other assets” and “liabilities and provisions”.

Deferred tax assets for property, plant and equipment and intangible assets particularly result from higher amounts recognised for these assets in supplementary statements of financial position and from the effects of intercompany profit elimination within the Group. Deferred tax assets in connection with liabilities and provisions result in particular from provisions for impending losses that are not tax deductible and from the recognition of liabilities from lease contracts.

Deferred tax liabilities particularly result from the identification of intangible assets (particularly the customer base) in the context of acquisitions and from the fair value measurement of property, plant and equipment performed in connection with this.

No deferred tax assets were recognised on the following temporary differences, tax loss carryforwards and interest carryforwards:

KEUR	31 December 2019	31 December 2018
Temporary differences	0	6,916
Trade tax loss carry-forwards	0	466
Corporate tax loss carry-forwards	0	468
Interest carry-forwards	170,338	149,396

Not included in the recognition basis for deferred taxes are 5% of the differences between the recognition of the pro-rata equity of the subsidiaries and the lower corresponding investment valuations recognised in the financial statements for tax purposes (outside basis differences) of KEUR 1,026 (2018: KEUR 873). A realisation is currently not planned. On disposal, 5% of the sales proceeds would be subject to taxation.

## E.11 Property, plant and equipment

The following tables show the movements in carrying amounts of property, plant and equipment and intangible assets in the year from 1 January to 31 December 2019, and for the comparative period from 1 January to 31 December 2018.

## Notes to the consolidated financial statements as at 31 December 2019

### Movements in intangible and fixed assets during the financial year 2019

## E.12 Impairment testing of intangible assets and goodwill

The annual impairment test on goodwill and on intangible assets under development pursuant to IAS 36 was performed as at 31 December 2019. There are no other intangible assets with an indefinite useful life.

### E.12.1 Result of impairment testing of intangible assets under development

As in the previous year, no impairment was required to be recognised in relation to the assets included in intangible assets under development as at 31 December 2019.

### E.12.2 Result of impairment testing of goodwill

Goodwill and intangible assets under construction are reviewed at CGU level: There are three CGUs to which goodwill is allocated: TV (relates to the product segment "TV"), internet and telephony (relates to the product segment "internet and telephony") and HLkomm (relates in particular to the business customer area of the segment "others").

#### E.12.2.1 Cash-generating units (CGUs)

Goodwill and intangible assets under development are tested at CGU level. There are three CGUs to which goodwill is allocated: TV (product segment "TV"), Internet and Telephony (product segment "Internet and Telephony", and HL komm (especially business customer area of "Other" segment).

The following table shows the allocation of goodwill to the CGUs:

KEUR	31 Dec 2019	31 Dec 2018
TV	395,511	391,140
Internet and Telephony	594,019	594,019
HL komm	50,068	50,068
<b>Total</b>	<b>1,039,598</b>	<b>1,035,227</b>

If the carrying amount of a CCU including goodwill is higher than the recoverable amount, then an impairment loss is recognised in accordance with IAS 36. The recoverable amount was calculated as fair value less costs to sell.

As in the previous year, fair value was determined based on the weighted average cost of capital (WACC) in line with the discounted cash flow (DCF) method. This measurement method is based on the financial planning approved by the management for each segment/CGU over a detailed planning horizon of five years, which is also used for the purposes of managing the segments. The key ratios in this regard are EBITDA (based on revenue and cost development) and investment planning (capex).

Notes to the consolidated financial statements  
as at 31 December 2019

Starting with normalised EBITDA and capex – i.e. the key performance indicators – the inputs used for normalisation of EBITDA were again added, and free cash flow after tax was determined (taking account of investment planning and planned changes in working capital, among other things), which is the key variable used for the DCF method during the detailed planning period.

For the period after the detailed planning, a projected sustainable cash flow is derived for each CGU based on the last year of the detailed planning, taking account of planned growth rates of 1.00% (2018: 1.00%) for the TV CGU and 1.25% (2018: 1.25%) for the Internet and Telephony CGU and the HL komm CGU.

The assumptions made were derived from sector comparisons and historical experience.

The discount rate was determined based on a risk-free basic interest rate of 0.20% (2018: 1.00%) and relevant industry parameters. The WACC after taxes is 5.55% (2018: 5.33 %) for both the TV and the Internet and Telephony CGUs, while the WACC before taxes is 7.60% (2018: 6.95%) for the TV CGU and 7.40% (2018: 7.16%) for the Internet and Telephony CGU. With regard to the HL komm CGU, a WACC of 7.62% (2018: 7.56%) after taxes and 10.29% (2018: 11.12 %) before taxes was calculated. The difference in the interest rate compared to the TV and the Internet and Telephony CGU reflects the elevated risk of this business, particularly with business customers.

#### **E.12.2.2 Sensitivity analysis**

The impairment test for goodwill is based on the material assumptions presented in the preceding section. For the sensitivity analysis, the management accordingly defined which changes in these assumptions were possible on the basis of experience and could potentially lead to an impairment loss. In accordance with IAS 36, the calculations were performed on the assumption that these changes did not result in any further changes in parameters (*ceteris paribus*). In the normal course of business, such changes are correlated with other factors and indicate changes in the way in which the management manages the company.

The following tables show the changes considered possible in relation to the CGUs that could lead to impairment of goodwill (in the case of the Internet and Telephony CGU and the HL komm CGU) or could increase impairment of goodwill (in the case of the TV CGU) in this scenario. In addition, the following table shows the maximum level of change in the assumption that would not be expected to result in impairment (threshold).

Notes to the consolidated financial statements  
as at 31 December 2019

<b>KEUR - Sensitivities segment TV</b>	<b>31 December 2019</b>	<b>31 December 2018</b>
Assumption: increase in Interest rate by 1% or 3% to 6.55% or 8.55%		
possible impairment of carrying amount	-150,972 / -340,514	---- / -472,664
threshold of change in % points	0.04	-0.55
Assumption: decrease in long-term EBITDA of 15% to an EBITDA margin of 37%		
possible impairment of carrying amount	-169,674	-310,473
threshold of change in % points	-0.57	10.00
Assumption: no long-term growth, i.e. growth-rate of 0%		
possible impairment of carrying amount	-114,435	-249,152
threshold of change in % points	-0.05	1.68

<b>KEUR - Sensitivities Internet and Telephony</b>	<b>31 December 2019</b>	<b>31 December 2018</b>
Assumption: increase in Interest rate by 1% or 3% to 6.55% or 8.55%		
possible impairment of carrying amount	-183,542 / -402,987	---- / -417,667
threshold of change in % points	0.02	0.06
Assumption: decrease in long-term EBITDA of 15% to an EBITDA margin of 55%		
possible impairment of carrying amount	-221,206	-228,921
threshold of change in % points	-0.25	-0.84
Assumption: no long-term growth, i.e. growth-rate of 0%		
possible impairment of carrying amount	-175,749	-182,890
threshold of change in % points	-0.02	1.18

Furthermore, and also with regard to the other CGUs, there are no changes of assumptions that management considers to be feasible within a year and which would lead to an impairment of goodwill.

As in the previous year, there are no possible scenarios for any of the parameters in the HL komm CGU that could lead to impairment of goodwill in the event of changes in assumptions.

### E.12.3 Result of impairment testing of intangible assets with finite useful lives

Intangible assets with a carrying amount of KEUR 1,273,940 (2018: KEUR 1,258,734) comprise goodwill of KEUR 1,039,596 (2018: KEUR 1,035,227), customer bases of KEUR 127,379 (2018: KEUR 150,499), customer commissions of KEUR 27,897 (2018: KEUR 22,538) and other intangible assets of KEUR 79,068 (2018: KEUR 50,471).

The other intangible assets mainly relate to capitalised expenses for the acquisition of new customers as well as capitalised rights, assets, and software licences. As these are intangible assets with a finite useful life, they are only impairment-tested if there is any indication of impairment. As in the previous year, there were no indications of possible impairment on other intangible assets with finite useful lives.

### E.13 Inventories

KEUR	31 December 2019	31 December 2018
Raw materials and supplies	5,465	7,638
Work in progress	121	977
<b>Inventories</b>	<b>5,586</b>	<b>8,615</b>

Inventories comprise of network materials, electronic and mechanical components, spare parts for repairs and maintenance, end-customer hardware and, to a small extent, work in progress.

Impairment losses on inventories are reported in the cost of materials. In financial year 2019, impairment losses amounted to KEUR 379 (2018: KEUR 319).

### E.14 Current and non-current assets

Current and non-current assets comprise trade receivables, other financial receivables and other assets, prepaid expenses and derivative financial instruments.

Notes to the consolidated financial statements  
as at 31 December 2019

**E.14.1 Trade receivables**

KEUR	31 December 2019	31 December 2018
Trade and other receivables - gross	79,113	70,252
thereof contract assets	3,570	9,277
Impairment losses	-17,317	-14,023
<b>Trade and other receivables - net</b>	<b>61,796</b>	<b>56,229</b>

Trade receivables mainly include receivables from subscription fees and from signal delivery, transmission and feed-in fees.

Trade receivables include contract assets according to IFRS 15 of KEUR 3,571 (31.12.2018: KEUR 9,277). Contract assets mainly comprise the Group's claims to consideration for construction services that had been completed but not yet invoiced as at the reporting date and have a term of less than one year. Contract assets are attributable to customer contracts associated with contract manufacturing. The decline in the financial year is mainly due to completion and invoicing of a construction phase.

In addition, there are trade receivables from related parties.

**E.14.2 Other assets**

Other financial receivables chiefly consist of cash deposits for the debit limit, rent deposits, and claims from employer pension liability insurance for pensions that do not qualify as plan assets.

Other assets mainly include advance payments and creditors with debit balances.

The reported derivative financial instruments relate to embedded derivatives of the senior secured notes issued in May 2018.

Prepaid expenses mainly consist of payments in connection with insurance policies, maintenance contracts and rents.

### E.14.3 Impairment of current and non-current financial assets

Impairment losses are recognised in the item "Other expenses".

There are no overdue receivables for which no impairment loss was recognised. Impairment losses on trade receivables were mostly recognised as lump-sum specific allowances in line with the dunning level and maturity structure. Movements in the allowances for trade receivables were as follows:

<b>KEUR</b>	
<b>Impairment losses per 31 December 2018</b>	<b>14,023</b>
additions	6,106
use of allowance	-2,101
reversal	-710
<b>Impairment losses per 31 December 2019</b>	<b>17,317</b>

As in the previous year, no impairment losses were recognised on other short- and long-term financial assets. No impairment losses were also recognised for the contract assets included in trade and other receivables and cash and cash equivalents.

