<sup>1)</sup> For the financial year 2023/2024 the annual production capacity of the production plants is as follows:  
 Biodiesel: 710,000 tonnes (previously 660,000 tonnes); bioethanol: 800,000 tonnes (previously 342,000 tonnes);  
 biomethane: 1,980 GWh (previously 1,300 GWh). The capacity increase for bioethanol is primarily a result of the acquisition of the South Bend plant in May 2023 and the growth project in Nevada.

# Business report and the Group's position

The production volume of biodiesel and bioethanol in the period from July 1, 2023 to March 31, 2024 totalled 861,662 tonnes, compared with 664,491 tonnes in the same period in the previous year. The increased production volumes are due to efficiency improvements in Europe, and to the inclusion of South Bend Ethanol (SBE) in the Group's consolidated reporting. In addition, at 800.1 GWh the volume of biomethane produced in the first nine months of the financial year 2023/2024 once again represented an increase in the production volume compared to the previous year (9 M 2022/2023: 793.6 GWh).

## Results of operations

Despite increased production and sales volumes, Group revenue in the first nine months fell by 13 percent to EUR 1,318.1 million (9 M 2022/2023: EUR 1,521.3 million) on a year-on-year basis, primarily due to the lower level of sales prices for core products. Group revenues in the third quarter totalled EUR 409.2 million (Q3 2022/2023: EUR 443.6 million), 8 percent below the previous year's level.

Verbio SE reports significantly lower earnings for the first nine months of the financial year 2023/2024 compared to the same period in the previous year. As expected, in the third quarter of 2023/2024 it was not yet possible to reverse the downward trend seen in the second quarter. In the third quarter of 2023/2024 EBITDA was EUR 7.3 million, a decrease of 83 percent compared to the comparative period in the previous year (2022/2023: EUR 43.2 million).

Earnings before interest, taxes, depreciation and amortisation (EBITDA) for the nine-month period amounted to EUR 82.1 million, 62 percent lower than in the comparative period in the previous year (9 M 2022/2023: EUR 213.5 million).

The Group result before taxes and interest (EBIT) totalled EUR 44.7 million (9 M 2022/2023: EUR 184.7 million). The net result for the period amounted to EUR 11.7 million (9 M 2022/2023: EUR 124.1 million). Based on the result for the period, basic earnings per share amounted to EUR 0.18 (9 M 2022/2023: EUR 1.96).

Further information is presented in the detailed comments on the individual segments.

## Net assets and financial position

### Assets and liabilities

The balance sheet total at March 31, 2024 amounted to EUR 1,339.3 million, representing an increase of EUR 42.1 million compared to June 30, 2023 (EUR 1,297.2 million).

On the assets side of the balance sheet, the major change of note was the increase in non-current assets. The increase in non-current assets (EUR 763.4 million; June 30, 2023: EUR 670.4 million) primarily reflects the ongoing high levels of investment activity undertaken by the Group in the current financial year. Offsetting this is a decline in current assets compared to June 30, 2023 of EUR 50.9 million, falling from EUR 626.8 million to EUR 575.9 million, primarily due to the lower level of cash funds (EUR 111.2 million; June 30, 2023: EUR 170.3 million).

The equity and liabilities side of the balance sheet includes equity of EUR 916.4 million (June 30, 2023: EUR 911.8 million), representing approximately 68.4 percent (June 30, 2023: 70.3 percent) of the balance sheet total. Non-current liabilities increased compared to the June 30, 2023 year end (March 31, 2024: EUR 192.1 million; June 30, 2023: EUR 142.9 million) as a result of drawdowns on the medium term lines of credit. Within current liabilities, there has been a decrease in loans in particular compared to the June 30, 2023 year end (March 31, 2024: EUR 25.0 million; June 30, 2023: EUR 47.5 million), while there has been an offsetting increase in the other current financial liabilities (EUR 57.8 million; June 30, 2023:

EUR 42.7 million). As a result there has been an overall decrease in current liabilities compared to the June 30, 2023 year end, from EUR 242.5 million to EUR 230.8 million.

### Cash flows

The cash flow from operating activities in the first nine months of the financial year 2023/2024 was significantly higher than in the previous year, and amounted to EUR 68.9 million (9 M 2022/2023: EUR -59.4 million). The increase compared to the previous year, despite the lower result for the period, was primarily due to the effect on cash funds of the large increase in inventories in the previous year, while in the current financial year inventories are largely unchanged. In addition, the operating cash flow in the first nine months of the financial year is also affected by significantly lower tax payments (9 M 2023/2024: EUR 39.9 million; 9 M 2022/2023: EUR 135.6 million).

Driven by cash outflows from investment activities in the first nine months of 2023/2024, the Group reports total cash outflows of EUR 135.9 million (9 M 2022/2023: EUR 134.9 million). In the current financial year, the investments primarily reflect payments made for investments in property, plant and equipment (EUR 136.0 million; 9 M 2022/2023: EUR 134.6 million).