### E.15 Assets held for sale

Assets held for sale reported in the statement of financial position in the amount of KEUR 2 (2018: KEUR 249) consist of non-current assets.

### E.16 Equity

The share capital of KEUR 127,556,251 consists of 127,556,251 no-par-value registered shares and is fully paid. No treasury shares were held as at the reporting date. Compared to the previous year, there were no changes in the share capital or in the treasury shares held.

#### *Authorised capital*

In accordance with the resolution of the annual general meeting on 15 May 2015, the Management Board is authorised to increase the Company's share capital with the approval of the Supervisory Board on one or more occasions by a total not exceeding EUR 1,925,693 by issuing new no-par value registered shares against contributions in cash or in kind (Authorised Capital 2015/I). This corresponds to around 1.5% of the current share capital. This authorisation applies from 15 September 2015 until 14 May 2020.

Notes to the consolidated financial statements  
as at 31 December 2019

*Contingent capital*

In accordance with the resolution of the annual general meeting on 15 May 2015, the Company's share capital can be increased contingently by up to EUR 28,345,833 by issuing up to 28,345,833 new registered no-par value shares (Contingent Capital 2015/I). This authorisation expires on 14 May 2020 (midnight).

*Revaluation reserve IAS 19*

The revaluation reserve consists of the following components:

31 December 2019

KEUR	Gross value	Deferred taxes	Net value
Revaluation reserve for employee benefits pursuant to IAS 19	-3,319	1,426	-1,893
	<b>-3,319</b>	<b>1,426</b>	<b>-1,893</b>

31 December 2018

KEUR	Gross value	Deferred taxes	Net value
Revaluation reserve for employee benefits pursuant to IAS 19	-2,536	811	-1,725
	<b>-2,536</b>	<b>811</b>	<b>-1,725</b>

An amount of KEUR 623 (2018: KEUR 578) from share-based payment was recognised in equity.

Movements in equity and distributions to non-controlling interests are shown in the consolidated statement of changes in equity.

## **E.17 Pension plans and other long-term employee benefits**

There are pension entitlements for employees of individual companies that were acquired by Tele Columbus Group in previous financial years. Entitled employees or (former) managers can claim their pensions from the age of 60 onwards if they were employed by the same company for at least five years. Pension benefits can first be claimed between the age of 60 and 65. It is possible in some cases to claim a pension earlier against reduced payments.

Pension benefits may consist of fixed pension benefits and/or pension benefits dependent on salary progression for the person entitled to benefits. Pension benefits may also include disability benefits or a survivor's pension.

Notes to the consolidated financial statements  
as at 31 December 2019

Some pension benefits are secured by so-called plan assets, which in the event of insolvency may only be utilised to satisfy the claims of the persons eligible for pension benefits.

The entitled employees do not make separate contributions to the pension plans. The amount of future payments is dependent, in particular, on the increase of pension entitlements when benefits fall due and on interest on plan assets. The defined benefit plans subject the companies of Tele Columbus AG to actuarial risks, such as longevity risk and interest-rate risk. The obligations arising from the plans are financed exclusively by the respective subsidiary.

The date at which pension entitlements are paid out depends on the individual contractual arrangements for the entitled employees. The point in time when payments commence is not pre-determined insofar as the person entitled to benefits has the possibility of influencing commencement within certain margins.

The period assumed for benefit payments is set by the 2018 guideline tables of Dr Klaus Heubeck, Cologne.

The development of salaries and wages assumed does not have any significant influence on the amount of provisions or payments, as the majority of persons entitled to benefits have already started receiving them.

Long-term employee benefits comprise provisions for employee benefits, provisions for partial retirement, and provisions for jubilee or other long-service benefits.

KEUR	31 December 2019	31 December 2018
Pension commitments	8,651	7,820
Commitments for partial retirement and anniversaries	1,879	1,676
	<b>10,531</b>	<b>9,496</b>

Post-employment benefits and partial retirement, jubilee or other long-service benefits falling due in the subsequent financial year amount to KEUR 534 (2018: KEUR 568).

The following table shows the reconciliation of the present value of defined benefit obligations (DBO) to their carrying amounts:

KEUR	31 December 2019	31 December 2018
Present value of defined benefit obligations (DBO)	10,084	9,291
Plan assets	-1,433	-1,471
Pension commitments	<b>8,651</b>	<b>7,820</b>

Notes to the consolidated financial statements  
as at 31 December 2019

The present value of the defined benefit obligations is divided into capital-backed and non-capital-backed pension plans:

KEUR	31 December 2019	31 December 2018
Present value of defined benefit obligations (DBO) – capital-backed plans	3,058	2,636
Present value of defined benefit obligations (DBO) – non-capital-backed plans	7,026	6,655
	<b>10,084</b>	<b>9,291</b>

The present value of the pension obligations developed during the reporting period as follows:

KEUR	31 December 2019	31 December 2018
Present value of defined benefit obligations as of 1 January	9,291	11,804
Current service cost	11	13
Interest expense	154	145
Actuarial gains for adjustments made due to experience	-39	-299
Actuarial losses for adjustments made due to demographic changes	78	78
Actuarial gains for adjustments made due to experience	1,824	-343
Benefits paid	-1,235	-2,107
<b>Present value of defined benefit obligations as of 31 December</b>	<b>10,084</b>	<b>9,291</b>

As in the previous year, the present value is calculated based on a weighted average duration of 12 years. The duration is the weighted average remaining term for which pension benefits are paid to eligible persons.

The benefit payments are expected to be at the level of financial year 2019 or slightly higher.

The following table shows the movements in plan assets:

KEUR	31 December 2019	31 December 2018
Plan assets as of 1 January	1,471	2,758
Interest income from plan assets	15	49
versicherungsmathematische Gewinne/Verlust	32	-
Benefits paid	-86	-1,336
<b>Plan assets as of 31 December</b>	<b>1,433</b>	<b>1,471</b>

Plan assets consist of employer pension liability insurance, the management and capital investment of which are the insurer's sole and exclusive responsibility. Insurance companies predominantly invest in fixed-interest securities and also to some extent in shares and real estate. There is no particular concentration of risk in individual plan asset classes. As in the previous year, no employer contributions are expected in the following year. Plan asset payments expected in the following year amount to KEUR 534 (2018: KEUR 568).

The following expenses were incurred for post-employment benefits:

Notes to the consolidated financial statements  
as at 31 December 2019

KEUR	2019	2018
Current service cost	-11	-13
Net interest expense	-138	-96
	<b>-149</b>	<b>-109</b>

Current service costs are recognised under employee benefits. The net interest expense is recognised under interest expenses.

The present value of the pension obligations is calculated based on the following significant assumptions:

%	31 December 2019	31 December 2018
Interest rate	0.8 - 2.82	1.7 - 3.29
Anticipated increase in salaries and wages	0.0 - 3.0	0.0 - 3.0
Future pension increase	0.0 - 2.0	0.0 - 2.0
Fluctuation	0.0 - 0.5	0.0 - 0.5

Under otherwise identical conditions, a potential change in one of the significant actuarial assumptions that could have been reasonably expected by the reporting date would have changed the defined benefit obligation as follows:

**Sensitivity analysis** <sup>1)</sup>

KEUR	31 December 2019		31 December 2018	
	Defined benefit obligation		Defined benefit obligation	
	Increase	Decrease	Increase	Decrease
Discount rate (1.00% change)	-8,823	-11,004	-7,450	9,433
Future pension increase (0.25% change)	-10,056	-9,605	8,430	-8,311

<sup>1)</sup> The sensitivities were determined irrespective of the plan assets.

Fluctuation and expected salary increases are considered to be insignificant estimates of sensitivity. The expected fluctuation and salary increase are not material due to the low proportion of active employees.

Expenses for defined contribution plans amounted to KEUR 5,320 in 2019 (2018: KEUR 4,967).

In addition to the plan assets, there are reinsurance entitlements of KEUR 1,578 (31 December 2018: KEUR 1,586), which do not qualify as plan assets within the meaning of IAS 19 and are thus recognised as other financial receivables.

## E.18 Share-based payment

As at 23 January 2015, two share-based payment programmes for the long-term, sustainable corporate development of Tele Columbus AG came into effect: the Matching Stock Programme (hereinafter referred to as "MSP") for the Management Board and the Phantom Options Programme (hereinafter referred to as "POP") for selected man-

Notes to the consolidated financial statements  
as at 31 December 2019

managerial staff. The MSP and the POP create a long-term incentive to work towards the success of the company.

*Description of the share-based payment programmes*

Depending on the development of the share price and other vesting conditions, the MSP and POP grant the option of receiving shares in Tele Columbus AG.

The MSP requires an own investment in shares of the Tele Columbus AG (i.e. MSP shares). Each MSP share acquired entitles the bearer to receive 4.5 virtual shares (MSP phantom stocks) per allocated tranche. The number of subscription rights – in this case, MSP phantom stocks – is determined by the Supervisory Board.

MSP-shares are deposited in a blocked securities account for the entire duration of the programme. There are no further restrictions on disposal. The shares thus have full rights to participate in dividends and subscription rights. MSP Phantom Stocks are, however, subject to restriction of sale.

Notes to the consolidated financial statements  
as at 31 December 2019

The payment programme is divided into five MSP tranches. Each tranche of the allocated MSP Phantom Stocks is subject to a vesting period of four years. The first time an MSP tranche was allocated was on 23 January 2015, with the vesting period ending on 22 January 2019. The second MSP tranche was allocated on 23 January 2016 and the vesting period will end on 22 January 2020. The other tranches are each allocated on 23 January of the subsequent years. However, the fourth tranche was allocated on 28 September 2018. Depending on the exercise conditions being met, an MSP tranche can be converted into taxable compensation. This compensation must be used to acquire shares in Tele Columbus AG. The shares are purchased at the prevailing market price on the exercise date and are subject to an exercise period of two years that begins when the vesting period ends. After the end of the exercise period, subscription rights that have not been exercised expire without substitution. The exercise conditions of each allocated tranche depend on the share performance during the vesting period. This is determined from the basis price, defined as the closing price of the company's share in XETRA trading or a similar trading system replacing Xetra on the Frankfurt Stock Exchange within the last trading day before the grant date, and the exercise price, defined as the average weighted closing share price (XETRA trading on the Frankfurt Stock Exchange) within the last 30 trading days before the beginning of the respective exercise period. The exercise hurdle is defined by the Supervisory Board when the respective tranche is allocated, and amounts to at least 120% of the exercise price. If a dividend payment or another subscription right relates to the MSP Phantom Stocks, this amount is deducted from the respective base price.

The Phantom Options Programme for selected managers does not require an own investment in shares of Tele Columbus AG. Each participant is allocated a certain number of Phantom Options (i.e. POP-Tranche) by the Management Board after approval of the Supervisory Board. Further conditions of this programme resemble those of the MSP.

Notes to the consolidated financial statements  
as at 31 December 2019

*Measurement of fair value*

The fair values of the issued subscription rights on the grant date were determined by an independent expert based on the binomial options pricing model (Cox-Ross-Rubinstein).

The inputs used in the measurement of the fair values of the equity-settled share-based payment plans incorporate the following assumptions:

**Matching Stock Programm (MSP)**

	2015	2016	2017	2018	2019
	Tranche 1	Tranche 2	Tranche 3	Tranche 4	Tranche 5

Exercisable options as of 31 December	-	92,744	-	-	-	-	-	-	-	-	-	-

The outstanding subscription rights of the first tranche as at 31 December had a weighted-average contractual life of four years, and those of the second to fifth tranche of five years.

As a result of the MSP and POP programmes, an amount of KEUR 623 (2018: KEUR 578) was recognised as personnel expenses and in equity, as the programmes are to be settled with equity instruments.

Notes to the consolidated financial statements  
as at 31 December 2019

## E.19 Other provisions

The following table shows the development of other provisions in the current financial year:

KEUR	1 Jan 2019	Additions from changes in consolidated entities	Utilisation	Reversal	Additions	Discounting/unwinding of discount	31 Dec 2019
Additional claim for tax audit risks	6,267	-	-	-	115	-	6,382
Restructuring	781	-	781	-	256	-	256
Litigation provisions	1,005	5	412	305	158	-	451
Rückbauverpflichtungen	1,753	-	-	271	71	58	1,611
Onerous contracts	491	-	491	-	119	-	119
Retention requirements	504	1	-	27	7	1	486
Warranty provision	365	-	-	-	137	-	503
Other provisions	1,081	-	3	-	176	-	1,255
	12,248	6	1,687	603	1,039	59	11,062

The other provisions reported as at 31 December 2019 can be divided into current obligations of KEUR 8,992 (2018: KEUR 9,527) and non-current obligations of KEUR 2,070 (2018: KEUR 2,721).

The companies of Tele Columbus AG have recognised provisions for possible obligations to make additional payments for the settlement of future costs from tax audits at the level of individual subsidiaries.

The litigation provisions mainly relate to disputed claims.

The provisions for asset retirement obligations were mainly recognised in relation to the main registered office of the Company in Berlin.

## E.20 Liabilities to banks and due to the senior secured notes

KEUR	31 December 2019	31 December 2018
Liabilities to banks and from the bond issuance - nominal values	1,435,028	1,436,122
Transaction costs	-43,044	-42,248
Accrued interest	9,560	3,492
Liabilities in connection with embedded derivatives	2,886	3,449
<b>Long-term liabilities to banks and from the bond issuance</b>	<b>1,404,430</b>	<b>1,400,814</b>
Liabilities to banks and due bond - nominal values	28,213	15,940
Accrued interest	676	264
Transaction costs	-1,144	-1,144
<b>Short-term liabilities to banks and from the bond issuance</b>	<b>27,745</b>	<b>15,059</b>
	<b>1,432,175</b>	<b>1,415,873</b>

Notes to the consolidated financial statements  
as at 31 December 2019

Current and non-current liabilities comprise credit facilities concluded by Tele Columbus AG under the senior facilities agreement and senior secured notes (bond) of KEUR 1,428,489 (2018: KEUR 1,409,980) and other individual loans and liabilities of subsidiaries in the amount of KEUR 3,686 (2018: KEUR 5,893).

### E.20.1 Liabilities to banks from the senior facilities agreement

The following credit facilities are available to the Group under the senior facilities agreement: KEUR 707,463 (A2 term loan facility), KEUR 75,000 (75m term loan) and a facility of KEUR 50,000 for working capital financing (revolving facility).

The margin is 3.00% p.a. plus EURIBOR for the A2 facility, 4.25% p.a. for the 75m term loan and 3.75% p.a. for the revolving facility. In addition, the loan agreements include a EURIBOR floor of 0% for all facilities. For the unused parts of the revolving facility, a commitment fee amounting to 35% of the applicable margin is calculated, which is payable on a quarterly basis.

The credit facility was partially used as at the reporting date.

For the loans, there is a choice between a one-month, three-month or six-month EURIBOR. As at the reporting date, the A2 term loan facility was based on the six-month EURIBOR while the 75m term loan was based on the three-month EURIBOR.

In addition, the Company Tele Columbus AG has access to KEUR 650,000 from senior secured notes issued in May 2018 with an interest coupon of 3.875% p.a.

The floors in relation to the EURIBOR and the repayment options are embedded derivatives (hybrids) and are subject to the requirement of separate disclosure and measurement stipulated in IFRS 9.

As at the reporting dates, the balances of credit facilities and senior secured notes (including outstanding interest) were as follows:

KEUR	31 December 2019	31 December 2018
Term Loan Facility A2 (term ending on 15 October 2024) <sup>1)</sup>	699,276	696,951
Senior Secured Notes - Anleihe (term ending on 2 May 2025) <sup>2)</sup>	643,740	641,950
Term Loan Facility 75m (term ending on 18 October 2023) <sup>3)</sup>	72,502	71,863
Senior Revolving Facility (term ending on 02. January 2021) <sup>4)</sup>	12,972	-
	<b>1,428,489</b>	<b>1,410,764</b>

<sup>1)</sup> Contains transaction costs not compounded yet for the term loans in the amount of KEUR -18,737 (2018: KEUR -21,352) and embedded derivatives in the amount of KEUR 1,530 (2018: KEUR 1,820) that result from agreed floors and repayment options in the term loans.

<sup>2)</sup> Contains any transaction costs not compounded yet for the Bond in the amount of KEUR -11,241 (2018: KEUR -13,090) and embedded derivatives in the amount of KEUR 782 (2018: KEUR 848), which result due repayment options in bond terms.

<sup>3)</sup> Contains any transaction costs not compounded yet for the Term Loan 75m in the amount of KEUR -3,506 (2018: KEUR -4,314) and embedded derivatives in the amount of KEUR 573 (2018: KEUR 717), which result from agreed floors and repayment options in the term loans.

<sup>4)</sup> Contains any transaction costs not compounded yet for the Revolving Facility in the amount of KEUR -468 (2018: KEUR -880).

Notes to the consolidated financial statements  
as at 31 December 2019

In accordance with the share and interest pledge agreement dated 3 May 2018, interests in affiliated companies and associates are pledged as collateral for liabilities to banks (Term Loan Facility A2, Term Loan Facility 75m, Senior Revolving Facility and Senior Secured Notes). Pledges on interests in affiliated and associated companies may be enforced if the conditions underlying the pledge were in place and the collateralised financial instruments were also terminated. In addition, loans of the companies of Tele Columbus AG are collateralised with trade receivables. In addition, loans recognised by the companies of Tele Columbus AG are covered by trade receivables. The covenant agreements within the financing contracts were met in 2019.

The value of the loan collateral pledged as at the respective reporting date were as follows:

KEUR	31 December 2019	31 December 2018
Shares in affiliates	1,595,232	1,586,514
Trade receivables	4,852	4,852
	<b>1,600,084</b>	<b>1,591,366</b>

#### E.20.2 Other liabilities to banks

There are other individual contractual loan agreements and liabilities between subsidiaries of Tele Columbus AG and banks. As at the reporting date, these result in financial liabilities of KEUR 3,686 (2018: KEUR 5,893). The term of these loan agreements/liabilities varies between 5 and 71 months. Fixed interest rates between 0.63% p.a. and 4.22% p.a. have been agreed for the loans.

#### E.21 Trade payables and other liabilities

KEUR	31 December 2019	31 December 2018
Receivables included in trade receivables and other receivables	75,924	76,503
Contract assets	810	8,397

Trade payables mainly comprise liabilities in connection with signal delivery contracts, services, and supplies and services that had been performed by the reporting date but not invoiced.

Contract liabilities in the amount of KEUR 810 (2018: KEUR 8,397) are included in trade payables as at 31 December 2019.

## **E.22 Deferred income and derivative financial instruments**

Deferred income chiefly consists of advance payments from customers and rents already received, as well as investment grants received.

The reported derivative financial instruments relate to embedded derivatives that are linked to loan agreements concluded with banks.

## **E.23 Other financial liabilities and other liabilities**

Other financial liabilities mainly relate to lease liabilities in the amount of KEUR 108,956 (2018: KEUR 63,443). Long-term lease liabilities amounted to KEUR 86,777 while short term lease liabilities amounted to KEUR 22,179.

Other liabilities mainly relate to value-added tax, customer deposits, employee bonuses, severance payments and other provisions with the nature of liabilities.

## **F. Other explanatory information**

### **F.1 Contingent assets, contingent liabilities, leases and other financial obligations**

#### **F.1.1 Purchase commitments**

Purchase commitments in connection with capital expenditure and operating expenses amounted to KEUR 86.320 as at the reporting date (2018: KEUR 87,826).

#### **F.1.2 Avals**

The guarantees of KEUR 6,146 (2018: KEUR 7,126) mainly consist of rent guarantees and guarantees for licence agreements. In accordance with IFRS requirements, KEUR 5,861 (2018: KEUR 6,811) of these guarantees are not included in the statement of financial position.

Notes to the consolidated financial statements  
as at 31 December 2019

**F.1.3 Leases**

The Tele Columbus Group has a large number of leases, for which, almost exclusively, it acts as lessee. A significant portion of leases account for the leasing of local and regional transmission lines. Furthermore, the Group leases buildings and premises on a larger scale. These serve to accommodate offices for administrative staff, retail stores for end customers and in some instances also technical equipment.