The cash flow from financing activities totalled EUR 7.8 million (9 M 2022/2023: EUR 27.2 million). Of this, EUR 12.7 million resulted from the payment of the dividend for the previous financial year (9 M 2022/2023: EUR 12.7 million). Net cash inflows from drawdowns of financial liabilities in the current financial year totalled EUR 27.5 million (9 M 2022/2023: EUR 45.0 million). In both periods cash outflows also include payments for the redemption of lease liabilities (9 M 2023/2024: EUR 7.0 million; 9 M 2022/2023: EUR 5.1 million).

As a result of the above, cash and cash equivalents decreased by a total of EUR 59.2 million in the period from July 1, 2023 to March 31, 2024. The balance of cash and cash equivalents reported in the balance sheet at March 31, 2024 amounted to EUR 111.2 million. In addition, Verbio has further cash resources in the form of lines of credit, the availability of which has been approved for the medium term, totalling EUR 175.0 million.

### Net debt

The Group's bank and loan financing arrangements of EUR 191.1 million are offset by cash and cash equivalents and cash held in segregated accounts totalling EUR 136.1 million, so that the reported net debt at March 31, 2024 amounted to EUR 55.0 million (June 30, 2023: EUR -57.4 million).

## Development of the Biodiesel, Bioethanol and Other segments

Revenue trends in the Biodiesel segment in the third quarter of the current financial year 2023/2024 (EUR 217.8 million) compared to the third quarter of 2022/2023 (EUR 308.2 million) were primarily driven by the sharp decline in biodiesel and GHG quota sales prices in Europe, while sales volumes remained stable. In addition, the manner in which purchase and sales contracts for the production volumes in Canada have been structured since December 2023 means that in economic terms they are treated as a processing contract, which has led to a change in the presentation of sales revenues and thus to a significant reduction in revenues compared to the same period of the previous year. The decline in earnings despite attractive purchase prices for vegetable oil is primarily due to the hedging of good biodiesel margins for the fourth quarter of 2023/2024, as well as higher maintenance costs and personnel expenses. Excluding the effect of unrealised commodity forward transactions, the EBITDA for the third quarter would have been EUR 21.1 million.

It was possible to increase revenue to EUR 188.1 million (Q3 2022/2023: EUR 133.8 million) in the Bioethanol segment despite declining prices for bioethanol and GHG quotas in Europe. This was primarily driven by increased sales volumes, among other things as a result of the acquisition of the South Bend ethanol plant in May 2023. Although procurement prices for grain also fell significantly, the impact on earnings was outweighed by lower sales prices. In addition, start-up costs for Verbio's growth projects in the USA and significantly lower income from GHG quotas compared to the same period of the previous year had a negative impact on earnings. As a result, Verbio generated an EBITDA of EUR -5.2 million in the third quarter (Q3 2022/2023: EUR 17.5 million).

## Outlook, opportunity and risk report

### Outlook report

On the publication of the annual report for the financial year 2022/2023 on September 26, 2023, an expected EBITDA in the range of EUR 200 million to EUR 250 million was communicated for the financial year 2023/2024, with net debt at the end of the financial year 2023/2024 forecast to be in the range of EUR 110 million to EUR 150 million. A downward correction of this forecast was communicated in an ad hoc announcement on January 15, 2024. The revised forecast for the current financial year 2023/2024 is for an EBITDA in the range of EUR 120 million to EUR 150 million, and net debt in the range of EUR 145 million to EUR 175 million. The primary reason for the adjustment to the forecast in January was the unexpected and sustained pressure on ethanol and GHG quota prices, particularly due to the massive volume of questionable imports of advanced biodiesel from Asia in 2023. The Management Board has indicated that the EBITDA is likely to be at the lower end of the range indicated.

### Risk and opportunity report

There have been no changes to the opportunities and risks presented in the 2022/2023 annual report. Please refer to the forecast report for further information concerning the adjustment of the forecast already made as a result of the prolonged risk in connection with imports of advanced biodiesel from Asia. Further, there have been no significant changes in the risks and opportunities profile of the Verbio Group during the reporting period. At the current time there are no identifiable risks that could threaten the ability of Verbio and its subsidiaries to continue as a going concern.

## Forward-looking statements

This quarterly statement includes various statements concerning forecasts, expectations and information that relate to the future development of the Verbio Group and Verbio SE. These statements are based on assumptions and estimates and may be associated with known and unknown risks and uncertainties. Actual developments and results, as well as the financial and asset position, may therefore differ significantly from the expressed expectations and assumptions. Such differences may be due, among other things, to market fluctuations, changes in worldwide market prices for raw materials as well as financial markets and exchange rates, changes in national and international laws and directives, or fundamental changes in the economic and political climate. Verbio does not intend to and does not undertake an obligation to update or revise any forward-looking statements to adapt them to events or developments after the publication of this quarterly statement.

This quarterly statement is published in German (original version) and in English (non-binding translation). It is available for download in both languages on the internet at <https://www.verbio.de>.

Further information material about Verbio SE is available on request.