For lease contracts in which the Group is lessee in financial year 2019 the amounts presented hereinafter:

Right-of-use assets from leases are presented as property, plant and equipment in the balance sheet. The values for financial year 2019 have developed as follows:

KEUR	1 January 2019	Additions to rights of use	Depreciation	31 December 2019
IT and workstation infrastructure	1,512	640	-838	1,314
Office equipment	1,087	255	-668	674
Vehicles		283	-51	232
Transmission lines	66,135	23,269	-12,924	76,480
Buildings	15,711	8,667	-3,912	20,466
Technical infrastructure	6,061	4,635	-5,318	5,378
<b>Total</b>	<b>90,506</b>	<b>37,749</b>	<b>-23,711</b>	<b>104,544</b>

The maturities of the lease liabilities as of December 31, 2019 are as follows:

KEUR	31 December 2019
Less than one year	22,179
Between one and five years	59,159
More than five years	27,618
	<b>108,956</b>

The following table shows the reconciliation of future minimum lease payments to the present value of the lease liabilities:

KEUR	31 December 2019
Future minimum lease payments	123,570
Finance costs	-14,614
	<b>108,956</b>

Notes to the consolidated financial statements  
as at 31 December 2019

Future lease obligations from short-term leases and leases based on low-value assets as of 31 December 2019 are as follows:

KEUR	short-term leases	leases based on low-value assets	Total
Less than one year	1,767	251	2,018
Between one and five years	-	146	146
More than five years	-	18	18
	<b>1,767</b>	<b>415</b>	<b>2,182</b>

Amounts recognised in the income statement

For short-term leases and leases based on low value assets, lease payments are expensed on a straight-line basis over the lease term

KEUR	31 Dec 2019
Depreciation expense for usage rights <sup>1</sup>	23,711
Interest expenses for leasing liabilities <sup>2</sup>	3,511
Short-term lease expenses <sup>3</sup>	4,087
Expenses for leases based on low-value assets <sup>3</sup>	380
Expenses for variable lease payments that were not included in the measurement of lease liabilities <sup>3</sup>	1,115
	<b>32,804</b>

(<sup>1</sup> Included in "Depreciation", <sup>2</sup> Included in "Interest and similar expenses", <sup>3</sup> Included in "Material costs" and "Other operating expenses")

Amounts recognised in the statement of cash flows

KEUR	31 Dec 2019
Payments for lease liabilities	32,240
	<b>32,240</b>

<sup>1</sup> The following was designated by the Group:

- payments for the repayment portion of the lease liability as financing activity
- payments for the interest portion of the lease liability as financing activity
- payments made under short-term leases, payments for leases where the underlying asset is a low-value asset and variable lease payments that have been excluded from the measurement of the lease liability as operating activities.

Future variable lease payments are expected to be at the current level.

Due to the exercise of extension and termination options, only minor changes compared to the current level are expected for future cash outflows.

Leases entered into by the Group as lessee but which have not yet commenced will, as things stand at present, result in future additional cash outflows amounting to KEUR 1,504 per year.

Notes to the consolidated financial statements  
as at 31 December 2019

Sale-and-leaseback transactions were only insignificant in financial year 2019. Based on the current status, there are also no extensive sale-and-leaseback transactions planned for financial year 2020.

#### F.1.4 Other financial obligations

In addition to the leases described above, the Group has other financial obligations (mainly from service contracts). Future minimum payments from these contractual relationships have the following maturities:

KEUR	31 December 2019	31 December 2018
Less than one year	24,342	10,344
Between one and five years	18,215	22,960
More than five years	643	13,974
	<b>43,200</b>	<b>47,278</b>

In financial year 2019, expenses from other financial obligations amounted to KEUR 28,656 (2018: KEUR 19,297).

The total minimum payments from finance leases and other financial obligations amounted to KEUR 168,952 as of 31 December 2019 (2017: KEUR 156,716).

#### F.1.5 Expansion and operation of infrastructure network in the district of Plön

On 28. On February 28, 2017, Tele Columbus Group concluded a service concession agreement with the "Zweckverband Breitbandversorgung im Kreis Plön" ("ZBP" - the grantor of the concession) for the construction and operation of an empty pipe and fiber optic network in the area of the Plön district. The Tele Columbus Group has been commissioned with the planning and expansion of the passive broadband network. The agreement runs until December 31, 2041 and the first section was completed and released for use on December 31, 2019. Under the terms of the agreement, ZBP will successively purchase the completed passive broadband network. Tele Columbus Group leases and operates the completed and sold network from the "Zweckverband" and is also responsible for ongoing maintenance. Tele Columbus, as the leaseholder, is responsible for the delivery of multimedia services to the end customers connected to the broadband network.

Notes to the consolidated financial statements  
as at 31 December 2019

Tele Columbus pays the “Zweckverband Breitbandversorgung Plön” a rent which is linked to the net investment costs in the network infrastructure (purchase price) made by the lessor and amounts to a certain percentage of the net investments made by the lessor in the respective calendar year. The lease payable under this procedure shall be recalculated taking into account the investment costs incurred for each investment year. No rent shall be charged in the calendar year in which the investments are made. In the first calendar year following the investment, the rent shall be 1.5%, in the second calendar year thereafter 3.0% and for each subsequent calendar year 6.8%.

The service concession agreement contains a five-year renewal option, which must be notified by the lessee (Tele Columbus) at least 25 months before the end of the contract. After expiry of the contract, the licensor has the choice of using the network itself or selling it. In case of sale, the lessee has a right of first refusal. The extraordinary right of termination remains unaffected.

In the period from January 1 to December 31, 2019, the Group recognized revenues from construction services of KEUR 24,633 with a profit of KEUR 843.

The Group recognized an intangible asset of KEUR 19,484 with a useful life until December 31, 2041, which represents the present value of future lease payments for the completed section 1. The financial liabilities in connection with the intangible asset recognized in the balance sheet amounted to KEUR 18,978 as of December 31, 2019.

As of December 31, 2019, Tele Columbus Group has only concluded the service concession agreement described above.

## **F.2 Related party disclosures**

### **F.2.1 Legal relationships**

Related parties as defined in IAS 24 are all subsidiaries, associates and joint ventures of the companies of Tele Columbus AG, as well as companies with a significant influence over the companies of Tele Columbus AG.

In addition to the Management Board members, persons who are related parties of the companies of Tele Columbus AG also include the members of the Supervisory Board.

Notes to the consolidated financial statements  
as at 31 December 2019

### F.2.2 Transactions with related parties

Transactions by the companies of Tele Columbus AG included in the financial statements with Tele Columbus AG and its subsidiaries are regarded as transactions with related parties.

The following overview shows receivables and payables with related parties:

KEUR	31 December 2019	31 December 2018
Receivables from related entities, short-term	11	6
Payables to related entities, short-term	229	235
Payables to related persons, short-term	352	499

Receivables from and payables to related parties pertain to services exchanged in the context of operating activities and primarily relate to AproStyle AG, Dresden, and companies of the United Internet Group.

Current liabilities to related parties comprise the remuneration of the Supervisory Board.

### F.2.3 Expenses and income from related-party transactions

The following overview shows expenses and income from related-party transactions:

KEUR	2019	2018
<b>Sale of goods and services</b>		
Related entities	1,701	448
<b>Acquisition of goods and services</b>		
Related entities	-8,619	-7,635
<b>Other</b>		
Related entities		
Other income (+) / expenses (-)	-17	-16

#### F.2.4 Information on management remuneration

In the financial year 2019 the Management Board in key positions at Tele Columbus AG consists of the following individuals:

Name	Financial year 2019	Member of management since/ until
Timm Degenhardt	Chief Executive Officer	since 7 September 2017 member of Key Management since 1 January 2018 Chief Executive Officer
Eike Walters	Chief Financial Officer	since 25 June 2018 member of Board of Management; since 15 July 2018 Chief Financial Officer

#### Remuneration of the Management Board

In the current year, the members of the Management Board received total remuneration of KEUR 1,943 (2018: KEUR 1,654). This total remuneration comprises pension benefits granted in the financial year in the amount of KEUR 45 (2018: KEUR 45) and the fair value of the share options granted in the amount of KEUR 283 (2018: KEUR 246).

Individualised disclosures on the Management Board remuneration are presented in the remuneration report, which forms part of the management report.

There were no other material transactions, such as rendering services or granting loans, between the companies of Tele Columbus AG and the members of the Management Board of Tele Columbus AG and their close family members.

The Supervisory Board's remuneration claim in the current year amounts to KEUR 341 (2018: KEUR 426).

## F.3 Financial instruments and risk management

### F.3.1 Carrying amounts and net income from financial instruments

The carrying amounts of the financial instruments, broken down by IFRS 9 category, were as follows as at 31 December 2019:

#### Financial Instruments by category under IFRS 9

KEUR	Measurement category IFRS 9	31 December 2019	31 December 2018
<b>Financial assets</b>			
At Fair Value through profit or loss	Derivative Financial Assets	3,262	1,283
<b>Total</b>		<b>3,262</b>	<b>1,283</b>
Measured at amortised cost	Receivables from related parties	11	6
	Trade receivables and other financial receivables	64,467	49,552
	Cash and cash equivalents	10,128	26,288
<b>Total</b>		<b>74,606</b>	<b>75,846</b>
<b>Financial liabilities</b>			
At Fair Value through profit or loss	Derivative Financial Liabilities	11,045	3,840
<b>Total</b>		<b>11,045</b>	<b>3,840</b>
Measured at amortised cost	Liabilities to banks and due bond issuance	1,432,175	1,415,875
	Liabilities to associates and related parties	580	734
	Trade payables	75,924	68,105
	Other financial liabilities	25,286	7,906
<b>Total</b>		<b>1,533,964</b>	<b>1,492,620</b>
No classification	Lease Liabilities <sup>1)</sup>	108,956	68,538
<b>Total</b>		<b>108,956</b>	<b>68,538</b>

<sup>1)</sup> Taking account of IFRS 9 2.1 (b), lease liabilities are not assigned to any measurement category. Lease liabilities are excluded from the scope of application of IFRS 13 in accordance with IFRS 13.6 (b) and are not allocated to an input hierarchy. They are accounted for in line with the provisions of IFRS 16.

The carrying amounts of the financial assets and liabilities, broken down by items of the statement of financial position, and the hierarchical classification of fair values in accordance with IFRS 13 as at 31 December 2019 and as at 31 December 2018 were made in level 2. It does not contain any information on fair value for financial assets and financial liabilities that were not measured at fair value if the carrying amount represents a reasonable approximation of the fair value. The main methods and assumptions used to determine the fair values of financial instruments and classify them in line with the three-level fair value hierarchy are explained below:

Short-term financial instruments, such as trade receivables, trade liabilities, and receivables and liabilities from related parties are recognised at their respective carrying amount. This represents a reasonable approximation of fair value due to their short maturities.

Long-term financial instruments are recognised at their present value within the Statement of Financial Position.

Notes to the consolidated financial statements  
as at 31 December 2019

The carrying amounts of loans and senior secured notes are not equal to market value, as the interest rates applicable to these liabilities are not adjusted to the prevailing money market conditions until a later date.

For derivatives, there was the option of economic netting on the basis of the existing framework agreements on derivatives trading. Actual offsetting would take place only in the event of the counterparty becoming insolvent. Therefore, there was no netting of derivatives in the accounts in the current financial year, as was also the case with other financial assets and financial liabilities.

The carrying amount of derivative financial assets in the category “at fair value through profit or loss” includes two interest-rate caps of Tele Columbus AG, their carrying amount is not significant (under EUR 500). The fair value of the instruments is determined on the basis of an options pricing model (market comparison method), taking account of inputs and parameters that can be observed directly or indirectly on an active market (level 2).

**Derivative financial assets**

	Reference Amount KEUR	Fair Value as of 31 December 2019 KEUR	Fixed Rate	Duration
Embedded Call in Senior Secured Notes (Bond)	650,000	3,262	3.88%	02.05.2025
Interest Cap 1	550.000	-	0.75%	31.12.2020
Interest Cap 2	550.000	-	0.75%	31.12.2020

Interest caps 1 and 2, which are recognised in the “Other” business model in accordance with IFRS 9, reduce the risk of increased interest payments due to floating-rate financial instruments. These financial instruments cover the Group’s main interest-rate risks from interest-bearing liabilities, but are not classified as hedges for the purposes of hedge accounting in accordance with IFRS.

The loan agreements concluded for credit facilities include embedded derivatives with an interest floor and a repayment option. Although they do not have the role of a derivative in economic terms for the companies of Tele Columbus AG, they are subject to the separation requirement pursuant to IFRS 9 and are therefore classified as separate instruments (at fair value through profit or loss). The instruments are linked to the loan agreements. The model for measuring derivatives subject to the separation requirement determines the market value of the total contracted loan, divided into the host contract and the embedded derivative. Measurement is based on the “two-factor Hull-White” model using the yield curves for risk-free and risk-bearing investments. The model applied was also calibrated using swaption volatilities and the fair value of the underlying liability.

The following table shows the changes in value of liabilities from credit facilities and senior secured notes and the associated derivatives:

Notes to the consolidated financial statements  
as at 31 December 2019

KEUR	Senior Tranche A	Capex Facility	Senior Secured Notes - Bond	Basket Facility	Revolv. Facility	Total
Nominal value of credit facilities and bond as of 31 Dec 2018	707,463	-	650,000	75,000	-	1,432,463
Provision of Rev. Facility during 2019	-	-	-	-	13,299	-
Nominal value of credit facilities and bond as of 31 Dec 2019	707,463	-	650,000	75,000	13,299	1,445,762
Fair value of embedded derivatives financial debts as of 31 Dec 2018	-4,454	-	-	614	-	-3,840
Fair value of embedded derivatives financial debts as of 31 Dec 2018	-	-	1,187	-	-	1,187
Change in other financial result	-6,646	-	1,068	456	-	-5,122
Other changes	-1,015	-	1,015	-	-	-
Fair value of embedded assets financial debts as of 31 December 2019	-	-	3,262	-	-	3,262
Fair value of embedded derivatives financial debts as of 31 December 2019	-12,115	-	-	1,070	-	-11,045

As at 31 December 2019, the fair value of the embedded derivatives (measurement level 2) amounted to KEUR -7,783.

In the event of a 0.5 percentage point increase in credit risk, the fair value of the embedded derivatives would amount to KEUR -9,294.

In the event of a 0.5 percentage point decrease in credit risk, the fair value of the embedded derivatives would amount to KEUR -3,375.

The table below shows the net result in relation to the corresponding financial instrument classification:

**1 Jan to 31 Dec 2019**

KEUR	Gains (+)/losses(-) through profit or loss			
Disclosed in the income statement	Interest	Impairment	Gain (+) /loss (-) from valuation	Net income (loss)
Financial assets and liabilities at fair value through profit or loss	-	-	-5,122 <sup>2)</sup>	-5,122
Financial assets measured at amortised cost	91	-5,396	-	-5,305
Financial liabilities measured at amortised cost	-59,249	-	865	-58,384
Leases <sup>1)</sup>	-3,509	-	-	-3,509
<b>Total</b>	<b>-62,668</b>	<b>-5,396</b>	<b>-4,257</b>	<b>-72,321</b>

<sup>1)</sup> Taking account of IFRS 9 2.1 (b), lease liabilities are not assigned to any measurement category. Lease liabilities are excluded from the scope of application of IFRS 13 in accordance with IFRS 13.6 (b) and are not allocated to an input hierarchy. They are accounted for in line with the provisions of IAS 17.

<sup>2)</sup> Change arising from fair value measurement.

Notes to the consolidated financial statements  
as at 31 December 2019

1 Jan to 31 Dec 2018

KEUR Disclosed in the income statement	Gains (+)/losses(-) through profit or loss			Net income (loss)
	Interest	Impairment	Gain (+)/loss (-) from valuation	
Financial assets and liabilities at fair value through profit or loss	-	-	-2,780 <sup>2)</sup>	-2,780
Financial assets measured at amortised cost	308	-8,178	-	-7,870
Financial liabilities measured at amortised cost	-71,685	-	1,218	-70,467
Leases <sup>1)</sup>	-2,486	-	-	-2,486
<b>Total</b>	<b>-73,864</b>	<b>-8,178</b>	<b>-1,562</b>	<b>-83,603</b>

<sup>1)</sup> Taking account of IFRS 9 2.1 (b), lease liabilities are not assigned to any measurement category. Lease liabilities are excluded from the scope of application of IFRS 13 in accordance with IFRS 13.6 (b) and are not allocated to an input hierarchy. They are accounted for in line with the provisions of IAS 17.

<sup>2)</sup> Change arising from fair value measurement.

The interest-rate caps result in a loss on measurement at fair value of KEUR 95 (2018: KEUR 1,484).

### F.3.2 Risk management of financial instruments

Tele Columbus AG is exposed to the following risks from the use of financial instruments:

- Liquidity risk
- Market risk
- Default risk

Different financial risks arise from the operating activities of the companies of Tele Columbus AG, in particular liquidity risks, interest-rate risks and default risks. The risk management is designed to identify potential risks and to mitigate their negative impact on the Group's financial performance. To this end, the companies of Tele Columbus AG use financial instruments and credit lines.

Risk management is largely conducted through Treasury through continuous monitoring. Financial risks are identified, assessed and hedged in collaboration with the responsible operating units. The companies of Tele Columbus AG are subject to written rules for certain areas, such as interest-rate risk, credit risk, the use of derivatives and other financial instruments, and the use of excess liquidity, which are set out primarily in their facility agreements. Management is regularly informed.

Non-derivative financial instruments result from both the operative business activities as well as from investment and financing activity. The following table defines such instruments:

Scope of activities	Material financial instruments
Operational	Trade receivables
Investing	Long-term receivables
Financing	Liquid funds and loans

#### F.3.2.1 Liquidity risk

Liquidity risk is the risk that existing liquidity reserves are not sufficient to meet financial obligations in a timely manner. Liquidity risks can also arise if outflows of cash should become necessary in light of business operations or investment activity. Liquidity management at Tele Columbus AG aims to ensure that – as far as possible – sufficient liquid funds are always available for the Company to be able to meet its payment obligations when they fall due, under both normal and strained conditions, without suffering unsustainable losses or damaging the Group's reputation. Liquidity risks from financing activities arise, for example, if cash outflows are required in the short term to settle liabilities but cash from operating activities is insufficient to cover expenses and no other liquid assets are available in sufficient quantity for such repayment.

In addition to used credit facility, the Group currently has an unused revolving credit facility of KEUR 50,000 (with a term until 2 January 2021).

Notes to the consolidated financial statements  
as at 31 December 2019

Cash and cash equivalents amounted to KEUR 10,128 as at 31 December 2019 (2018: KEUR 26,288). The Group also regularly reviews other financing options. Based on the existing financing instruments and the possible financing options, there is no liquidity risk in the short and medium term.

The following table shows the contractually agreed maturity dates for liabilities to banks and arising from the senior secured notes; the amounts shown are non-discounted gross amounts.

KEUR	31 December 2019	31 December 2018
Less than one year - not derivative	14,419	2,169
Less than one year - derivative	-	-
Less than one year- interest liabilities (before effects from derivatives)	64,531	64,727
Between one and five years - not derivative	784,569	77,701
Between one and five years - derivative	-	-
Between one and five years- interest liabilities (before effects from derivatives)	191,535	200,462
More than five years- non-derivative	650,458	1,358,421
More than five years - derivative	-	-
More than five years- interest liabilities (before effects from derivatives)	10,497	16,990

The financing agreement on granting credit facilities dated 3 May 2018 contains various covenants whereby the creditor has the option to call in the loans in the event of non-compliance. The fulfilment of said covenants and the capital risk faced by Tele Columbus AG for being a joint-stock company are regularly monitored by the Management Board.

As at the reporting date, liquidity risk in case of non-compliance with these covenants amounted to KEUR 1,459,555 (31 December 2018: KEUR 1,446,168). The risk of non-compliance with these covenants and associated financial regulations could have a negative impact on the credit availability and going concern assumption for the companies of the Group.

Strategic measures regarding compliance with existing covenants and payment obligations have been initiated in order to ensure the liquidity of the companies of the Group on a long-term basis.

In the context of Group financing the aim is to gradually repay financial liabilities using liquidity generated from their operations.

### F.3.2.2 Market risk

Tele Columbus AG is exposed to market risks, particularly due to fluctuations in interest rates. These affect the amount of payment obligations from loans agreements with floating-rate interest.

Tele Columbus AG counters market risks by taking out derivative financial instruments. Derivatives as hedging transactions are acquired for hedging purposes only and are primarily used to hedge against cash flow fluctuations.

Long-term financial instruments bearing variable interest, for which the interest rate is linked to a market interest rate, such as the EURIBOR, are exposed to risks arising from future cash flows. Valuation risks from fixed-rate financial instruments are present only to a small extent.

As well as observing the development of the market price level and actively searching for alternative refinancing, the management of Tele Columbus AG limited interest-rate risk by contractually agreeing interest caps and floors as well as existing termination options.

The identified risks from interest-rate fluctuations for the companies of Tele Columbus AG can be presented on the basis of the following sensitivity considerations:

KEUR	1 Jan to 31 Dec 2019	1 Jan to 31 Dec 2018
Rise of EURIBOR by 0.5 %	-931	-1,495
Drop of EURIBOR by 0.5 %	-	-

This calculation is based on floating-rate liabilities as at the reporting date, taking account of derivative financial instruments (interest-rate caps and floors), multiplied by the adjusted interest rate in each case. Given that the one-, three- and six-month EURIBOR is currently below zero already, the decline in interest expense that would result from an additional decrease in EURIBOR interest rates of 0.5% relates to loans without a EURIBOR interest floor agreement.

### F.3.2.3 Credit risk

Credit risk represents the risk of a financial loss if a debtor is unable to meet its contractual obligations in relation to a financial instrument. Credit risks at Tele Columbus AG primarily result from trade receivables, other receivables and cash and cash equivalents. Trade receivables are due on from other companies and from retail customers. The credit risk is therefore based on the individual risk of the contracting party concerned.

To mitigate credit risk, preventive and other measures are taken as well as the use of debt collecting agencies.

Notes to the consolidated financial statements  
as at 31 December 2019

Preventive measures include reviewing the credit worthiness of a customer in regard to its solvency, experiences from the past, and the review of other factors before a contractual relationship is entered into.

Impairment losses are recognised for overdue receivables at varying percentages depending on the dunning level or maturity intervals. The percentage rates are considered within the estimations from management with regard to the recoverability of the relevant amounts. These estimations are mostly based on past experience. Only trade receivables were value-adjusted in the respective reporting periods. Therefore, the companies of Tele Columbus AG assume that all receivables for which specific allowances have not been made are recoverable.

Other measures include reminders sent automatically to the customer according to a set procedure. For wholesale customers, reminders are sent on a case-by-case basis. The responsible departments decide, considering special agreements with these customers, whether the reminder will be sent. If a customer then does not settle the outstanding payments, the case is referred to a debt collection agency, and in the case of commercial customers, solicitors are involved and/or services to that customer are discontinued.

The following table contains information on the estimated default risk and the expected credit losses for trade receivables (general allowances) and other receivables for individuals (specific allowances) as at 31 December 2019. The gross carrying amount and the allowances refer solely to the trade receivables used as the base for the calculation of the general and specific allowances and do not relate to collected receivables:

**31 December 2019**

KEUR	Loss ratio (weighted average)	Gross carrying amount	Impairment	Direct affect of creditworthiness
not overdue	5 %	1,054	51	No
1 - 60 days overdue	11 %	1,643	185	No
61 - 90 days overdue	19 %	826	154	No
91 - 120 days overdue	29 %	1,225	360	No
120 - 360 days overdue	59 %	2,782	1,643	No
more than 360 days overdue	84 %	6,614	5,558	Yes
		<b>14,144</b>	<b>7,950</b>	

**31 December 2018**

KEUR	Loss ratio (weighted average)	Gross carrying amount	Impairment	Direct affect of creditworthiness
not overdue	0%	5,453	26	No
1 - 60 days overdue	5%	2,818	145	No
61 - 90 days overdue	14%	1,429	201	No
91 - 120 days overdue	23%	2,690	619	No
120 - 360 days overdue	42%	4,873	2,067	No
more than 360 days overdue	81%	4,362	3,547	Yes
		<b>21,625</b>	<b>6,604</b>	

Notes to the consolidated financial statements  
as at 31 December 2019

Tele Columbus AG has chosen the following method:

1. Definition of a default

IFRS 9 contains a rebuttable presumption that a financial asset is in default at the latest when it is 90 days past due (IFRS 9.B5.5.37). For this reason, Tele Columbus AG has determined on the basis of its own reliable historical information that trade receivables can be regarded as in default if they are past due by 360 days or more.

2. Determining the roll rate at which a receivable progresses to the next past-due level

Based on the maturity structure lists for the past twelve months, Tele Columbus AG derives the roll rates at which the respective receivables have progressed from one (past-) due level to the next past-due level. For simplification purposes it is assumed, for example, that receivables not yet due as at 31 January have progressed to the next past-due level – “up to 30 days past due” – in the next month (i.e. as at 28 February). Based on this assumption, the remaining portion of the receivables not yet due as at 31 January has been settled before becoming past due. A roll rate can then be determined on this basis. This represents the probability of a receivable that is not yet due progressing to the next past-due level, “up to 30 days past due”. This process is repeated in the same way for all fields of the maturity structure list, resulting in a matrix for the roll rates.

3. Determining the probability of default for receivables in different (past-) due levels

The next step involves determining the probability that a receivable in the respective (past-) due level will default, i.e. that it will become more than 360 days past due. This means that it is moving towards a claim that is overdue over 360 days. To do so, the roll rates are – for simplification purposes – multiplied by one another.

4. Determining the average probability of default for receivables in different (past-) due levels

To eliminate any non-recurring effects in individual periods, corresponding average figures for the probabilities of default are recognised in the respective (past-) due levels.

Notes to the consolidated financial statements  
as at 31 December 2019

5. Calculation of expected credit losses as at 31 December 2019

In the final step, Tele Columbus AG calculates the expected credit losses as at 31 December 2019. The impairment loss thus amounted to KEUR 17,317 as at 31 December 2019. The change in value compared to the prior period is recognised in profit or loss.

Trade receivables are impaired to the expected recoverable amount in accordance with the procedure for determining lump-sum specific allowances for credit losses. The credit risk for other current financial receivables is assessed on a case-by-case basis. In the case of other non-current financial receivables, expected payments are discounted based on the original effective interest rate. In addition to forward-looking macroeconomic factors, Tele Columbus also includes debtor-specific, geographical and industry-specific characteristics.

The maximum exposure to credit risk as at the reporting date amounted to KEUR 61,807 (2018: KEUR 56,235).

It is assumed that the value-adjusted carrying amount of trade receivables approximately equals their fair value.

There is no significant risk in relation to the hedges taken out, as they are only concluded with financial institutions with good ratings.

No concentration of credit risks from business relationships with individual debtors or groups of debtors can be identified.

Notes to the consolidated financial statements  
as at 31 December 2019

## F.4 Explanatory notes to the consolidated statement of cash flows

Cash and cash equivalents solely comprise cash and bank deposits.

As in the previous year, no cash or cash equivalents were used to collateralise loans or other liabilities.

KEUR	Liabilities			Equity	
	Other liabilities	Finance Lease Liabilities	Liabilities to banks and from the bond issuancee	Non-controlling interests

## F.5 Earnings per share

The calculation of earnings per share is derived from the profit or loss attributable to shareholders and the average number of shares outstanding. The stock option programmes MSP and POP (see E.18 “Share-based payment”) were included in the calculation of diluted earnings per share. Due to the loss situation at Tele Columbus AG, the employee stock options do not have any dilutive effect on earnings per share.

### Determination of the earnings per share

KEUR	1 Jan to 31 Dec 2019	1 Jan to 31 Dec 2018
Profit for the period allocated to shareholders in KEUR	-37,549	-163,850
Weighted average of ordinary shares outstanding (in number of issues)	127,556,251	127,556,251
Undiluted result per share in EUR	-0.29	-1.28
Diluted result per share in EUR	-0.29	-1.28

### Determination of weighted average of ordinary shares outstanding

KEUR	1 Jan to 31 Dec 2019	1 Jan to 31 Dec 2018
Issued ordinary shares as of 1 January	127,556,251	127,556,251
Weighted average of ordinary shares outstanding	127,556,251	127,556,251

## F.6 Segment reporting

### Description of the segments

The Group reports its operating activities in two product segments: “TV” and “Internet and Telephony”. Internal management reports are prepared for these segments on a quarterly basis for management purposes.

Relationships within individual segments are eliminated.

#### “TV” segment

The Group offers basic as well as premium programmes in the “TV” segment. Basic programmes comprise analogue and digital TV and radio broadcasting. The TV packages offered include another 75 digital TV channels, including up to 40 HD-quality stations. This total number of digital stations does not include unencrypted channels.

#### “Internet and Telephony” segment

The Group subsumes internet and telephone services in the “Internet and Telephony” segment. In addition to fixed network services, the product portfolio also includes mobile telephony services. Revenue consists of proceeds from the conclusion of new contracts and installation services as well as monthly contract and service fees.

#### Reconciliation

Notes to the consolidated financial statements  
as at 31 December 2019

Business activities as well as transactions, other events or conditions that are not directly related to the Group's reportable segments are reported under "Other".

Expenses and income not allocated to operating segments are largely attributable to the central functions of management, the legal department, personnel department, finance, purchasing and IT. Revenue not allocated to operating segments mainly relates to revenue with business customers and construction services for third parties.

When calculating normalised EBITDA for the individual segments, the following items attributable to central functions were not taken into account:

in KEUR	1 Jan to 31 Dec 2019	1 Jan to 31 Dec 2018
Revenue B2B customers / construction services	85,400	74,067
Other income	1,693	7,525
Own work capitalised	4,319	2,986
Direct costs	-48,262	-45,096
Personnel expenses	-31,620	-33,865
Other expenses	-28,401	-31,174

Expenses and income are allocated to segments either directly or based on appropriate formulae.

As they also cannot be allocated to the two segments, one-off effects (more information under 'Segment reporting') are shown in the reconciliation.

With the exception of the elimination of the "one-off effects", the accounting principles for segment reporting correspond to the principles applied for the Consolidated Financial Statements and are to be understood analogously to IFRS as they are to be applied in the EU. This applies as long as the valuation methods and the definition of segments do not change.

Therefore, a reconciliation need not be made due to differences between internal measurement and IFRS measurement, but only in respect of items that are not allocated to reportable segments.

## Segment reporting

### Explanation of the measurement variables of the segments

For the Tele Columbus Group Management Board, normalised EBITDA<sup>6</sup> is the key performance indicator which is reported separately for each operating segment for the purposes of monthly reporting. Normalised EBITDA constitutes earnings before net finance income/costs (share of profit of equity-accounted investees, interest income, interest expense and other finance income/costs), income taxes, amortisation, depreciation and impairment losses on fixed assets. EBITDA does not contain any so-called "one-off effects". These are defined by the Management Board as non-recurring, rare or extraordinary expenditure or income if the event is not likely to re-occur in the next two financial years or did not occur in the past two financial years. In addition to the 'non-recurring items', expenses and income from certain transactions, which by the Management Board's definition are not directly related to the provision of services, are also eliminated. This also includes gains and losses on the sale of property, plant and equipment. Any expenses and income associated with these events are deducted from adjusted EBITDA. These are expenses or income that have predominantly not arisen from the operational business or are of a restructuring nature, and therefore cannot be used to assess operating success.

Non-recurring expenses in 2019 are mainly costs of ongoing restructuring, e.g. external support and consulting services for efficiency-enhancing projects. A further share of the special effects was attributable to costs for consulting services in connection with strategic projects.

Non-recurring expenses in 2018 mainly comprise consulting costs for the harmonisation and optimisation of IT systems and integration costs, severance payments and expenses in connection with impairment of receivables.

The following table contains information on the reportable "TV" and "Internet and Telephony" segments and the non-reportable "Other" segment:

1 Jan to 31 Dec 2019				
KEUR	TV	Internet & Telephony	Other	Total
Revenue	253,487	160,518	85,400	499,405
Normalised EBITDA	139,989	116,337	-16,871	239,454
Non-recurring expenses (-) /income (+)	-7	-47	-25,220	-25,274
<b>EBITDA</b>	<b>139,981</b>	<b>116,290</b>	<b>-42,091</b>	<b>214,180</b>

<sup>6</sup> This ratio is a performance indicator as defined by Tele Columbus AG's management.

Notes to the consolidated financial statements  
as at 31 December 2019

1 Jan to 31 Dec 2018

KEUR	TV	Internet & Telephony	Other	Total
Revenue	267,285	153,029	74,067	494,381
Normalised EBITDA	149,672	111,810	-25,531	235,951
Non-recurring expenses (-) /income (+)	-1,506	30	-44,925	-46,401
<b>EBITDA</b>	<b>148,166</b>	<b>111,840</b>	<b>-70,456</b>	<b>189,550</b>

The reconciliation of the reportable segments' total profit or loss to the consolidated profit or loss before taxes and to discontinued operations is shown in the table below:

KEUR	2019	2018
EBITDA of reportable segments	256,271	260,005
Depreciation and amortisation	-184,177	-283,003
Profit/ loss from investments in associates	-168	-5
Other financial income and expenses	-66,597	-77,754
Other	-42,091	-70,456
<b>Profit before taxes</b>	<b>-36,762</b>	<b>-171,213</b>

#### ***Other segment disclosures***

Secondary segmenting based on geographical criteria is not applied, as all revenue is generated exclusively in Germany.

Revenue is generated by a plurality of customers such that no significant portion is attributable to one or a few external customers.

## **F.7 Disclosures pursuant to the German Commercial Code [HGB]**

### **Employees**

The Group employed an average of 1,117 staff in the financial year (2018: 1,216), of which 1,031 were employees (2018: 1,137), 54 managerial staff (2018: 57) and 32 trainees (2018: 23).

### **Declaration of compliance with the German Corporate Governance Code in accordance with Section 161 of the German Stock Corporation Act [AktG]**

The Management and the Supervisory Board of Tele Columbus AG have issued the required declaration of compliance in accordance with Section 161 AktG. This is printed in the 2019 annual report of Tele Columbus AG and has also been made permanently available to the shareholders on the Tele Columbus website at <https://www.telecolumbus.com/investor-relations/entsprechenserklaerung>.

Notes to the consolidated financial statements  
as at 31 December 2019

### Auditor's fee

During the financial year, Tele Columbus was provided with the following services by the appointed auditor, Ernst & Young GmbH, Wirtschaftsprüfungsgesellschaft, which had also been appointed in the previous year:

KEUR	31 December 2019	31 December 2018
Audit services	1,380	1,551
Other assurance services	-	-
Other services	69	15
	<b>1,449</b>	<b>1,566</b>

### F.8 Events after the reporting period

With effect from 1 January 2020, the Supervisory Board appointed Dr Daniel Ritz to be Chief Executive Officer (CEO) and member of the Management Board. Timm Degenhardt resigned his position as CEO with effect from 31 January 2020 but will remain member of the Management Board until 31 March 2020.

On 30th January 2020 the World Health Organisation declared the spread of the new coronavirus 'Covid-19' as a "health emergency of international proportions". This pandemic has a considerable impact on the situation and development of the global economy and business in Germany. We therefore classify this as an event of particular significance after the balance sheet date. We refer to the statements in the risk report and the forecast in the management report.

## **G. Declaration by the Group's management**

We hereby confirm that, to the best of our knowledge, the consolidated financial statements give a true and fair view of the consolidated financial position of the Group and of its consolidated financial performance and its consolidated cash flows in accordance with applicable accounting policies, and that the group management report, which is combined with the management report of Tele Columbus AG, gives a true and fair view of the Group's business development including its performance and position, and also describes significant opportunities and risks relating to the Group's anticipated development.

Berlin, 27 March 2020

Management Board

---

Chief Executive Officer  
- Dr. Daniel Ritz -

Chief Financial Officer  
- Eike Walters -

Member of the Board  
- Timm Degenhardt -

## H. Independent auditor's Report

### 1. Independent auditor's report

To Tele Columbus AG, Berlin

#### **Report on the audit of the consolidated financial statements and of the group management report**

#### **Opinions**

We have audited the consolidated financial statements of Tele Columbus AG, Berlin, and its subsidiaries (the Group), which comprise the consolidated income statement, and the consolidated statement of comprehensive income for the fiscal year from 1 January to 31 December 2019, the consolidated statement of financial position as of 31 December 2019, the consolidated statement of cash flows and the consolidated statement of changes in equity for the fiscal year from 1 January to 31 December 2019, and notes to the consolidated financial statements, including a summary of significant accounting policies. In addition, we have audited the group management report of Tele Columbus AG for the fiscal year from 1 January to 31 December 2019. In accordance with the German legal requirements, we have not audited the content of the non-financial declaration included in section 9 of the group management report and the content of the declaration of corporate governance included in section 8 of the group management report.

In our opinion, on the basis of the knowledge obtained in the audit,

- the accompanying consolidated financial statements comply, in all material respects, with the IFRSs as adopted by the EU, and the additional requirements of German commercial law pursuant to Sec. 315e (1) HGB ("Handelsgesetzbuch": German Commercial Code) and, in compliance with these requirements, give a true and fair view of the assets, liabilities, and financial position of the Group as of 31 December 2019, and of its financial performance for the fiscal year from 1 January to 31 December 2019, and
- the accompanying group management report as a whole provides an appropriate view of the Group's position. In all material respects, this group management report is consistent with the consolidated financial statements, complies with German legal requirements and appropriately presents the opportunities and risks of future development. Our opinion on the group management report does not cover the content of the non-financial declaration included in section 9 of the group management report and the content of the declaration of corporate governance included in section 8 of the group management report.

Pursuant to Sec. 322 (3) Sentence 1 HGB, we declare that our audit has not led to any reservations relating to the legal compliance of the consolidated financial statements and of the group management report.

**Basis for the opinions**

We conducted our audit of the consolidated financial statements and of the group management report in accordance with Sec. 317 HGB and the EU Audit Regulation (No 537/2014, referred to subsequently as “EU Audit Regulation”) and in compliance with German Generally Accepted Standards for Financial Statement Audits promulgated by the Institut der Wirtschaftsprüfer [Institute of Public Auditors in Germany] (IDW). Our responsibilities under those requirements and principles are further described in the “Auditor’s responsibilities for the audit of the consolidated financial statements and of the group management report” section of our auditor’s report. We are independent of the group entities in accordance with the requirements of European law and German commercial and professional law, and we have fulfilled our other German professional responsibilities in accordance with these requirements. In addition, in accordance with Art. 10 (2) f) of the EU Audit Regulation, we declare that we have not provided non-audit services prohibited under Art. 5 (1) of the EU Audit Regulation. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinions on the consolidated financial statements and on the group management report.

**Key audit matters in the audit of the consolidated financial statements**

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements for the fiscal year from 1 January to 31 December 2019. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon; we do not provide a separate opinion on these matters.

Below, we describe what we consider to be the key audit matters:

## 1. Revenue recognition

### *Reasons why the matter was determined to be a key audit matter*

Tele Columbus Group generates revenue primarily in the following key segments: analogue and digital cable television, additional digital services, internet and telephony. Furthermore, it generates revenue from transmission fees, construction services as well as the implementation of infrastructure and other projects. Due to the large number of individual contracts in the key segments that are mostly recorded through IT based systems, as well due to different services and contractual bases in incidental operations, we consider revenue recognition at Tele Columbus to be complex. Due to the complexity, which is accompanied by an increased risk of material misstatement, we have identified revenue recognition as one of the key audit matters.

### *Auditor's response*

During our audit, we evaluated the recognition and measurement policies applied in the consolidated financial statements of Tele Columbus AG using the criteria for the rendering of services, the sale of products as well as the granting of license rights. We tested the processes and the effectiveness of controls implemented by the executive directors for their existence and correct revenue recognition in the key segments of the significant entities of the Tele Columbus Group. Our response in the area of revenue from key segments focused on the entry and processing of customer data and the customer contracts in the IT systems of the Tele Columbus Group. Based on the customer data and contracts recorded in the systems, using analytical procedures as well as substantive sampling tests, we mainly reviewed the period-based rendering of services for the customers of the Tele Columbus Group on the basis of periodic invoices and payments received for these invoices. During our analytical procedures, we compared the average revenue per month per customer across the significant entities dealing with customers with our expected values and examined the development of monthly figures in the fiscal year. The substantive audit procedures particularly include the comparison of revenue recognized at transaction level to the data records of the customer data bases, the underlying customer contracts, the regular invoicing and payments received.

We also tested the processes and the effectiveness of controls implemented by the executive directors for their existence and correct revenue recognition in the ancillary operations of the significant entities of the Tele Columbus Group. We analyzed revenue recognition by comparing contractual agreements, existing payments and deferrals with the requirements of revenue recognition for services on a sample basis. We analyzed the revenue recognition for long-term construction contracts, whether it corresponds to the degree of completion of the underlying projects. In addition, we verified the project calculations methodologically and obtained evidence of the budget figures of total costs as well overall revenue with the help of contractual arrangements.

In assessing the executive directors' analysis of contracts, we paid particular attention to requirements which we expect to have an effect on the accounting in view of the Company's business model. In assessing the contract analysis performed by the executive directors, we evaluated in particular the assessment of various performance obligations. We also examined the allocation of the transaction price to the corresponding performance obligations by verifying samples for clerical accuracy.

Our audit procedures did not lead to any reservations relating to revenue recognition and the disclosures in the notes to the consolidated financial statements.

#### *Reference to related disclosures*

Disclosures relating to the accounting policies for revenue are included in section D "Accounting policies" under D.2.10 "Recognition of revenue" in the notes to the consolidated financial statements.

Information about the breakdown of revenue can be found in section E "Explanatory notes to the consolidated income statement and consolidated statement of financial position" under E.1 "Revenue" in the notes to the consolidated financial statements.

## **2. Impairment test for all the carrying amounts of the Group including goodwill**

### *Reasons why the matter was determined to be a key audit matter*

In the consolidated financial statements of Tele Columbus AG, goodwill is recognized in the "Intangible assets" item.

Goodwill is subject to an annual impairment test as of 31 December in order to determine any need to recognize an impairment loss. The result of these tests is highly dependent on the executive directors' estimate of future cash flows and the respective discount rates used.

In Light of the impairment of the reported goodwill in prior year, that was allocated to the Cash-generating unit “TV”, as well as the judgment exercised during measurement, the impairment test for goodwill was a key audit matter.

#### *Auditor’s response*

During our audit, we verified the procedure for performing impairment tests in terms of compliance with the requirements as defined by IAS 36 Impairment of Assets with the support of internal valuation experts. In this context, we analyzed the planning process and discussed the significant planning assumptions of the current five-year plan with the executive directors, and compared this with the earnings realized in the past. We compared the future cash inflows used in the calculation with the budget, which was approved by the executive directors, comparing it with general and industry-specific market expectations. As far as for the respective group of cash-generating units, a significant portion of the value in use results from the cash flow forecast for the time after the detailed planning period (terminal value phase), for this phase we analyzed the sustainable cash inflows using the segment-specific market development.

We analyzed the derivation of the risk-adjusted capitalization rate with the involvement of our internal valuation experts by analyzing the peer group, comparing in particular market data with external evidence and examining the clerical accuracy of the calculation.

Our assessment of the results of the impairment tests, as prepared by the Tele Columbus Group, was based among other things on an analysis of market capitalization of the Group as of the reporting date. Based on our knowledge that even relatively small changes in the discount rates used can at times have significant effects on the amount of the business value calculated or the recoverable amount, we analyzed the parameters used to determine the discount rates and verified them in terms of the requirements of IAS 36 Impairment of Assets. We also performed sensitivity analyses in order to estimate any potential impairment risk associated with a reasonably possible change in one of the significant assumptions used in the valuation.

Our audit procedures did not lead to any reservations relating to the impairment test for goodwill.

#### *Reference to related disclosures*

Disclosures relating to the accounting policies of goodwill are included in the notes to the consolidated financial statements in section D “Accounting and measurement policies” under D.1 “Significant judgements” and D.2.1 “Intangible assets”.

Explanations to the impairment test are included in the notes to the consolidated financial statements in section E “Notes to the consolidated income statement and consolidated statement of financial position” under E.12 “Impairment test of intangible assets and goodwill”.

### **3. Recognition of additions to property, plant and equipment**

#### *Reasons why the matter was determined to be a key audit matter*

In the consolidated financial statements of Tele Columbus AG, the assets recognized in “Property, plant and equipment” item are mostly telecommunications network and equipment that are used by the Tele Columbus Group to provide analogue and digital signals to its customers. There were no significant additions to property, plant and equipment in fiscal year 2019.

When recognizing additions to property, plant and equipment, there is a demarcation between expenses for assets with many years’ of useful lives and those expenses that maintain the potential of assets for use or restore such potential. Additions are further assigned to specific asset classes, which are used to determine the future depreciation and to assess, whether contractual obligations for retirement of acquired assets result in future obligations for the Tele Columbus Group. Due to the high number of contractual individual transaction and the necessity of technical and economical estimates, we consider the recognition of additions to property, plant and equipment at the Tele Columbus Group to be complex. Due to the complexity, which is accompanied by an increased risk of material misstatement, we have identified the recognition of additions to property, plant and equipment as one of the key audit matters.

#### *Auditor’s response*

During our audit, we examined the accounting policies applied in the consolidated financial statements of the Tele Columbus Group for the recognition of additions to property, plant and equipment, the calculation of own work capitalized, the determination of useful lives and the recognition of obligations to restore assets to their original condition using the criteria for the capitalization of assets with a finite useful life. We tested the processes and the effectiveness of group-wide controls implemented by the executive directors of the Tele Columbus Group regarding the demarcation of additions to fixed assets that are capitalized and costs that are expensed, the consistent application of useful lives for individual asset classes as well as the complete recognition of obligations to restore the assets to their original condition. Our audit focused on the documentation and verifiability of technical and economic estimates for the IT-based first-time recognition of additions to assets, the assumptions for the calculation of own work capitalized at the level of cost centers using pro rata mark-

ups for overheads as well as compliance with group-wide requirements for the application of useful lives for specific asset classes. We reviewed the additions to property, plant and equipment recognized using analytical and substantive procedures on a sample basis. The analytical procedures include the comparison of the absolute amounts of additions as well as capital expenditures ratio to the prior year, the assessment of pro rata capitalization of personnel expenses as part of own work capitalized as well as analytical review of the cost of materials for matters subject to capitalization. The substantive audit procedures particularly include the reconciliation of the additions with the underlying invoices and evidence of services and the reconciliation of own work capitalized included in personnel expenses to the corresponding evidence of wages and salaries as well as the review of certain matters whether they are subject to capitalization.

Our procedures did not lead to any reservations relating to the recognition of additions to property, plant and equipment.

#### *Reference to related disclosures*

Disclosures relating to the accounting policies for assets of property, plant and equipment are included in section D “Accounting policies” under D.2.3 “Property, plant and equipment” in the notes to the consolidated financial statements. Information about the breakdown of property, plant and equipment can be found in section E “Explanatory notes to the consolidated income statement and consolidated statement of financial position” under E.11 “Property, plant and equipment” in the notes to the consolidated financial statements.

#### **Other information**

The Supervisory Board is responsible for the Report of the Supervisory Board. In all other respects, the executive directors are responsible for the other information. Other information comprises the other components of the annual report, with the exception of the audited consolidated financial statements and the consolidated management report as well as our independent auditor’s report, especially the “Declaration by the Group’s legal representatives” pursuant to Section 297 (2) Sentence 4 HGB, the Section “Editorial of the Management Board” of the annual report, the “Report of the Supervisory Board” pursuant to Section 171 (2) AktG, the declaration of compliance with the German Corporate Governance Codex, the statement on corporate governance and the non-financial declaration. We received a version of this ‘Other information’ by the time this auditor’s report was issued.

Our opinions on the consolidated financial statements and on the group management report do not cover the other information, and consequently we do not express an opinion or any other form of assurance conclusion thereon.

In connection with our audit, our responsibility is to read the other information and, in so doing, to consider whether the other information

- is materially inconsistent with the consolidated financial statements, with the group management report or our knowledge obtained in the audit, or
- otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

### **Responsibilities of the executive directors and the supervisory board for the consolidated financial statements and the group management report**

The executive directors are responsible for the preparation of the consolidated financial statements that comply, in all material respects, with IFRSs as adopted by the EU and the additional requirements of German commercial law pursuant to Sec. 315e (1) HGB, and that the consolidated financial statements, in compliance with these requirements, give a true and fair view of the assets liabilities, financial position, and financial performance of the Group. In addition, the executive directors are responsible for such internal control as they have determined necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the executive directors are responsible for assessing the Group's ability to continue as a going concern. They also have the responsibility for disclosing, as applicable, matters related to going concern. In addition, they are responsible for financial reporting based on the going concern basis of accounting unless there is an intention to liquidate the Group or to cease operations, or there is no realistic alternative but to do so.

Furthermore, the executive directors are responsible for the preparation of the group management report that, as a whole, provides an appropriate view of the Group's position and is, in all material respects, consistent with the consolidated financial statements, complies with German legal requirements, and appropriately presents the opportunities and risks of future development. In addition, the executive directors are responsible for such arrangements and measures (systems) as they have considered necessary to enable the preparation of a group management report that is in accordance with the German legal requirements, and to be able to provide sufficient appropriate evidence for the assertions in the group management report.

The Supervisory Board is responsible for overseeing the Group's financial reporting process for the preparation of the consolidated financial statements and of the group management report.

### **Auditor's responsibilities for the audit of the consolidated financial statements and of the group management report**

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and whether the group management report as a whole provides an appropriate view of the Group's position and, in all material respects, is consistent with the consolidated financial statements and the knowledge obtained in the audit, complies with the German legal requirements and appropriately presents the opportunities and risks of future development, as well as to issue an auditor's report that includes our opinions on the consolidated financial statements and on the group management report.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Sec. 317 HGB and the EU Audit Regulation and in compliance with German Generally Accepted Standards for Financial Statement Audits promulgated by the Institut der Wirtschaftsprüfer (IDW) will always detect a material misstatement. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements and this group management report.

We exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements and of the group management report, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinions. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit of the consolidated financial statements and of arrangements and measures (systems) relevant to the audit of the group management report in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of these systems.

- Evaluate the appropriateness of accounting policies used by the executive directors and the reasonableness of estimates made by the executive directors and related disclosures.
- Conclude on the appropriateness of the executive directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in the auditor's report to the related disclosures in the consolidated financial statements and in the group management report or, if such disclosures are inadequate, to modify our respective opinions. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to be able to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements present the underlying transactions and events in a manner that the consolidated financial statements give a true and fair view of the assets, liabilities, financial position and financial performance of the Group in compliance with IFRSs as adopted by the EU and the additional requirements of German commercial law pursuant to Sec. 315e (1) HGB.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express opinions on the consolidated financial statements and on the group management report. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinions.
- Evaluate the consistency of the group management report with the consolidated financial statements, its conformity with [German] law, and the view of the Group's position it provides.
- Perform audit procedures on the prospective information presented by the executive directors in the group management report. On the basis of sufficient appropriate audit evidence we evaluate, in particular, the significant assumptions used by the executive directors as a basis for the prospective information, and evaluate the proper derivation of the prospective information from these assumptions. We do not express a separate opinion on the prospective information and on the assumptions used as a basis. There is a substantial unavoidable risk that future events will differ materially from the prospective information.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with the relevant independence requirements, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence and where applicable, the related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter.

### **Other legal and regulatory requirements**

#### **Further information pursuant to Art. 10 of the EU Audit Regulation**

We were elected as group auditor by the annual general meeting on 29 August 2019. We were engaged by the audit committee of the Supervisory Board on 11 December 2019. We have been the group auditor of Tele Columbus AG since fiscal year 2017.

We declare that the opinions expressed in this auditor's report are consistent with the additional report to the audit committee pursuant to Art. 11 of the EU Audit Regulation (long-form audit report).

In addition to the financial statement audit for the group entities, we provided advisory services related to data protection including a data protection audit that may be performed subsequently, which are not disclosed explicitly in the consolidated financial statements or in the group management report.
